

PARKS STRATEGIC PLAN

2022-2025

PURPOSE

The Farmersville City Council has an active Strategic Plan that identifies several priorities and proposed actions to enhance our core services and address the needs of the community. In response to concerns expressed by residents, the Council has directed staff to develop a more specific Parks Strategic Plan to address short-term and long-term improvements to the City parks and landscaping.

STRATEGY

With eight parks located within the City of Farmersville, projects must be prioritized based on cost and the funds available each fiscal year, plus the schedule for City staff to manage those projects. These factors can sometimes delay projects or even advance others, so it is important that this Plan be flexible.

This Plan identifies proposed actions for each of the parks and are broken down in to two Tiers. Tier 1 includes projects that can be budgeted and implemented in a reasonable period of time. Tier 2 projects may include more complex issues such as engineering specifications and additional funds, so the schedules for those projects are more fluid.

PARKS STRATEGIC PLAN

2022-2025

ROY PARK

Priorities & Proposed Actions – Tier 1
