GARDENIA COURTYARDS SENIOR APARTMENTS PROJECT FLOODPLAIN MANAGEMENT DETERMINATION STEP 3: ALTERNATIVE SITE ANALYSIS

FLOODPLAIN MANAGEMENT DETERMINATION
STEP 3: ALTERNATIVE SITE ANALYSIS

INTRODUCTION

The primary intent of the Floodplain Management Determination Step 3, as stated in Title 44, Section 9.9 b of the Code of Federal Regulation, is to "[…] identify and evaluate practicable alternatives to carrying out a proposed action in floodplains or wetlands, including; (1) Alternative sites outside the floodplain or wetland; (2) Alternative actions which serve essentially the same purpose as the proposed action, but which have less potential to affect or be affected by the floodplain or wetlands; and (3) No action."

Pursuant to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) 06107C0954E, effective June 16, 2009, the project site is located within a 500-year floodplain and is identified as an Area with 0.2 Percent Annual Chance Flood Hazard.[1] An area within a 500-year floodplain is defined as an area, including the base flood elevation (BFE), subject to inundation from a flood having a 0.2 percent chance or greater of being equaled or exceeded in any given year. Therefore, potential impacts related to flood risks could occur, and development of the project site through assistance provided by the U.S. Department of Housing and Urban Development (HUD) is subject to the 8-Step Decision-Making Process for Executive Order 11988.

PROJECT DESCRIPTION SUMMARY

The 2.39-acre project site is located northeast of the intersection of Farmersville Road and East Walnut Street/West Walnut Avenue, in the City of Farmersville, California, and is identified by Assessor's Parcel Number (APN) 111-290-015. Currently, the project site consists of undeveloped land with a private, dirt stubbed street on the project site's southern frontage. The City of Farmersville General Plan designates the project site as Medium High Density Residential and the project site is zoned as Medium High Density Residential (RM-2.5).

The proposed project would include the development of an affordable senior housing community consisting of 42 senior housing units within one two-story residential building. The senior housing development would include 34 one-bedroom units at 607 square feet (sf) each and eight two-bedroom units at 804 sf each. The proposed project would include 41 low-income units for seniors, which would be restricted for seniors aged 62 or above earning between 30 and 60 percent of the Area Median Income (AMI) of Tulare County, and one two-bedroom manager's unit.

With respect to the on-site amenities, the proposed project would include a 3,469-sf community center, community garden, fenced dog park, bocce ball court, and a picnic table area with a BBQ. The 3,469-sf two-story community center would include an elevator, a 877-sf kitchen and community space, 444-sf flex space, 599-sf exercise room, 374-sf laundry room, 129-sf office, 194-sf office lobby, 56-sf unisex restroom, and an 85-sf unisex restroom.

[1] Federal Emergency Management Agency. *Flood Insurance Rate Map 06107C0954E.* Available at: https://msc.fema.gov/portal/home. Accessed May 2025.

Primary site access would be provided from Farmersville Road to the west through the existing stubbed street on the project site's southern frontage, which would be paved into a private drive. A drive aisle would extend north from the private drive into the site, providing vehicular access to the proposed senior housing development. Parking for 67 vehicles would be available throughout the senior housing development, including 47 covered spaces and 20 uncovered spaces. Three of the 47 covered parking spaces and one of the 20 uncovered parking spaces would be designed in compliance with the Americans with Disabilities Act (ADA). Of the total 67 parking spaces, 35 spaces would be electric vehicle (EV) capable, including 27 EV-ready low power receptacles, one van accessible EV charging space, one accessible EV charging space, one ambulatory EV charging space, and five standard EV charging spaces. The project would also provide long-term storage for four bicycles and short-term storage for 20 bicycles on the project site.

ALTERNATIVES

The alternatives evaluated in this section are included for discussion in order to attempt to minimize or eliminate impacts associated with the floodplain. The alternatives to the proposed project evaluated in this section are as follows (see Figure 1):

1. Locate the Project in the Floodplain;
2. Locate the Project Outside of the Floodplain; and
3. No Action Alternative.

1. Locate the Project in the Floodplain

Alternative 1 would be located immediately west of North Ventura Avenue, south of West Chandler Street, and north of West Citrus Drive, and would implement the same components of the proposed project, including the construction of an affordable senior housing community consisting of 42 senior housing units within one two-story residential building and the associated amenities and on-site parking. The Alternative 1 site is currently vacant, undeveloped, and relatively flat with ruderal grasses throughout and trees located around the perimeter of the site. Thus, although pursuant to FEMA FIRM 06107C0962E, effective June 16, 2009, FEMA designates the site as an Area with 0.2 Percent Annual Chance Flood Hazard within the 500-year floodplain, the Alternative 1 site is among the few locations within close proximity to the project site that is developable, would not require demolition of existing structures or removal of existing agricultural uses, and is within relatively close proximity to existing commercial uses and healthcare facilities.[2]

Natural Environment

Based on the natural environment, occupants of the Alternative 1 site would be subject to potential adverse effects related to flooding. In addition, construction of Alternative 1 could result in potential adverse effects related to endangered species and historic preservation, due to on-site trees and the potential for unknown subsurface resources to be present on-site, which could be disturbed during construction. Furthermore, similar to the proposed project, according to the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey, the Alternative 1 site is designated as "Prime farmland if irrigated."[3]

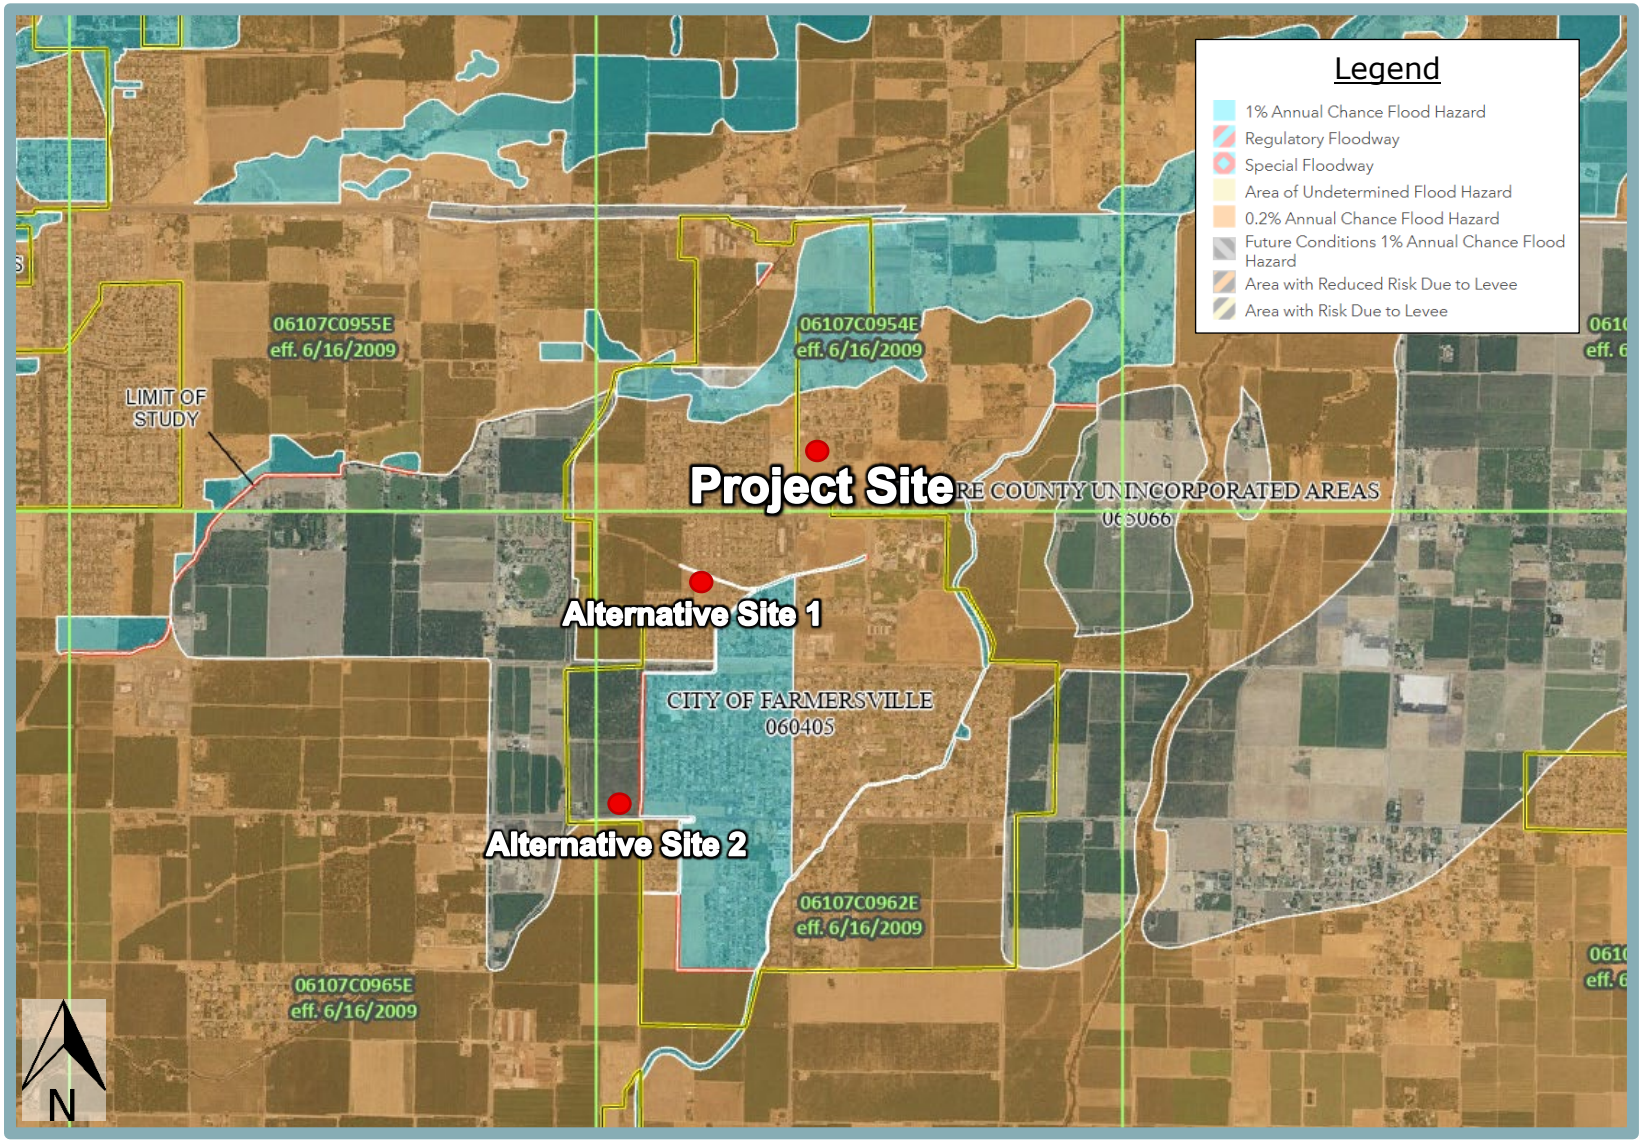
Figure 1
Alternative Site Locations



Thus, development of the Alternative 1 site could result in potential adverse effects related to agricultural resources. Based on the above, potential adverse effects related to the natural environment would be similar to or greater than those associated with development of the proposed project.

Social Concerns

The Alternative 1 site is located approximately 0.48-mile to the southwest of the project site and, similar to the proposed project, the Alternative 1 site would be located adjacent to a neighborhood street, not a major roadway. As such, future residents of Alternative 1, similar to residents of the proposed project, would not be exposed to excessive noise and toxic air contaminants generated from traffic travelling on nearby roadways. In addition, both the proposed project and Alternative 1 site are located in residential neighborhoods, with similar access and proximity to public transportation stops in the City. Thus, the proposed project and the Alternative 1 site would provide similar feasibility for low-income and disabled residents to access facilities located in Farmersville. However, the Alternative 1 site is located directly adjacent to agricultural land on the project site's western boundary. As such, future residents of the Alternative 1 site could be exposed to pesticides related to the agricultural land on the project site's western frontage. Therefore, given the close proximity of the Alternative site 1 to agricultural land, the site would be subject to potential adverse effects associated with environmental justice and social concerns, specifically related to equal protection from environmental and health hazards and equal access to a healthy environment in which to live.

Economic Aspects

The Alternative 1 site is not owned by the project applicant. Purchase of the Alternative 1 site could render the proposed affordable senior housing development economically infeasible due to the lack of available funding.

Legal Constraints

Unlike the proposed project site, the Alternative 1 site is designated Medium Density Residential and is zoned Single Family Residential (R-1). The Medium Density Residential land use designation allows for a mix of single family and multi-family uses, including duplex, tri-plex, four-plex units, and mobile home parks. In addition, the Medium Density Residential land use designation allows for a maximum of 15 dwelling units per gross acre (du/ac), or 42 persons per acre. Pursuant to the City's Municipal Code Chapter 17.40, examples of typical uses within R-1 zoned parcels include single-family dwellings and accessory buildings and uses. The development of 42 senior housing units within one two-story residential building would not comply with the allowed single family and multi-family uses in the Medium Density Residential land use designation and R-1 zoning. As such, development of the Alternative would not be consistent with the General Plan, and Alternative 1 would require a General Plan Amendment (GPA) and rezoning to allow for development of the project on the Alternative 1 site.

Conclusion

As discussed above, the Alternative 1 site is not designated or zoned to allow for the development of a 42-unit senior housing development. In addition, construction of Alternative 1 could result in potential adverse effects related to agricultural resources, endangered species, and historic preservation equal to or potentially greater than those associated with the proposed project. In order to address potential increased impacts related to environmental justice, social concerns, endangered species, and historic preservation, development of Alternative 1 would require mitigation measures similar to those set forth in the Environmental Assessment prepared for the

proposed project. Finally, considering that the Alternative 1 site is not owned by the project applicant, purchase of the site could render development of the affordable senior housing project on the Alternative 1 site economically infeasible. Overall, Alternative 1 would not diminish the number of substantial environmental adverse effects that would occur, relative to those associated with the proposed project, such that the merits of the Alternative would override the economic infeasibility and lack of community benefits of the Alternative.

2. Locate the Project Outside of the Floodplain

Alternative 2 would be constructed on a site that is currently developed with agricultural land, located immediately to the north of West Visalia Road. Alternative 2 would implement the same components of the proposed project, including the construction of an affordable senior housing community consisting of 42 senior housing units within one two-story residential building and the associated amenities and on-site parking. The Alternative 2 site is currently developed with agricultural trees and a residence in the southwestern corner of the site. FEMA designates the site as an Area of Minimal Flood Hazard, which is outside of the 100-year and 500-year floodplain.[4]

Natural Environment

The Alternative 2 site is within an Area of Minimal Flood Hazard, outside of the 100-year and 500-year floodplains and, as such, would not be subject to potentially substantial adverse effects related to flooding. The site is developed with agricultural trees and a residence, limiting the site's potential to accommodate endangered species. However, similar to the proposed project, according to the USDA NRCS Web Soil Survey, the site is designated as "Prime farmland if irrigated"[5] and development of the site would involve the removal of the existing agricultural trees, which could result in potential adverse impacts related to agricultural resources and biological resources; for example, tree removal could result in impacts to birds nesting in the on-site trees. The project site is bordered by West Visalia Road to the south. Based on the natural environment, occupants of the Alternative 2 site could be subject to potential adverse effects related to air quality and excessive noise, due to the site's proximity to West Visalia Road. Construction of Alternative 2 could result in potential adverse effects related to historic preservation, due to the potential for unknown subsurface resources to exist on-site and to the demolition of the existing on-site residence, as well as potential air quality and noise adverse effects to sensitive receptors in the vicinity. Based on the above, potential adverse effects related to the natural environment would be similar to or greater than those associated with development of the proposed project.

Social Concerns

The Alternative 2 site is located approximately 1.08 miles to the southwest of the project site and, similar to the proposed project, the Alternative 2 site would be located adjacent to West Visalia Road, which is not a major roadway. As such, future residents of Alternative 2, similar to residents of the proposed project, would not be exposed to excessive noise and toxic air contaminants generated from traffic travelling on nearby roadways. In addition, both the proposed project and Alternative 2 site are located in or adjacent to residential neighborhoods, with similar access and proximity to public transportation stops in the City. Thus, the proposed project and the Alternative 2 site would provide similar feasibility for low-income and disabled residents to access facilities

located in Farmersville. However, Alternative 2 is currently developed with an on-site residence. Development of the site would involve the demolition of the residence and the displacement of any potential current inhabitants of the residence. As the proposed project does not contain any residences on the site, Alternative 2 would displace residents whereas the proposed project would not. Furthermore, the Alternative 2 site is currently developed with an orchard. As such, future residents of the Alternative 2 site could potentially be exposed to pesticides in the soil related to the agricultural land currently located on the project site. Therefore, given that the Alternative site 2 is currently being used as agricultural land, the site would be subject to potential adverse effects associated with environmental justice and social concerns, specifically related to equal protection from environmental and health hazards and equal access to a healthy environment in which to live. Based on the above, Alternative 2 would not produce an equal level of community benefits to the surrounding neighborhood, and would be subject to additional potential environmental justice and social concerns relative to the proposed project.

Economic Aspects

The Alternative 2 site is not owned by the project applicant. Purchase of the Alternative 2 site could render the proposed affordable senior housing development economically infeasible due to the lack of available funding. In addition, development of the Alternative 2 site would require the removal of the existing orchard, leading to destruction of potential revenue for the property owner and the City of Farmersville.

Legal Constraints

Unlike the proposed project site, the Alternative 2 site is designated Medium Density Residential and General Commercial and is zoned R-1 and General Commercial (CG). The Medium Density Residential land use designation allows for a mix of single-family and multi-family uses, including duplex, tri-plex, four-plex units, and mobile home parks. In addition, the Medium Density Residential land use designation allows for a maximum of 15 du/ac, or 42 persons per acre. The General Commercial land use designation allows for shopping centers, retail uses, and offices. Pursuant to the City's Municipal Code Chapter 17.40, examples of typical uses within R-1 zoned parcels include single-family dwellings and accessory buildings and uses. Additionally, pursuant to the City's Municipal Code Chapter 17.44, the CG zone is intended to provide a general commercial area for the sale of commodities or the performance of services to serve the entire community. The development of 42 senior housing units within one two-story residential building would not comply with the allowed single family and multi-family uses in the Medium Density Residential land use designation and R-1 zoning, and the project would include residential development rather than the commercial development in the existing CG land use designation and zoning. As such, development of the Alternative would not be consistent with the General Plan, and Alternative 2 would require City approval of a GPA and Rezone to allow for development of the project on the Alternative 2 site.

Conclusion

The Alternative 2 site is not designated to allow for the proposed uses. In addition, development of the Alternative 2 site could expose future residents to potential impacts related to environmental justice that would be equal to or potentially greater than those associated with the proposed project. Furthermore, construction of Alternative 2 could result in potential adverse effects related to agricultural resources, endangered species, and historic preservation equal to or potentially greater than those associated with the proposed project. To address such impacts, development of Alternative 2 would require mitigation measures similar to those set forth in the Environmental Assessment prepared for the proposed project. Considering that the Alternative 2 site is not

owned by the project applicant, purchase of the site could render development of the affordable senior housing project on the Alternative 2 site economically infeasible. Overall, Alternative 2 would not diminish the number of substantial environmental adverse effects that would occur, relative to those associated with the proposed project, such that the merits of the Alternative would override the economic infeasibility and lack of community benefits of the Alternative.

3. No Action Alternative

Under the No Action Alternative, the proposed project would not be developed and the project site would remain in its current state. A project proponent could choose to develop the project site in accordance with the site's existing Medium High Density Residential land use designation and RM-2.5 zoning designation. However, considering that the proposed project is generally consistent with the uses allowed under the site's land use and zoning designations, development of the project site facilitated by the No Action Alternative would likely result in similar potential adverse effects and require similar mitigation measures as those identified in the Environmental Assessment prepared for the proposed project. As such, future structures built at the project site in accordance with the existing land use and zoning designations would require measures to prevent potential adverse geological effects, as required by Mitigation Measure 1 of the Environmental Assessment, and adverse effects related to noise, as required by Mitigation Measure 2 of the Environmental Assessment. Thus, any future potential development of the site facilitated by the No Action Alternative would likely result in similar potential adverse effects relative to those identified for the proposed project.

Finally, the City of Farmersville 2023-2031 Housing Element establishes the existing housing needs in Farmersville. According to the Housing Element, there is a resource need in Farmersville of 42 units for lower-income seniors.[6] The No Action Alternative could hinder the City's ability to achieve the affordable senior housing goals identified in the City's General Plan, if, in the event that future development of the site would be multi-family residential, such development is not affordable and restricted to seniors. Furthermore, the proposed project would consist of low-income senior housing units restricted for seniors earning between 30 and 60 percent of the AMI for Tulare County. Even if future development was affordable, such development may not provide the same amount of affordable housing and, thus, would meet the County's need for affordable housing to a lesser extent.

Architectural Coating	81,577	27,192	0.00	0.00	1,987

5.6. Dust Mitigation

5.6.1. Construction Earthmoving Activities

Phase Name	Material Imported (cy)	Material Exported (cy)	Acres Graded (acres)	Material Demolished (sq. ft.)	Acres Paved (acres)
Site Preparation	—	—	4.50	0.00	—
Grading	—	—	6.00	0.00	—
Paving	0.00	0.00	0.00	0.00	0.76

5.6.2. Construction Earthmoving Control Strategies

Non-applicable. No control strategies activated by user.

5.7. Construction Paving

Land Use	Area Paved (acres)	% Asphalt
Apartments Low Rise	—	0%
Parking Lot	0.76	100%

5.8. Construction Electricity Consumption and Emissions Factors

kWh per Year and Emission Factor (lb/MWh)

Year	kWh per Year	CO2	CH4	N2O
2026	0.00	453	0.03	< 0.005
2027	0.00	453	0.03	< 0.005

5.9. Operational Mobile Sources

5.9.1. Unmitigated

Land Use Type	Trips/Weekday	Trips/Saturday	Trips/Sunday	Trips/Year	VMT/Weekday	VMT/Saturday	VMT/Sunday	VMT/Year
Apartments Low Rise	307	342	264	111,734	3,112	3,461	2,670	1,131,148
Parking Lot	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

5.10. Operational Area Sources

5.10.1. Hearths

5.10.1.1. Unmitigated

Hearth Type	Unmitigated (number)
Apartments Low Rise	—
Wood Fireplaces	0
Gas Fireplaces	0
Propane Fireplaces	0
Electric Fireplaces	0
No Fireplaces	42
Conventional Wood Stoves	0
Catalytic Wood Stoves	0
Non-Catalytic Wood Stoves	0
Pellet Wood Stoves	0

5.10.2. Architectural Coatings

Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
81577.125	27,192	0.00	0.00	1,987

5.10.3. Landscape Equipment

Season	Unit	Value
Snow Days	day/yr	0.00
Summer Days	day/yr	180

5.11. Operational Energy Consumption

5.11.1. Unmitigated

Electricity (kWh/yr) and CO2 and CH4 and N2O and Natural Gas (kBTU/yr)

Land Use	Electricity (kWh/yr)	CO2	CH4	N2O	Natural Gas (kBTU/yr)
Apartments Low Rise	193,617	453	0.0330	0.0040	756,004
Parking Lot	29,014	453	0.0330	0.0040	0.00

5.12. Operational Water and Wastewater Consumption

5.12.1. Unmitigated

Land Use	Indoor Water (gal/year)	Outdoor Water (gal/year)
Apartments Low Rise	1,787,631	676,495
Parking Lot	0.00	0.00

5.13. Operational Waste Generation

5.13.1. Unmitigated

Land Use	Waste (ton/year)	Cogeneration (kWh/year)
Apartments Low Rise	31.1	—
Parking Lot	0.00	—

5.14. Operational Refrigeration and Air Conditioning Equipment

5.14.1. Unmitigated

Land Use Type	Equipment Type	Refrigerant	GWP	Quantity (kg)	Operations Leak Rate	Service Leak Rate	Times Serviced
Apartments Low Rise	Average room A/C & Other residential A/C and heat pumps	R-410A	2,088	< 0.005	2.50	2.50	10.0
Apartments Low Rise	Household refrigerators and/or freezers	R-134a	1,430	0.12	0.60	0.00	1.00

5.15. Operational Off-Road Equipment

5.15.1. Unmitigated

Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

Equipment Type	Fuel Type	Number per Day	Hours per Day	Hours per Year	Horsepower	Load Factor

5.16.2. Process Boilers

Equipment Type	Fuel Type	Number	Boiler Rating (MMBtu/hr)	Daily Heat Input (MMBtu/day)	Annual Heat Input (MMBtu/yr)

5.17. User Defined

Equipment Type	Fuel Type

5.18. Vegetation

5.18.1. Land Use Change

5.18.1.1. Unmitigated

Vegetation Land Use Type	Vegetation Soil Type	Initial Acres	Final Acres

5.18.1. Biomass Cover Type

5.18.1.1. Unmitigated

Biomass Cover Type	Initial Acres	Final Acres

5.18.2. Sequestration

5.18.2.1. Unmitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

8. User Changes to Default Data

Screen	Justification
Land Use	Building square footage and acreage adjusted to represent project-specific information.
Construction: Construction Phases	Based on typical construction practices, architectural coating assumed to start two weeks after the start of building construction and last for the same number of days. Phase timing is based on the project-specific construction timing provided by the applicant. Demolition not required for the proposed project.
Operations: Hearths	Based on applicant provided information, all 42 units would not include fireplaces.

I. SUMMARY AND CONCLUSIONS

KCE Matrix, Inc. (KCE Matrix) has been retained by Pacific West Communities, Inc. (referred to as "the client" and/or "the user" in this report) to conduct a Phase I Environmental Site Assessment (ESA) in accordance with the American Society of Testing and Materials (ASTM) standard practice E1527-21 for the property consisting of vacant land that has the Assessor's Parcel Number (APN) of 111-290-015-000, Farmersville, California (referred to as "the subject property" in this report).

The following summarizes the findings of this Phase I ESA:

- The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Avenue, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed from the entire western property line along Farmersville Road and from vacant land located along the southern property line.

- Based on the historic information obtained during this investigation (including research of Sanborn Maps, Aerial Photographs, regulatory records and city directories), the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. On December 20, 2025, a representative of KCE Matrix conducted site inspection for the subject property and confirmed that the property currently consists of vacant unoccupied land with no structures and has a dirt surface.

- KCE Matrix previously performed a Phase I ESA for the subject property from November through December of 2022 and identified one REC consisting of the historic use of the property for agricultural purposes from at least approximately 1952 through 1984. Subsequently, and based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2023, the subsurface soil at the subject property (former agricultural land use area) had not been impacted by OCPs, Arsenic and Lead; and therefore, had not been impacted by historic or past agricultural land use as may be related to pesticides. Based on these results, KCE Matrix no longer considered the past agricultural use of the subject property as a REC. Furthermore,

based on the results of the assessment work performed which included soil-vapor assessment work on the northwestern and southwestern most portions of the subject property, KCE Matrix also concluded that a Vapor Encroachment Condition (VEC) did not exist for the subject property, either originating from the subject site or immediate site vicinity as related to agricultural usage or related to auto repair facilities or petroleum storage and use at nearby properties.

- The environmental disclosure report obtained by KCE Matrix from EDR presents information with regard to other sites in the immediate and general site vicinity of the subject property. Based on review of the report as provided by EDR, several other sites were identified as being located in the general vicinity of the subject property. Two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular product. One other site identified as being located in the general vicinity of the subject property was listed on the RCRA NONGEN / NLR database. This facility has been identified as a non-generator with no reported violations. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property.

- Based on the Vapor Encroachment Screen (VES) conducted during this investigation, a Vapor Encroachment Condition (VEC) originating from the subject property was not identified. Furthermore, based on the research conducted during this investigation, a VEC originating from other nearby sites in the vicinity for the subject property was not identified.

- KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west.

The ASTM standard practice E1527-21 defines the following terms:

Recognized Environmental Condition (REC) as "(1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances

or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment".

Historical Recognized Environmental Condition (HREC) as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls". A historical recognized environmental condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC) as "a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls".

De Minimis Condition as "a condition related to a release that generally does not present a threat to human health or the environment that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies".

KCE Matrix has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-21 of the property consisting of vacant land with the APN of 111-290-015-000, Farmersville, California, the subject property. Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no RECs, CRECs or significant data gaps in connection with the subject property.

In addition, this assessment has not revealed any HRECs or any "De Minimis" Conditions in connection with the subject property.

II. INTRODUCTION

A. Purpose

This report presents the results of a Phase I ESA conducted by KCE Matrix for the subject property. The purpose of this investigation is to research and report existing environmental conditions for the subject property based on the American Society of Testing and Materials (ASTM) standard practice E1527-21 and to document compliance with 24 CFR §58.5(i)(2) or §50.3(i). Performing a Phase I ESA according to the ASTM Standard E1527-21 is intended to permit a user to satisfy one of the requirements in qualifying for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (the "*landowner liability protections*," or "*LLPs*"). This practice constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice".

B. Detailed Scope-of-Services

The scope of services performed during this Phase I ESA project includes:

1. Collecting available information concerning the property as it pertains to:
   a. Past land use
   b. Past owners
   c. Location of buried storage tanks, hazardous waste storage, wastewater treatment facilities and/or on-site landfills, etc.
   d. Types of chemicals used on site, past and present
   e. Geologic and hydrogeologic features
   f. Past geotechnical investigations (if available)
   g. Other data pertinent to the specific site
2. Conducting a site visit to:
   a. Identify vegetative features
   b. Locate surface waters
   c. Assess physical features
   d. Observe adjacent land use
   e. Gather evidence of indiscriminate and/or illegal waste disposal
3. Conducting a review of records maintained by regulatory agencies as follows:
   a. Reviewing regulatory files regarding the property in question
   b. Contacting appropriate regulatory personnel
4. Conducting a Vapor Encroachment Screen.
5. Preparing the Phase I Environmental Site Assessment Report, summarizing our findings and inclusive of supporting documentation.

C. Significant Assumptions

No significant assumptions were made during the course of this investigation.

D. Limitations and Exceptions

As defined by the ASTM Standard E1527-21, the "Client" and/or "User" understands that no amount of environmental site assessment can "wholly eliminate uncertainty regarding the potential for recognized environmental conditions" to exist in connection with the subject property. Performance of a Phase I ESA in accordance with the ASTM Standard E1527-21 is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions to exist in connection with the subject property, and the ASTM standard practice recognizes these reasonable limits of time and cost.

This type of ESA does not include air, soil or water sampling; or sampling of building materials. Site-specific conditions such as soil deposits and rock formations may vary in thickness, lithology, saturation strength, and other properties across any site beyond what available documentation indicates. Therefore, it is possible that undocumented or concealed improvements or alterations to

the property could exist beyond the inquiry of the activities conducted during this site assessment. In addition, environmental changes, either naturally occurring or artificially induced, may cause changes or alterations (which can be significant) to the property as compared to the conditions found at the time that this assessment was conducted.

Based on the best available investigative technologies, no amount of assessment can guarantee that the subject property does not contain contaminants or hazardous substances. The activities conducted during this limited investigation cannot identify all potential concerns for the subject property, and do not eliminate the possibility that the subject property is completely free of environmental concerns.

KCE Matrix has analyzed and evaluated the information collected during this investigation using what we believe to be the currently applicable assessment and engineering techniques and principles. KCE Matrix assumes no liability from other parties involved in losses sustained as a result of decisions made based on interpretations of this report. KCE Matrix makes no warranty, either expressed or implied, regarding the work conducted, except that our services were performed in accordance with the generally accepted professional principles and practices existing for such work.

Extensive information regarding the historic use and occupancy of the subject property was obtained during this investigation, dating from as early as the late 1930s and through the present. As presented in this report, the historic use information was obtained by reviewing standard historical resources (including Sanborn Maps, Aerial Photographs, regulatory records and city directories). Based on the fact that the historic information sources were not available on five-year continuous intervals through all years, this matter can be interpreted or considered as a "data failure" based on Section 8.3.6 of the ASTM E1527-21 Standard. However, the historic information gathered covered numerous years and in sum, presents a detailed history of the subject property. As such, KCE Matrix does not consider this matter as a "data failure" and it does not impact the conclusions presented in this Phase I ESA report.

There are no "significant data gaps" or other "data gaps" to report during this investigation. There are no "data failures" to report during this investigation.

E. Special Terms and Conditions

This report and all information obtained during this site assessment are considered confidential and will not be released without written permission by the owner of the subject property, the owner authorized entity conducting this assessment, or as required by law. The owner of the subject property is typically responsible for mitigation of contamination, corrective or remedial action, and disclosure of any information related to environmental issues that may or may not be discovered during this site assessment.

F. User Reliance

This report was prepared for the exclusive use of the client and/or user. No other person or entity is entitled to rely upon this report without the specific written authorization of KCE Matrix. Any such reliance by any third party is at the sole risk of said third party, and such reliance is subject to the same limitations, terms and conditions as the original contract with the client. KCE Matrix specifically disclaims any responsibility for any unauthorized use of this report.

III. SITE DESCRIPTION

A. Location and Description

The subject property is located on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Avenue, in Farmersville, California. A Location Map, Site Plan, and Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively.

B. Site and Vicinity General Characteristics

The subject property is located in a commercial/retail and residential area. The subject property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed from the entire western property line along Farmersville Road and from vacant land located along the southern property line.

C. Current Use of the Property

The subject property currently consists of vacant unoccupied land with no structures and has a dirt surface.

D. Description of Structures and Other Improvements

The subject property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed from the entire

western property line along Farmersville Road and from the vacant land located along the southern property line.

E. Current Uses of the Adjoining Properties

The adjoining properties are comprised of the following:

- North: Residential properties, an auto repair workshop/facility, Dillon Avenue and residential property.
- East: Residential properties and properties consisting of vacant land.
- South: Vacant land, agricultural land, a commercial/retail property (Rite Aid Store), residential property and East Walnut Avenue.
- West: Farmersville Road, commercial property, an auto repair facility, a public storage facility and residential properties along with residential streets.

IV. USER PROVIDED INFORMATION

A user questionnaire was completed by the client and was provided to KCE Matrix during this investigation. A copy of the completed user questionnaire is presented in Appendix E of this report.

A. Title Records

The client provided KCE Matrix with a copy of a Preliminary Title Report for the subject property as prepared by First American Title Company, dated November 20, 2025. Based on review of the title report for the subject property, no environmental liens and/or Activity and Use Limitations (AUL's), which indicate a past or present release of a hazardous substance or petroleum products, were presented or recorded. A copy of the title report as prepared by First American Title Company dated November 20, 2025 is presented in Appendix E.

B. Environmental Liens or Activity and Use Limitations

The user reported that he is not aware of any environmental cleanup liens that are filed or recorded against the property under federal, tribal, state or local law. The user also reported that he is not aware of any Activity and Use Limitations (AUL's) that are filed or recorded against the property.

C. Specialized Knowledge

The user did not report any specialized knowledge related to the property or to nearby properties.

D. Commonly Known or Reasonably Ascertainable Information

The user did not report any commonly known or reasonably ascertainable information related to the property.

E. Valuation Reduction for Environmental Issues

The user reported that the purchase price of the subject property reasonably reflects the fair market value of the property. The user did not report any other information with regard to the value of the subject property based on environmental issues.

F. Owner, Property Manager, and Occupant Information

The user identified Ms. Niki Slattery as a site contact for the subject property. The user also listed "Pacific West Communities, Inc." as a party who will rely on the Phase I report. The user did not provide any other information regarding the ownership, management or occupancy of the subject property.

G. Reason for Performing Phase I

This Phase I ESA is being performed for the client as part of a due diligence investigation of the subject site for construction loan purposes.

H. Vapor Encroachment

The user reported that the site consists of vacant land and will be developed with the construction of multi-family affordable housing apartments that will have slab-on-grade floors. The user reported that the future structure(s) will use hot air circulation as the heating system type and electricity as the type of fuel energy. The user also reported that neither a gas station nor a dry cleaner operates or will operate on site.

I. Other

The user did not report any other knowledge or experience for the subject property with regard to environmental condition.

V. RECORDS REVIEW

A. Standard Environmental Record Sources

KCE Matrix retained Environmental Data Resources, Inc. (EDR) to conduct a search of government and regulatory databases in an attempt to locate and obtain information about the subject site and other sites in the vicinity of the subject property that may affect the environmental quality of the property. The environmental disclosure report prepared by EDR provides a summary

of the various databases searched and is presented in Appendix B of this report. The database research presents summaries for the subject site and selected adjoining properties as follows:

A1. Subject Site

The target property was not listed in any of the databases searched by EDR.

A2. Site Vicinity

With regard to the summary report prepared by EDR, KCE Matrix has prepared the following table listing other sites located in the general vicinity of the subject property up to a reported search distance of approximately 650 feet. This summary table includes the site names, the reported distances from the subject property, as well as a brief summary of the information reported by the databases searched.

Facility Name	Address	Dist. (ft)	Database	Regulatory History and/or Reported Impact and Current Status
Ral Copping	28880 Rd 164	4 SSW	HIST UST	Reported one 260-gallon UST used for regular MV fuel.
Ralph Copping	28880 Road 164	4 SSW	HIST UST	Reported one 260-gallon UST used for regular product.
T Young Diesel Electric	29022 Road 164	127 NNW	RCRA NonGen / NLR	Classified the facility as not being a generator of Federal RCRA waste. No violations were reported.
Claudes Buggies Inc	28813 Farmersville Blvd	593 SSW	HIST UST	Reported one 1,500-gallon UST installed in 1977 and used for regular MV fuel.
Claudes Buggies Inc	28813 Farmersville Blvd	593 SSW	SWEEPS UST	Reported one 1,500-gallon UST used for MV fuel. Reported the status as "Active" as of April 20, 1988.
CB Performance Products Inc	1715 N Farmersville Blvd	652 SW	CUPA Listings	Reported the facility ID number and classified the facility as a small generator.

In addition, the EDR databases searched identified one unmapped site as follows:

Name	Address
City of Farmersville Sewerage Trmt Plt	Farmersville & Outside Creek Roads

The disclosure report prepared by EDR identified the one unmapped site as an Orphan site. Based on site vicinity reconnaissance up to an approximate search distance of 0.25-mile from the subject site and based on the address and information provided in the Orphan Site Summary as prepared by EDR, the one unmapped site was not observed to be located in the immediate vicinity of the subject property and appears to be located in excess of 0.25-mile from the subject site.

B. Additional Environmental Record Sources

Regional Water Quality Control Board

On December 1, 2025, KCE Matrix submitted a written request to the Regional Water Quality Control Board (RWQCB), Central Valley Region – File Review Department; for information regarding Underground Storage Tanks (USTs), Hazardous Materials (HAZMAT) and/or associated environmental assessment or remediation for the subject property. Based on an email response issued by the RWQCB to KCE Matrix dated December 11, 2025, this agency does not maintain any records for the subject property. A copy of the written request made by KCE Matrix dated December 1, 2025, and a copy of the RWQCB response email dated December 11, 2025, are presented in Appendix C-1.

KCE Matrix also researched the records maintained by the State Water Resources Control Board (SWRCB) – Geotracker Database online for information regarding Underground Storage Tanks (USTs) and hazardous materials for the subject property. This database typically contains records that are also maintained by the various local RWQCB's. The results of this online research indicated that the SWRCB-RWQCB does not maintain such records for the subject property.

Department of Toxic Substances Control

On December 1, 2025, KCE Matrix submitted a written request to the California State Department of Toxic Substances Control (DTSC) – Sacramento Regional Office, for information regarding Underground Storage Tanks (USTs), Hazardous Materials (HAZMAT) and/or associated environmental assessment or remediation for the subject property. Based on a letter response issued by the DTSC to KCE Matrix dated December 1, 2025, this agency was unable to provide information about the subject site based on APNs because their databases do not include APN information. In addition, the DTSC advised KCE Matrix to search for the requested records and information using the DTSC Envirostor Database available online. Copies of the written request made by KCE Matrix and the DTSC letter response both dated December 1, 2025, are presented in Appendix C-2.

KCE Matrix also researched the records maintained by the DTSC Envirostor Database online for information regarding environmental assessment and remediation matters for the subject property. The results of this online research indicated that the DTSC Envirostor Database does not maintain such records for the subject property.

In addition, KCE Matrix researched the records maintained by the DTSC Hazardous Waste Tracking System database online for information regarding hazardous wastes generated and/or stored at the subject property. The results of this online research indicated that the DTSC Hazardous Waste Tracking System online database does not maintain such records for the subject property.

Tulare County – Health and Human Services Agency

On December 1, 2025, KCE Matrix submitted a written request to the Tulare County – Health and Human Services Agency (TC-HHSA); for information regarding Underground Storage Tanks (USTs), Hazardous Materials (HAZMAT) and/or associated environmental assessment or remediation for the subject property. Based on an email response issued by the TC-HHSA dated December 9, 2025, this agency does not maintain any records for the subject property. A copy of the written request submitted by KCE Matrix dated December 1, 2025, and a copy of the TC-HHSA email response dated December 9, 2025, are presented in Appendix C-3.

City of Farmersville Clerk's Office – (Fire Department and Building Department)

On December 1, 2025, KCE Matrix submitted an online public record request to the City of Farmersville – City Clerk's Office; regarding any records that may be maintained by the City Departments, including the Fire Department, particularly as may be related to USTs and hazardous materials; and the Building Department for site history, including historic and current permit applications, certificates of occupancy and violations. As of the date of this report, a response to this record request has not been received by KCE Matrix.

Previously, on March 4, 2024, KCE Matrix contacted the City of Farmersville – City Clerk's Office; regarding any records that may be maintained by the City Departments, including the Fire Department, particularly as may be related to USTs and hazardous materials; and the Building Department for site history, including historic and current permit applications, certificates of occupancy and violations. On March 4, 2024, KCE Matrix received records as maintained by the City Clerk's Office. The records consisted of documentation dated in 2023 related to a future multi-family affordable housing development project at the subject property. A copy of the online request submitted by KCE Matrix on December 1, 2025, a copy of the written request made by KCE Matrix dated March 4, 2024 along with copies of the records as maintained by the City Clerk's Office are presented in Appendix C-4.

California Geologic Energy Management Division

KCE Matrix researched the records maintained by the California Geologic Energy Management (CalGEM) Division (formerly known as the Division of Oil, Gas, and Geothermal Resources (DOGGR)) Database online for information regarding oil and natural gas wells for the subject property and the general vicinity. The results of this online research did not indicate references to any oil and/or natural gas wells as being located on the subject property.

California Environmental Protection Agency

KCE Matrix researched the records maintained by the California Environmental Protection Agency (CalEPA) Database online for information regarding environmentally regulated sites and facilities. The results of this online research indicated that the CalEPA Database does not maintain such records for the subject property.

C. Physical Setting Source(s)

C1. Topography

The site has an approximate elevation of 365 feet above mean sea level. A Location Map that shows the physical setting of the subject property and vicinity is presented in Appendix A, as Figure 1.

C2. Geology/Hydrogeology

KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west. The groundwater information obtained from the SWRCB Geotracker Database for the general site vicinity is presented in Appendix C-5.

The surface of the subject property is essentially flat and has an approximate elevation of 61 feet above mean sea level. With regard to the surrounding area, the general topographic gradient is reported to have a gradual slope down to the west based on information obtained from EDR. General subsurface soil and topographic gradient information for the site and vicinity is presented in the Physical Setting Source Summary Report prepared by EDR in Appendix B (pages A-1 through A-6).

The National Wetlands Inventory (NWI) was established by the United States (U.S.) Fish and Wildlife Service (Service) in 1974 to conduct a nationwide inventory of U.S. wetlands to provide its biologists and others with information on the distribution of wetlands to aid in wetland conservation efforts. Based on review of information obtained from the NWI as maintained by the Service online, the subject property does not appear to be a designated wetland area. The NWI map identifies the following wetland(s) as the closest designated wetland area(s) in the vicinity of the subject property:

Wetland	Distance	
Cameron Creek	0.28-mile	To the northwest of the subject site
Creek	0.34-mile	To the southeast of the subject site
Deep Creek	0.50-mile	To the southeast of the subject site
Tulare Irrigation District Canal	0.55-mile	To the northwest of the subject site
Davis Ditch	0.88-mile	To the east of the subject site

The NWI wetland map for the vicinity of the subject property is presented in Appendix C-6. In addition, references to the nearest wetland areas are presented in the maps presented in the Executive Summary of the EDR report presented in Appendix B.

The Federal Emergency Management Agency (FEMA) has defined geographic areas as Flood Zones according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area. Based on review of information obtained from the FEMA's National Flood Hazard Layer (NFHL) Viewer online, the subject property is located in Zone X, an area of 0.2 percent annual chance flood hazard. The NFHL map for the general vicinity of the subject property is presented in Appendix C-7.

D. Historical Use Information - Subject Property

D1. Building Records

On December 1, 2025, KCE Matrix submitted an online public record request to the City of Farmersville – City Clerk's Office; regarding any records that may be maintained by the City Departments, including the Building Department for site history, including historic and current permit applications, certificates of occupancy and violations. As of the date of this report, a response to this record request has not been received by KCE Matrix.

Previously, on March 4, 2024, KCE Matrix contacted the City of Farmersville – City Clerk's Office; regarding any records that may be maintained by the City Departments, including the Fire Department, particularly as may be related to USTs and hazardous materials; and the Building Department for site history, including historic and current permit applications, certificates of occupancy and violations. On March 4, 2024, KCE Matrix received records as maintained by the City Clerk's Office. The records consisted of documentation dated in 2023 related to a future multi-family affordable housing development project at the subject property. A copy of the online request submitted by KCE Matrix on December 1, 2025, a copy of the written request made by KCE Matrix dated March 4, 2024 along with copies of the records as maintained by the City Clerk's Office are presented in Appendix C-4.

D2. Historic Maps

KCE Matrix contacted EDR in an effort to obtain historic Sanborn® Maps of the subject site and vicinity. Based on a search of the EDR historic map collection, no such historic maps were maintained by EDR for the subject property and immediate vicinity. A copy of the Sanborn® Map Report dated December 1, 2025 indicating that there is no coverage for the subject property and vicinity is presented in Appendix D-1.

D3. Aerial Photographs

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Aerial Photographs of the subject site and vicinity. Based on the Aerial Photographs for the subject property dated from 1937

through 2022 as obtained by KCE Matrix from EDR, the subject property consisted of vacant land with no structures between 1937 and 2022. The site appears to have been used as agricultural land between approximately 1952 and 1984. Between 1994 and 2022, a private road was located in the central portion of the property that connected Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. Copies of aerial photographs dated 1937, 1952, 1956, 1961, 1969, 1977, 1984, 1994, 2006, 2010, 2014, 2018 and 2022 for the subject property and general site vicinity as obtained by KCE Matrix from EDR are presented in Appendix D-2.

D4. Historical Topographic Maps

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Topographic Maps of the subject site and vicinity. Based on the historic and/or recent Topographic Maps dated 1926 through 2021 as obtained by KCE Matrix from EDR, the property appears to have been vacant land with no structures between 1926 and 1969. Detailed information regarding the subject property was not provided on the Topographic Maps dated 2012 through 2021. Between 2018 and 2021, a private road was located in the central portion of the property that connected Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. Copies of the Historical Topographic Maps dated 1926, 1950, 1952, 1969, 2012, 2015, 2018 and 2021 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-3.

D5. City Directory Abstract

The target property was not listed in any of the databases searched by EDR. A copy of the City Directory Abstract report obtained from EDR and as reviewed by KCE Matrix is presented in Appendix D-4.

D6. Recorded Land Title Records

The client provided KCE Matrix with a copy of a Preliminary Title Report for the subject property as prepared by First American Title Company, dated November 20, 2025. Based on review of the title report for the subject property, no environmental liens and/or Activity and Use Limitations (AUL's), which indicate a past or present release of a hazardous substance or petroleum products, were presented or recorded. A copy of the title report as prepared by First American Title Company dated November 20, 2025 is presented in Appendix E.

E. Historical Use Information - Adjoining Properties

E1. Historic Maps

KCE Matrix contacted EDR in an effort to obtain historic Sanborn® Maps of the subject site and vicinity. Based on a search of the EDR historic map collection, no such historic maps were maintained by EDR for the subject property and immediate vicinity. A copy of the Sanborn® Map Report dated December 1, 2025 indicating that there is no coverage for the subject property and vicinity is presented in Appendix D-1.

E2. Aerial Photographs

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Aerial Photographs of the subject site and vicinity. Based on the Aerial Photographs for the subject property and vicinity dated from 1937 through 2022 as obtained by KCE Matrix from EDR, the general vicinity of the subject property appears to have been comprised of essentially vacant and/or agricultural land in 1937. Between 1952 and 1984, gradual development of essentially residential properties is evident in the general vicinity to the north of the subject property; and the remaining areas in the vicinity consisted of vacant and/or agricultural land. In 1994, further development of commercial properties is evident in the general vicinity to the west of the subject property. Between 2006 and 2022, the general vicinity of the subject property is developed with commercial and residential properties to the southwest and west and with residential properties to the north of the subject property; with some residential development to the southeast of the subject site. The remaining areas in the vicinity consist of essentially vacant properties. Copies of aerial photographs dated 1937, 1952, 1956, 1961, 1969, 1977, 1984, 1994, 2006, 2010, 2014, 2018 and 2022 for the subject property and general site vicinity as obtained by KCE Matrix from EDR are presented in Appendix D-2.

E3. Historical Topographic Maps

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Topographic Maps of the subject site and vicinity. Based on the historic and/or recent Topographic Maps for the subject property and the general vicinity dated from 1926 through 2021 as obtained by KCE Matrix from EDR, the general vicinity of the subject property appears to have been essentially vacant land in 1926, and vacant and/or agricultural land with dispersed residential properties, particularly in the areas to the west of the site between 1952 and 1969. In 2012, gradual development of properties is evident in the general vicinity, particularly in areas to the west and southwest of the subject property, and the vicinity elsewhere remains essentially as vacant land. Copies of the Historical Topographic Maps dated 1926, 1950, 1952, 1969, 2012, 2015, 2018 and 2021 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-3.

E4. City Directory Abstract

Based on review of the City Directory Abstract report obtained by KCE Matrix from EDR; additional information with regard to addresses in the site vicinity is presented. Information with regard to listings that are or were located in the immediate vicinity of the subject property is presented on pages A2 through A19 of the referenced EDR City Directory Abstract report. A copy of the City Directory Abstract report obtained from EDR and reviewed by KCE Matrix is presented in Appendix D-4.

VI. SITE RECONNAISSANCE

A. Non-ASTM Scope Considerations

Site reconnaissance is limited to the areas accessible and inspected during this investigation. There were no buildings or structures observed on site during this investigation. As such, KCE Matrix did not observe any suspect Asbestos Containing Material (ACM) or Lead-Based Paint (LBP) in association with the subject property. No sampling or analysis of any building materials for asbestos content or paint for lead content was conducted during this assessment.

Exposure to asbestos is a health concern when building materials are friable. In working near, repairing or replacing materials such as these, a licensed asbestos abatement contractor, or personnel specially trained in working with or near asbestos should be employed. With regard to LBP, exposure to lead from LBP is a health concern when lead dust is created and can be inhaled or LBP chips are accessible for ingestion. In working near, assessing, repairing or replacing materials that contain LBP, certified lead professionals specially trained in working with or near LBP should be employed.

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The United States Environmental Protection Agency (EPA) and the California EPA have prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. It is important to note that the EPA has found homes with elevated levels of radon in all three designated zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. The map divides the country into three Radon Zones as follows:

- Zone 1: Highest Potential - Counties that have a predicted average indoor radon screening level greater than 4 picocuries per liter (pCi/L), the US EPA Action Limit.

- Zone 2: Moderate Potential - Counties that have a predicted average indoor radon screening level between 2 and 4 pCi/L.

- Zone 3: Low Potential - Counties that have a predicted average indoor radon screening level less than 2 pCi/L.

Radon sampling was not conducted as part of this assessment. Review of the California EPA Map of Radon Zones places the subject property in Zone 2, where average predicted radon levels are between 2.0 pCi/L and 4 pCi/L. Furthermore, the subject property was also reported as being located in Radon Zone 2 by EDR. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

B. General Site Setting

The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Avenue, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed from the entire western property line along Farmersville Road and from vacant land located along the southern property line.

A Location Map, a Site Plan and a Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively. During site reconnaissance, KCE Matrix also obtained photographs of the subject property and vicinity. Selected photographs are presented in Appendix F.

C. Observations

On December 20, 2025, a representative of KCE Matrix inspected the subject property and recorded the following observations:

	Description	Comments
1	Industrial Use	None observed
2	Gas Station	None observed
3	Motor Repair Facility	None observed
4	Commercial Printing Facility	None observed
5	Dry Cleaning	None observed
6	Photo Development Laboratory	None observed
7	Junkyard	None observed
8	Landfill	None observed
9	Waste Treatment	None observed
10	Storage Facility	None observed
11	Disposal Facility	None observed
12	Processing Facility	None observed
13	Recycling Facility	None observed
14	Batteries	None observed
15	Pesticides or agricultural activity	None observed
16	Paints	None observed
17	HazMat storage or use	None observed
18	Potential HazMat storage or use	None observed
19	Dumping or Improper Disposal of HazMat	None observed
20	Drums and Other Containers	None observed
21	PCBs, Transformers, Capacitors or Hydraulic equipment, other equipment	None observed
22	Chemical Products	None observed
23	Asbestos, Age of Building, Blueprints	None observed. The site consists of vacant land with no structures and has a dirt surface

	Description	Comments
24	Paint Condition, LBP	None observed. The site consists of vacant land with no structures and has a dirt surface
25	Building Demolition or Renovation	None observed
26	Fill Dirt From Other Locations	None observed
27	Stained Soil or Spills	None observed
28	Oil or Gas Wells	None observed
29	Underground Storage Tanks (USTs)	None observed
30	Above-ground Storage Tanks (ASTs)	None observed
31	Hydraulic Hoists	None observed
32	Clarifier/Wastewater Interceptor	None observed
33	Subsurface or Underground Pipes	None observed. The site consists of vacant land with no structures and has a dirt surface
34	Above Ground Pipes	None observed
35	Flooring, Drains or Walls Emitting Foul Odors	None observed
36	Pits, Ponds, Lagoons or Cesspools	None observed
37	Distressed Vegetation	None observed
38	Pools of Liquid, Drains, Sumps, Stains, Septic Tanks	None observed
39	Environmental Liens	None observed
40	Government Notifications Regarding Environmental Violation	None observed
41	HazMat Inventory	None
42	Disclosure of Hazardous Substances or Petroleum Products	None observed
43	Previously Conducted Environmental Site Assessments	None observed
44	Wastewater Generation or Disposal	None observed
45	Water Supply System, Water Usage	None observed
46	Regulated Air Emissions	None observed
47	Heating/Cooling	None observed. The site consists of vacant land with no structures and has a dirt surface
48	Potable, Irrigation, or Monitoring Wells	None observed
49	Storm water drainage	Dirt surface
50	Odors	Not perceived
51	Solid Waste	None observed

D. Site Vicinity Reconnaissance

KCE Matrix conducted a brief inspection of the immediate vicinity of the subject property. The adjoining properties are comprised of the following:

- North: Residential properties, an auto repair workshop/facility, Dillon Avenue and residential property.
- East: Residential properties and properties consisting of vacant land.
- South: Vacant land, agricultural land, a commercial/retail property (Rite Aid Store), residential property and East Walnut Avenue.

- West: Farmersville Road, commercial property, an auto repair facility, a public storage facility and residential properties along with residential streets.

VII. INTERVIEWS

A. Interview with Owner

KCE Matrix did not conduct an interview with the current owner of the subject property during this investigation.

B. Interview with Site Manager

The subject property currently consists of vacant land with no structures and is not occupied. Prior to site inspection, KCE Matrix notified the client with regard to the date and time of the inspection. However, a property site manager was not available for an interview at the time of site inspection. As such, KCE Matrix did not conduct an interview with the current manager of the property during this investigation.

C. Interviews with Occupants

The subject property currently consists of vacant land with no structures and is not occupied. Prior to site inspection, KCE Matrix notified the client with regard to the date and time of the inspection. Based on the fact that the site consists of vacant land with no occupants, KCE Matrix did not conduct an interview with any site occupant(s) of the property during this investigation.

D. Interviews with Local Government Officials

KCE Matrix did not interview any local government officials regarding the subject property during this investigation.

E. Interviews with Others

In December of 2025, KCE Matrix interviewed a representative of the client who provided KCE Matrix with the following Environmental Site Assessment (ESA) reports regarding the subject site:

- Phase I – ESA Report designated as (KCE-2022-454E-R1) dated December 6, 2022 as prepared by KCE Matrix, Inc.
- Subsurface ESA Report designated as (KCE-2022-454E-R2) dated February 9, 2023 as prepared by KCE Matrix, Inc.

Based on the information contained in the Phase I – ESA report referenced above, KCE Matrix identified one Recognized Environmental Condition (REC), as follows:

- REC – Historic agricultural land use. The subject property appears to have been used as agricultural land from at least approximately 1952 through 1984.

In addition, based on the Vapor Encroachment Screen (VES) conducted during the Phase I investigation, a Vapor Encroachment Condition (VEC) originating from the subject property could not be ruled out. Furthermore, a VEC originating from other nearby sites in the vicinity for the subject property could not be ruled out.

Based on the Phase I ESA performed, KCE Matrix recommended that subsurface environmental assessment work be performed for the subject property to determine whether or not the property had been impacted by the potential usage of pesticides over an extended period of time, and to assess any potential impact from metals (such as Arsenic and Lead). KCE Matrix also recommended that the proposed subsurface assessment work be conducted in a manner so as to address potential vapor encroachment conditions.

KCE Matrix subsequently returned to the subject property between January 11 and January 20, 2023, to perform the recommended subsurface assessment work. Between January 11 and January 13, 2023, forty (40) subsurface exploratory soil borings (designated as EB-1 through EB-40) were drilled and sampled to a total depth of four feet below the ground surface (bgs) at the subject property, using hand-auger field drilling and sampling equipment. Groundwater was not encountered in the 40 exploratory borings during drilling and sampling work performed. A total of 80 soil samples were collected from the 40 exploratory borings at depths of two feet and four feet bgs for lithologic logging purposes. Forty (40) of the 80 soil samples collected at a depth of two feet were selected for laboratory analysis from the 40 exploratory borings. All 40 soil samples collected at a depth of two feet bgs from the 40 exploratory borings (designated as EB-1(2) through EB-40(2)) were analyzed for Organochlorine Pesticides (OCPs) by EPA method 8081A and for Arsenic and Lead by EPA method 6010B.

In addition, on January 19, 2023, ten single-stage soil vapor probes (designated as VP-1 through VP-10) were drilled and installed to a total depth of five feet bgs as measured from the ground surface. On January 20, 2023, KCE Matrix collected soil-gas samples from the 10 single-stage vapor probes (designated as VP-1 through VP-10). The soil-gas samples were collected as follows:

- Ten (10) soil-gas samples collected from the 10 single-stage vapor probes VP-1 through VP-10, at a depth of five feet bgs (samples designated as VP-1(5) through VP-10(5)); and one field duplicate soil-gas sample collected from vapor probe VP-4 (sample designated as VP-4 (5)DUP)

The 11 soil-gas samples (designated as samples VP-1(5) through VP-10(5) and VP-4(5)DUP) collected on January 20, 2023, were analyzed for Volatile Organic Compounds (VOCs) and Total Petroleum Hydrocarbons (TPH) – Gasoline Range Organics (GRO) by EPA method 8260B.

Based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2022 and the evaluation of the data, two of the 21 OCP constituents were detected at various concentrations in subsurface soil at depths of two feet bgs. The concentrations of one of these two

OCP constituents (4,4'-DDE) were below the RWQCB Tier 1 and Tier 2 ESLs. The concentrations of the one other OCP constituent (4,4'-DDE) were greater than the RWQCB Tier 1 ESL, but less than the Tier 2 and the RWQCB Direct Exposure Human Health Risk ESLs. Based on these results, KCE Matrix recommended no further subsurface soil assessment and/or remediation work in relation to OCPs for the subject site.

In addition, Arsenic was detected in only two of the 40 soil samples collected and analyzed. The concentrations of Arsenic detected were below the DTSC ambient screening level of 12 milligrams per Kilogram (mg/Kg). Based on these results, KCE Matrix recommended no further subsurface soil assessment and/or remediation work in relation to Arsenic for the subject site. Moreover, Lead was detected at various concentrations in the 40 soil samples collected and analyzed. The concentrations of Lead in all 40 soil samples were less than the RWQCB Tier 1 and Tier 2 ESLs. Based on these results, KCE Matrix recommended no further subsurface soil assessment and/or remediation work in relation to Lead for the subject site.

Based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2023 and the evaluation of the data, the results of soil-gas samples collected and analyzed indicated concentrations of the contaminants of concern that were less than the RWQCB ESLs. In addition, the analytical results of the soil samples collected during investigation indicated concentrations that were less than the RWQCB ESLs. Based on these results, the Vapor Encroachment Conditions for the subject property were adequately assessed and KCE Matrix recommended no further subsurface soil and/or soil-gas assessment and/or remediation for the subject site.

As such, the REC identified in the Phase I ESA report designated as (KCE-2022-454E-R1) dated December 6, 2022 as prepared by KCE Matrix, was adequately assessed and KCE Matrix no longer considered the historic or past agricultural land use over an extended period of time at the subject site as a REC. In addition and based on the results of the subsurface ESA performed, the potential Vapor Encroachment Condition reported in the Phase I ESA report designated as (KCE-2022-454E-R1) dated December 6, 2022 as prepared by KCE Matrix, was adequately assessed and KCE Matrix concluded that a Vapor Encroachment Condition did not exist at the subject property.

Copies of the Phase I ESA report prepared by KCE Matrix, designated as (KCE-2022-454E-R1) dated December 6, 2022, and the subsurface environmental site assessment report prepared by KCE Matrix designated as (KCE-2022-454E-R2) dated February 9, 2023 are both presented in Appendix E.

KCE Matrix did not conduct any other interviews regarding the subject property during this investigation.

VIII. VAPOR ENCROACHMENT SCREEN

During this investigation, KCE Matrix conducted a Vapor Encroachment Screen (VES) for the subject property based on the ASTM E2600-10 guideline. The goal of conducting a VES as

established by the ASTM, is to identify a potential Vapor Encroachment Condition (VEC) for the subject property, which is defined as the presence or likely presence of Chemicals of Concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject site. Detailed information with regard to the VES evaluation conducted, the methodology used, and the information for other sites located in the immediate vicinity of the subject property as provided to KCE Matrix by EDR is presented in a VES summary report presented in Appendix G of this report.

A. Subject Property - VES

Based on the research conducted during this investigation, the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site.

On December 20, 2025, a representative of KCE Matrix conducted site inspection for the subject property and confirmed that the property currently consists of vacant unoccupied land with no structures and has a dirt surface.

As noted elsewhere in this report, KCE Matrix previously performed a Phase I ESA for the subject property from November through December of 2022 and identified one REC consisting of the historic use of the property for agricultural purposes from at least approximately 1952 through 1984. Subsequently, KCE Matrix performed subsurface ESA work on the subject property. Based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2023, the subsurface soil at the property (former agricultural land use area) had not been impacted by OCPs, Arsenic and Lead; and therefore, had not been impacted by historic or past agricultural land use as may be related to pesticides. Based on these results, KCE Matrix no longer considered the past agricultural use of the subject property as a REC. Furthermore, based on the results of the subsurface assessment work performed, KCE Matrix also concluded that a Vapor Encroachment Condition (VEC) did not exist for the subject property, either originating from the subject site or immediate site vicinity. Copies of the Phase I ESA report prepared by KCE Matrix, designated as (KCE-2022-454E-R1) dated December 6, 2022, and the subsurface environmental site assessment report prepared by KCE Matrix designated as (KCE-2022-454E-R2) dated February 9, 2023 are both presented in Appendix E.

Since January of 2023, the subject property and immediate site vicinity have not been used for agricultural purposes and the site has remained as vacant land. Based on the site history of the subject property and the subsurface ESA work as described above, a VEC originating from the subject property is not identified.

B. Site Vicinity - VES

Based on the research conducted during this investigation for other sites located in the general vicinity of the subject property, several other sites were identified and/or evaluated during this VES. The evaluation of these other sites located closest to the subject property consists of the following:

Facility Name	Facility Address	Database
Ral Copping	28880 Rd 164	HIST UST
Ralph Copping	28880 Road 164	HIST UST
T Young Diesel Electric	29022 Road 164	RCRA NonGen / NLR
Claudes Buggies Inc	28813 Farmersville Blvd	SWEEPS UST, HIST UST
CB Performance Products Inc	1715 N Farmersville Blvd	CUPA Listings

Based on the review of the nearby sites as listed by EDR report, two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular fuel product. The two other sites identified as being located in the general vicinity of the subject property have been reported as a non-generator and as a small quantity generator with no violations.

As noted elsewhere in this report, KCE Matrix previously performed a Phase I ESA for the subject property from November through December of 2022 and identified one REC consisting of the historic use of the property for agricultural purposes from at least approximately 1952 through 1984. Subsequently, KCE Matrix performed subsurface ESA work on the subject property. Based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2023, the subsurface soil at the property (former agricultural land use area) had not been impacted by OCPs, Arsenic and Lead; and therefore, had not been impacted by historic or past agricultural land use as may be related to pesticides. Based on these results, KCE Matrix no longer considered the past agricultural use of the subject property as a REC.

Furthermore, based on the results of the assessment work performed which included soil-vapor assessment work on the northwestern and southwestern most portions of the subject property, KCE Matrix also concluded that a Vapor Encroachment Condition (VEC) did not exist for the subject property, either originating from the subject site or immediate site vicinity as related to agricultural usage or related to auto repair facilities or petroleum storage and use.

Copies of the Phase I ESA report prepared by KCE Matrix, designated as (KCE-2022-454E-R1) dated December 6, 2022, and the subsurface environmental site assessment report prepared by KCE Matrix designated as (KCE-2022-454E-R2) dated February 9, 2023 are both presented in Appendix E.

Based on the site history of the subject property and the relatively recent subsurface ESA work performed as described above, a VEC originating from the site vicinity for the subject property is not identified.

IX. FINDINGS

The following presents our findings based on the work performed during this Phase I ESA:

- The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Avenue, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed from the entire western property line along Farmersville Road and from vacant land located along the southern property line.

- Based on the historic information obtained during this investigation (including research of Sanborn Maps, Aerial Photographs, regulatory records and city directories), the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. On December 20, 2025, a representative of KCE Matrix conducted site inspection for the subject property and confirmed that the property currently consists of vacant unoccupied land with no structures and has a dirt surface.

- KCE Matrix previously performed a Phase I ESA for the subject property from November through December of 2022 and identified one REC consisting of the historic use of the property for agricultural purposes from at least approximately 1952 through 1984. Subsequently, and based on the subsurface environmental site assessment work performed by KCE Matrix in January of 2023, the subsurface soil at the subject property (former agricultural land use area) had not been impacted by OCPs, Arsenic and Lead; and therefore, had not been impacted by historic or past agricultural land use as may be related to pesticides. Based on these results, KCE Matrix no longer considered the past agricultural use of the subject property as a REC. Furthermore, based on the results of the assessment work performed which included soil-vapor assessment work on the northwestern and southwestern most portions of the subject property, KCE Matrix also concluded that a Vapor Encroachment Condition (VEC) did not exist for the subject property, either originating from the subject site or immediate site vicinity as related to agricultural usage or related to auto repair facilities or petroleum storage and use at nearby properties.

- The environmental disclosure report obtained by KCE Matrix from EDR presents information with regard to other sites in the immediate and general site vicinity of the subject property. Based on review of the report as provided by EDR, several other sites were identified as being located in the general vicinity of the subject property. Two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular product. One other site identified as being located in the general vicinity of the subject property was listed on the RCRA NONGEN / NLR database. This facility has been identified as a non-generator with no reported violations. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property.

- Based on the VES conducted during this investigation, a VEC originating from the subject property was not identified. Furthermore, based on the research conducted during this investigation, a VEC originating from other nearby sites in the vicinity for the subject property was not identified.

- KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the “Site Closure Summary” report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west.

X. SIGNATURE

KCE Matrix appreciates the opportunity to have provided services for this project. Should you have any questions regarding this report and the assessment work performed, please do not hesitate to contact our office at 818-559-5500.

Sincerely,

KCE Matrix, Inc.

Aram B. Kaloustian, P.E.
Project Manager

XI. QUALIFICATIONS

KCE Matrix declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Detailed information with regard to the qualifications of the personnel who have worked on this project is presented in Appendix H of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
RITE AID 6764 EPA ID:: CAR000270843	***1710 1710 N. FARMERS***	***SSW 1/8 - 1/4 (0.146 mi.)***	***D7***	***16***

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
DOLLAR TREE #03493	***1555 N FARMERSVILLE***	***SSW 1/8 - 1/4 (0.211 mi.)***	***E17***	***55***
EPA ID:: CAL000388066				

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/17/2025 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/14/2025 has revealed that there are 3 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that

there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

FARMERSVILLE MINI MA	1456 FARMERSVILLE BL	S 1/4 - 1/2 (0.268 mi.)	F23	207

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/02/2025 has revealed that there are 4 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 6 CUPA Listings sites within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2025
Date Data Arrived at EDR: 10/01/2025
Date Made Active in Reports: 10/28/2025
Number of Days to Update: 27

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2025

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/22/2025

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/02/2025

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/19/2025

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VACANT LAND
APN 111-290-015-000
FARMERSVILLE, CA 93292

TARGET PROPERTY COORDINATES

Latitude (North):	36.314985 - 36° 18' 53.95''
Longitude (West):	119.205813 - 119° 12' 20.93''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	301969.4
UTM Y (Meters):	4020942.8
Elevation:	365 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005762 EXETER, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

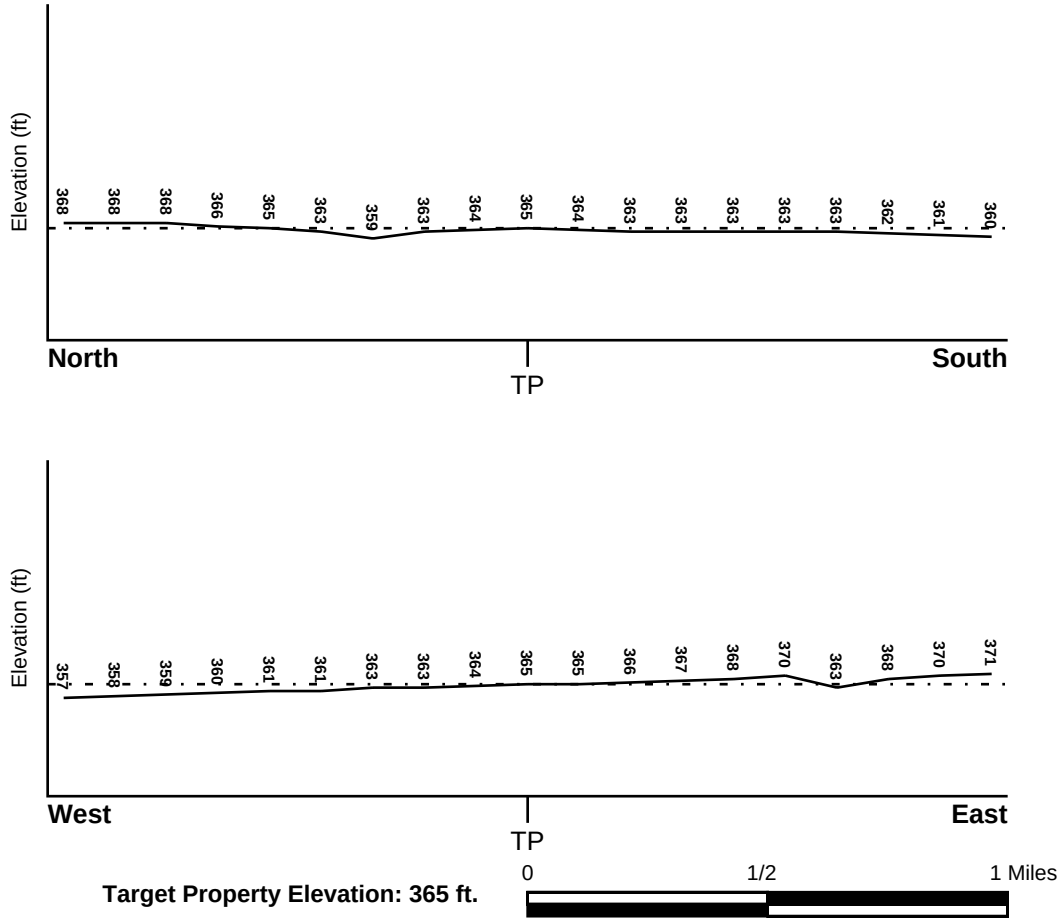
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06107C0954E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06107C0955E	FEMA FIRM Flood data
06107C0965E	FEMA FIRM Flood data
06107C0962E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EXETER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Nord

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
2	11 inches	38 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
3	38 inches	50 inches	stratified loamy coarse sand to coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	50 inches	72 inches	stratified sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Grangeville

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 8.4 Min: 6.6
2	16 inches	27 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	27 inches	66 inches	stratified loamy sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

REGIONAL WATER QUALITY CONTROL BOARD

Hagop Tatian

From: Hagop Tatian
Sent: Monday, December 1, 2025 9:20 AM
To: r5f-pra@waterboards.ca.gov
Subject: Public Record Request: (APN: 111-290-015-000), Farmersville, CA 93292
Attachments: Location Map.jpg

To: RWQCB – Central Valley Office

KCE Matrix would like to inquire if the RWQCB agency maintains any records and/or documentation with regard to Underground Storage Tanks (USTs), Hazardous Materials (HAZMAT) and/or associated environmental assessment or remediation documentation for the following property:

APN: 111-290-015-000
Farmersville, CA 93292
(See attached location map)

If the waterboard does maintain such records, please advise as to the necessary procedure to obtain such records from your office.

Should you have any questions or require additional information, please do not hesitate to contact our office at (818) 559 5500.

Thank you.

Sincerely,

Hagop Tatian

To: Hagop Tatian
Subject: Public Records Request Response - Central Valley Water Board; (APN: 111-290-015-000), Farmersville, CA 93292

Hello,

In response to your Public Records Request of 1 December 2025, no records were found on the following property(s):
APN: 111-290-015-000
Farmersville, CA 93292

The search was conducted with the GeoTracker database, available for public access at https://geotracker.waterboards.ca.gov/.
In addition to GeoTracker, the California Integrated Water Quality Systems (CIWQS) database was also used in the search, and is available for public access at http://www.waterboards.ca.gov/centralvalley/resources/data_databases/.
The California Storm Water Multiple Applications and Report Tracking System (Smarts) was also used in the search and is available for public access at http://smarts.waterboards.ca.gov.
If you have reason to believe that the Central Valley Water Board may have responsive records (contrary to this response), please let me know.

Thank you,

CALIFORNIA Water Boards

Public Records Request Number: 1-120125-03
Location(s): APN: 111-290-015-000, Farmersville, California 93292

Dear Requestor:

On December 1, 2025, the Department of Toxic Substances Control (DTSC) received your email of December 1, 2025 requesting records under the Public Records Act. We were unable to locate an address in the county database using the APNs provided and we are unable to search our records using APNs as our databases do not include this information. If you have a specific address or cross streets, please let us know.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-3611 or via email at PubReqAct@dtsc.ca.gov.

Respectfully,

Nancy Fang

PROJECT INFORMATION

This document is the Initial Study/Mitigated Negative Declaration on the potential environmental effects of the City of Farmersville (City) Gardenia Courtyards Development Project (Project). The City of Farmersville will act as the Lead Agency for this project pursuant to the California Environmental Quality Act (CEQA) and the CEQA Guidelines. Copies of all materials referenced in this report are available for review in the project file during regular business hours at 909 W. Visalia Road, Farmersville, CA 93223.

Farmersville, California 93223

Contact person and phone number

Karl Schoettler, City Planner
City of Farmersville: (559) 734-8737 ext. 8032

Project location

The City of Farmersville is located in Tulare County in the northern part of the San Joaquin Valley, east of the City of Visalia (see Figure 1). The approximately 9.4-acre Project site is located northeast of the intersection of Farmersville Road and East Walnut Avenue (see Figure 2) and the site would occupy Assessor's Parcel Numbers (APN) 111-290-015. State Route 198 runs east-west through Farmersville, approximately 0.75 miles north of the proposed Project site.

Encino, CA 91426

General plan designation

General Commercial

Zoning

C-G (General Commercial)

Project Description

The proposed Project would include the development of two fully affordable multi-family projects for a total of 82 residential units and up to 13,950 square feet of commercial space. The northern portion of the Project site would consist of four buildings of senior housing developments with a total of 42 units, a commercial pad, community area, fenced dog park, bocce ball court, community garden, retention basins, and 97 parking spaces. The southern portion of the Project site would consist of an apartment complex with five residential buildings consisting of a total of 40 units, a community building, two commercial/retail pads, dog park, basketball court, retention basins, and 92 parking spaces. This apartment complex would include residential units, tot lot, half-basketball court, fenced dog park, on-site laundry facility, and outdoor picnic-barbeque area. The site construction will also include internal access roads, lighting, site landscaping and additional related improvements.

Specifically, the proposed Project includes:

- General Commercial:
    - Commercial Pads total – 13,950 sq. ft.
- Multi-family Residential:
    - Units – 40
    - Buildings - 5
- Senior Community
    - Units – 42
    - Buildings - 4

- Community Building
- Parking Spaces total – 92
- Retention Basins
- Facilities – Dog parks, basketball court, bocce ball court, on-site laundry, outdoor picnic-barbeque area
- Approve a General Plan Amendment for the General Commercial portions of the site to "Multi-Family Residential" on the Farmersville General Plan land use map.
- Approve a Zone Change from the General Commercial (C-G) portions of the site to "Multi-Family Residential (R-M)".
- Approval of a Site Plan Review

Surrounding Land Uses/Existing Conditions

The proposed Project site currently consists of vacant land with minimal vegetation. The site is highly disturbed.

Lands surrounding the proposed Project are described as follows:

- North: Residential housing.
- South: Vacant land, general commercial.
- East: Rural residences.
- West: Existing general commercial.

Other Public Agencies Involved

- The adoption of a Mitigated Negative Declaration by the City of Farmersville
- Approval of a General Plan Amendment by the City of Farmersville
- Approval of a Zone Change by the City of Farmersville
- Approval of a Site Plan Review by the City of Farmersville
- Approval of Building Permits by the City of Farmersville
- Approval of a Stormwater Pollution Prevention Plan by the Central Valley Regional Water Quality Control Board
- Dust Control Plan Approval letter from the San Joaquin Valley Air Pollution Control District

- Compliance with other federal, state and local requirements.

Tribal Consultation

The California Native American Tribes were contacted pursuant to AB 52 (Public Resources Code Section 21080.3.1, et seq.) and SB 18 on behalf of the City of Farmersville on May 30, 2023.

- Big Sandy Rancheria of Western Mono Indians
- Santa Rosa Indian Community of the Santa Rosa Rancheria
- Tule River Indian Tribe
- Wuksache Indian Tribe/Eshom Valley band
- Tubatulabals of Kern Valley
- North Fork Mono Tribe
- Big Sandy Rancheria of Western Mono Indians
- Kern Valley Indian Community

Tribes were provided 90 days, to request consultation pursuant to those statutes.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

☐ Aesthetics	☐ Agriculture Resources and Forest Resources	☐ Air Quality
☐ Biological Resources	☐ Cultural Resources	☐ Energy
☐ Geology / Soils	☐ Greenhouse Gas Emissions	☐ Hazards & Hazardous Materials
☐ Hydrology / Water Quality	☐ Land Use / Planning	☐ Mineral Resources
☐ Noise	☐ Population / Housing	☐ Public Services
☐ Recreation	☐ Transportation	☐ Tribal Cultural Resources
☐ Utilities / Service Systems	☐ Wildfire	☐ Mandatory Findings of Significance

DETERMINATION

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Karl Schoettler

City Planner

City of Farmersville

Date

ENVIRONMENTAL CHECKLIST

I. AESTHETICS

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Have a substantial adverse effect on a scenic vista?	☐	☐	☒	☐
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☒	☐
c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and regulations governing scenic quality?	☐	☐	☒	☐
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐

RESPONSES

a. Have a substantial adverse effect on a scenic vista?

Less Than Significant Impact. The proposed Project would include the development of a 9.4-acre parcel for two fully affordable multi-family projects for a total of 82 units, three commercial/retail pads and community areas. The site construction will also include parking spaces, internal access roads, lighting, site landscaping and additional related improvements.

The structures will conform to design standards set forth by the City's General Plan and Zoning Ordinance. The proposed Project site is located in an area that is largely surrounded by urban uses such as commercial and residential and will not result in a use that is visually incompatible with the surrounding area.

The City of Farmersville General Plan does not identify any scenic vistas within the Project area. A scenic vista is generally considered a view of an area that has remarkable scenery or a resource that is indigenous to the area.

Construction activities will be visible from the adjacent roadsides; however, the construction activities will be temporary in nature and will not affect a scenic vista. The impact will be ***less than significant***.

Mitigation Measures: None are required.

b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

Less Than Significant Impact. There are no state designated scenic highways within the immediate proximity to the Project site. California Department of Transportation Scenic Highway Mapping System identifies SR 198 east of SR 99 as an Eligible State Scenic Highway. This is the closest highway, located approximately 0.75 miles north of the Project site; however, the Project site is both physically and visually separated from SR 198 by intervening land uses. In addition, no scenic highways or roadways are listed within the Project area in the City of Farmersville's General Plan or Tulare County's General Plan. Based on the National Register of Historic Places (NRHP) and the City's General Plan, no historic buildings exist on the Project site. The proposed Project would not damage any trees, rock outcroppings or historic buildings within a State scenic highway corridor. Any impacts would be considered ***less than significant***.

Mitigation Measures: None are required.

c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and regulations governing scenic quality?

Less Than Significant Impact. Site construction will include multifamily housing consisting of 82 units and three general commercial pads, along with a community building, basketball court, bocce ball court,

dog parks, retention basins, and parking spaces. The site construction will also include internal access roads, lighting, site landscaping and additional related improvements. The residences will be multi-family and will conform to design standards set forth by the City's General Plan and Zoning Ordinance. The proposed Project site is located in an area that is substantially surrounded by urban uses, including commercial and residential, and as such, will not result in a use that is visually incompatible with the surrounding area. The proposed Project will not substantially degrade the existing visual character or quality of the area or its surroundings. The impact will be ***less than significant***.

Mitigation Measures: None are required.

d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Less Than Significant Impact. Nighttime lighting is necessary to provide and maintain safe, secure, and attractive environments; however, these lights have the potential to produce spillover light and glare and waste energy, and if designed incorrectly, could be considered unattractive. Light that falls beyond the intended area is referred to as "light trespass". Types of light trespass include spillover light and glare. Minimizing all these forms of obtrusive light is an important environmental consideration. A less obtrusive and well-designed energy efficient fixture would face downward, emit the correct intensity of light for the use, and incorporate energy timers.

Spillover light is light emitted by a lighting installation that falls outside the boundaries of the property on which the installation is sited. Spillover light can adversely affect light-sensitive uses, such as residential neighborhoods at nighttime. Because light dissipates as it travels from the source, the intensity of a light fixture is often increased at the source to compensate for the dissipated light. This can further increase the amount of light that illuminates adjacent uses. Spillover light can be minimized by using only the level of light necessary, and by using cutoff type fixtures or shielded light fixtures, or a combination of fixture types.

Glare results when a light source directly in the field of vision is brighter than the eye can comfortably accept. Squinting or turning away from a light source is an indication of glare. The presence of a bright light in an otherwise dark setting may be distracting or annoying, referred to as discomfort glare, or it may diminish the ability to see other objects in the darkened environment, referred to as disability glare. Glare can be reduced by design features that block direct line of sight to the light source and that direct light downward, with little or no light emitted at high (near horizontal) angles, since this light would travel long distances. Cutoff-type light fixtures minimize glare because they emit relatively low-intensity light at these angles.

Currently, the sources of light in the Project area are from streetlights, the vehicles traveling along Farmersville Road and nearby residential streets, commercial uses, and nighttime lighting from adjacent residences, mini storage and commercial store. The Project would necessitate street and residential nighttime lighting and such lighting that would be subject to City standards. Accordingly, potential impacts would be considered ***less than significant***.

Mitigation Measures: None are required.

II. AGRICULTURE AND FOREST RESOURCES

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	☐	☐	☐	☒
d. Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒

RESPONSES

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

No Impact. The Project site is located in an area of the City considered *Farmland of Local Importance* by the State Farmland Mapping and Monitoring Program.[1] The Project site is entirely within the Farmersville City limits and is designated General Commercial by the General Plan. Therefore, the proposed Project does not have the potential to result in the conversion of Farmland to non-agricultural uses or forestland uses to non-forestland. There is ***no impact***.

Mitigation Measures: None are required.

b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. The 9.4-acre Project site is planned for urban uses and is currently zoned and designated in the General Plan as General Commercial. Upon approval of the Zone Change and General Plan Amendment, the eastern portion of the site will be Multi-family residential. The site is not under a Williamson Act Contract. There are ***no impacts.***

Mitigation Measures: None are required.

c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

No Impact. The Project is not zoned for forestland and does not propose any zone changes related to forest or timberland. There is ***no impact***.

Mitigation Measures: None are required.

[1] California Department of Conservation Division of Land Resource Protection. Farmland Mapping and Monitoring Program. https://maps.conservation.ca.gov/DLRP/CIFF. Accessed June 2023.

d. Result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. No conversion of forestland, as defined under Public Resource Code or General Code, as referenced above, would occur as a result of the Project. There is ***no impact***.

Mitigation Measures: None are required.

e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

No Impact. No land conversion from Farmland would occur for the Project. Surrounding land uses include residential and commercial. The proposed Project site is designated for urban development by the Farmersville General Plan and as such, does not have the potential to result in the conversion of Farmland to non-agricultural uses or forestland uses to non-forestland. There is ***no impact***.

Mitigation Measures: None are required.

III. AIR QUALITY

Would the project:	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☒	☐
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☒	☐
c. Expose sensitive receptors to substantial pollutant concentrations?	☐	☒	☐	☐
d. Result in other emissions (such as those leading to odors or adversely affecting a substantial number of people)?	☐	☐	☒	☐

The following information was provided by an Air Quality, Health Risk Analysis, Greenhouse Gas, and Energy Technical Memorandum that was performed on behalf of the proposed project by Johnson, Johnson & Miller Air Quality Consulting Services, report date September 22, 2023. The report can be read in its entirety in Appendix A.

RESPONSES

a. Conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant Impact. Air Quality Plans (AQPs) are plans for reaching attainment of air quality standards. The assumptions, inputs, and control measures are analyzed to determine if the Air Basin can reach attainment for the ambient air quality standards. The proposed Project site is located within the jurisdictional boundaries of the San Joaquin Valley Air Pollution Control District (SJVAPCD). To show attainment of the standards, the SJVAPCD analyzes the growth projections in the Valley, contributing factors in air pollutant emissions and formations, and existing and adopted emissions controls. The SJVAPCD then formulates a control strategy to reach attainment that includes both State and SJVAPCD regulations and other local programs and measures.

For projects that include stationary sources of emissions, the SJVAPCD relies on project compliance with Rule 2201—New and Modified Stationary Source Review to ensure that growth in stationary source emissions would not interfere with the applicable AQP. Projects exceeding the offset thresholds included in the rule are required to purchase offsets in the form of Emission Reduction Credits (ERCs).

The CEQA Guidelines indicate that a significant impact would occur if the project would conflict with or obstruct implementation of the applicable air quality plan. The GAMAQI indicates that projects that do not exceed SJVAPCD regional criteria pollutant emissions quantitative thresholds would not conflict with or obstruct the applicable AQP.

Compliance with Applicable Control Measures

SJVAPCD's AQPs contain a number of control measures, which are enforceable requirements through the adoption of rules and regulations. The following rules and regulations are relevant to the Project:

Rule 4201—Particulate Matter Concentration. This rule shall apply to any source operation that emits or may emit dust, fumes, or total suspended particulate matter.

Rule 4601—Architectural Coatings. The purpose of this rule is to limit Volatile Organic Compounds (VOC) emissions from architectural coatings. Emissions are reduced by limits on VOC content and providing requirements on coatings storage, cleanup, and labeling. Only compliant components are available for purchase in the San Joaquin Valley.

Rule 4641—Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations. The purpose of this rule is to limit VOC emissions from asphalt paving and maintenance operations. If asphalt paving will be used, then the paving operations will be subject to Rule 4641. This regulation is enforced on the asphalt provider.

Rule 4702—Internal Combustion Engines. The purpose of this rule is to limit the emissions of NO_x, carbon monoxide (CO), VOC, and sulfur oxides (SO_x) from internal combustion engines. If the project includes emergency generators, the equipment is required to comply with Rule 4702.

Regulation VIII—Fugitive PM_{10} Prohibitions. This regulation is a control measure that is one main strategies from the 2006 PM_{10} for reducing the PM_{10} emissions that are part of fugitive dust. Projects over 10 acres are required to file a Dust Control Plan (DCP) containing dust control practices sufficient to comply with Regulation VIII. Rule 8021 regulates construction and demolition activities, road construction, bulk materials storage, paved and unpaved roads, carryout and trackout, etc. All development projects that involve soil disturbance are subject to at least one provision of the Regulation VIII series of rules.

Rule 9510–Indirect Source Review. This rule reduces the impact of NO_X and PM_{10} emissions from growth within the SJVAB. The rule places application and emission reduction requirements on development projects meeting applicability criteria in order to reduce emissions through on-site mitigation, off-site District-administered projects, or a combination of the two.

As discussed in Impact III(b) below, emissions of ROG, NO_X, CO, SO_X, PM_{10}, and $PM_{2.5}$ associated with the proposed Project would not exceed the SJVAPCD's significance thresholds during the construction phase (see Table). Similarly, emissions of ROG, NO_X, CO, SO_X, $PM_{2.5}$ or PM_{10} during operations would not exceed any applicable threshold of significance (see Table 2).

The Project would comply with all applicable CARB and SJVAPCD rules and regulations. Therefore, the Project complies with this criterion and would not conflict with or obstruct implementation of the applicable air quality attainment plan with regards to this criterion. The Project's regional operational emissions would not exceed any applicable SJVAPCD prior to the incorporation of mitigation measures (see Impact III(b)). Therefore, the Project would be considered consistent with the existing AQPs. Based on the findings above, the proposed Project would not conflict with or obstruct implementation of the applicable air quality plan. The impact would be ***less than significant***.

Mitigation Measures: None are required.

b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less Than Significant Impact. To result in a less than significant impact, emissions of nonattainment pollutants must be below the SJVAPCD's regional significance thresholds. This is an approach recommended by the SJVAPCD's in its GAMAQI. The SJVAB is in nonattainment for ozone, PM_{10} (State only), and $PM_{2.5}$. Ozone is a secondary pollutant that can be formed miles from the source of emissions, through reactions of ROG and NO_X emissions in the presence of sunlight. Therefore, ROG and NO_X are termed ozone precursors. As such, the primary pollutants of concern during Project construction and operation are ROG, NO_X, PM_{10}, and $PM_{2.5}$.

Since the SJVAB is nonattainment for ozone, PM_{10}, and $PM_{2.5}$, it is considered to have an existing significant cumulative health impact without the Project. When this occurs, the analysis considers whether the project's contribution to the existing violation of air quality standards is cumulatively considerable. The SJVAPCD regional thresholds for NO_X, ROG/VOC, PM_{10}, or $PM_{2.5}$ are applied as cumulative contribution thresholds. The SJVAPCD GAMAQI adopted in 2015 contains thresholds for CO, NO_X, ROG, SO_X, PM_{10}, and $PM_{2.5}$. Air pollutant emissions have both regional and localized effects.

The Project's regional emissions are compared to the applicable SJVAPCD regional thresholds below to address if the Project would result in a cumulatively considerable net increase of any criteria pollutant (including ozone precursors) of concern.

Criteria Pollutant Emission Estimates

Construction Emissions (Regional)

Construction emissions associated with the development envisioned for the proposed project are shown in Table prior to the incorporation of any mitigation.

Table 1
Summary of Construction-Generated Emissions of Criteria Air Pollutants – Unmitigated

Emissions Source	Emissions (Tons/Year)					
	ROG	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Project Construction (2025)	0.18	1.42	1.77	< 0.01	0.21	0.10
Project Construction (2026)	0.37	0.22	0.30	< 0.01	0.03	0.01
Total Construction Duration (2025-2026)						
Project Total	**0.55**	**1.64**	**2.07**	**< 0.01**	**0.24**	**0.11**
Significance Thresholds	**10**	**10**	**100**	**27**	**15**	**15**
Exceed Significance Thresholds?	**No**	**No**	**No**	**No**	**No**	**No**

Notes:
PM_{10} and $PM_{2.5}$ emissions are from the mitigated output to reflect compliance with Regulation VIII—Fugitive PM_{10} Prohibitions.
Source of Emissions: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A).
Source of Thresholds: San Joaquin Valley Air Pollution Control District (SJVAPCD). 2015. Guidance for Assessing and Mitigating Air Quality Impacts. February 19. Website: https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF. Accessed September 2023.

As shown in Table 1 above, emissions from construction activities associated with the proposed Project would fall below the significance thresholds. Therefore, regional and cumulative impacts associated with construction of the proposed Project are less than significant.

Operational Emissions (Regional)

Operational emissions occur over the lifetime of the project. The SJVAPCD considers permitted and non-permitted emission sources separately when making significance determinations. In addition, the annual operational emissions are also considered separately from construction emissions. Operational emissions associated with the proposed Project are shown in Table 2. Operational emissions were estimated using

a full buildout scenario in the earliest year of operations (2026), which provides a conservative estimate of emissions and resulting potential impacts.

Table 2
Summary of Operational Emissions of Criteria Air Pollutants – Unmitigated

Source	Emissions (tons/year)					
	ROG	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Area	0.49	0.03	0.49	< 0.01	0.00	0.00
Energy	0.01	0.11	0.07	< 0.01	0.01	0.01
Mobile (Automobiles)	2.48	0.92	6.71	< 0.01	0.28	0.08
Annual Total	**2.98**	**1.06**	**7.27**	**< 0.01**	**0.29**	**0.09**
Significance Thresholds	**10**	**10**	**100**	**27**	**15**	**15**
Exceed Significance Thresholds?	**No**	**No**	**No**	**No**	**No**	**No**

Notes:
Emissions were quantified using CalEEMod based on Project details and earliest operational year for the proposed Project.
Source: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A).

As shown in Table 2, operational emissions would not exceed the applicable SJVAPCD thresholds of significance for ROG, NO_X, CO, SO_X, PM_{10}, or $PM_{2.5}$. Therefore, the impact from operations of the Project would be less than significant.

Conclusion

As shown in Table , the Project's regional emissions would not exceed the applicable regional criteria pollutant emissions quantitative thresholds during project construction. During operations, the Project would not exceed the applicable regional criteria pollutant emissions quantitative thresholds (see Table 2). Therefore, the impact would be ***less than significant***.

Mitigation Measures: None are required.

c. Expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant Impact with Mitigation. Emissions occurring at or near the Project have the potential to create a localized impact that could expose sensitive receptors to substantial pollutant concentrations. The SJVAPCD considers a sensitive receptor to be a location that houses or attracts children, the elderly, people with illnesses, or others who are especially sensitive to the effects of air

pollutants. Examples of sensitive receptors include hospitals, residences, convalescent facilities, and schools.

The closest existing sensitive receptors to the Project site include residential receptors, the closest of which include existing single-family homes located within approximately 50 feet east of the Project boundary. See Appendix A (Attachment B-Construction Health Risk Assessment and Operational Health Risk Screening) for a graphical representation of the sensitive receptor locations within approximately ¼-mile of the Project site.

Localized Impacts

Emissions occurring at or near the project have the potential to create a localized impact also referred to as an air pollutant hotspot. Localized emissions are considered significant if when combined with background emissions, they would result in exceedance of any health-based air quality standard. In locations that already exceed standards for these pollutants, significance is based on a significant impact level (SIL) that represents the amount that is considered a cumulatively considerable contribution to an existing violation of an air quality standard. The pollutants of concern for localized impact in the SJVAB are NO_2, SO_X, and CO.

The SJVAPCD has provided guidance for screening localized impacts in the GAMAQI that establishes a screening threshold of 100 pounds per day of any criteria pollutant. If a project exceeds 100 pounds per day of any criteria pollutant, then ambient air quality modeling would be necessary. If the project does not exceed 100 pounds per day of any criteria pollutant, then it can be assumed that it would not cause a violation of an ambient air quality standard.

Construction: Localized Concentrations of PM_{10}, $PM_{2.5}$, CO, SO_x, and NO_X

Local construction impacts would be short-term in nature lasting only during the duration of construction. As shown in

Table 3 below, on-site construction emissions would be less than 100 pounds per day for each of the criteria pollutants. To present a conservative estimate, on-site emissions for on-road construction vehicles

were included in the localized analysis. Based on the SJVAPCD's guidance, the construction emissions would not cause an ambient air quality standard violation.

Table 3
Localized Concentrations of PM_{10}, $PM_{2.5}$, CO, SO_x, and NO_X for Construction - Unmitigated

Emission Source	On-site Emissions (pounds per day)					
	ROG	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Highest Daily Construction (2025)	3.39	31.75	30.51	0.05	9.78	5.27
Highest Daily Construction (2026)	33.78	10.10	14.04	0.02	1.14	0.43
Total Construction Duration						
Highest Daily Maximum	**33.78**	**31.75**	**30.51**	**0.05**	**9.78**	**5.27**
Significance Thresholds	**—**	**100**	**100**	**100**	**100**	**100**
Exceed Significance Thresholds?	**—**	**No**	**No**	**No**	**No**	**No**

Note:
Overlap of construction activities is based on the construction schedule shown in Table 2 and Attachment A of Appendix A.
Source of Emissions: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A). Maximum daily emissions represent the maximum daily emissions between the Summer and Winter scenarios.
Source of Thresholds: San Joaquin Valley Air Pollution Control District (SJVAPCD). 2015. Guidance for Assessing and Mitigating Air Quality Impacts. February 19. Website: https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF. Accessed September 2023.

Operation: Localized Concentrations of PM_{10}, $PM_{2.5}$, CO, SO_x, and NO_X

Localized impacts could occur in areas with a single large source of emissions such as a power plant or with multiple sources concentrated in a small area such as a distribution center. The maximum daily operational emissions would occur at Project buildout, which was modeled for the year 2026 (the earliest year of operations). Operational emissions include those generated on-site by area sources such as consumer products and landscape maintenance, energy use from natural gas combustion, and motor vehicles operation at the Project site. Motor vehicle emissions are estimated for on-site operations using trip lengths for on-site travel and ¼-mile of off-site emissions.

As shown in

Table 4 below, operational modeling of on-site emissions for the Project indicate that the Project would not exceed 100 pounds per day for each of the criteria pollutants. Therefore, based on the SJVAPCD's guidance, the operational emissions would not cause an ambient air quality standard violation. As such, impacts would be less than significant.

Table 4
Localized Concentrations of PM_{10}, $PM_{2.5}$, CO, SO_x, and NO_X for Operations

Source	On-site Emissions (pounds per day)					
	ROG	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Area	2.96	0.68	0.29	0.00	0.06	0.06
Energy	0.04	0.63	0.37	0.00	0.05	0.05
Mobile (Automobiles)	15.41	5.42	42.84	0.03	1.55	0.42
Total	**18.41**	**6.73**	**43.50**	**0.03**	**1.66**	**0.53**
Significance Thresholds	**—**	**100**	**100**	**100**	**100**	**100**
Exceed Significance Thresholds?	**—**	**No**	**No**	**No**	**No**	**No**

Source of Emissions: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A).

Source of Thresholds: San Joaquin Valley Air Pollution Control District (SJVAPCD). 2015. Guidance for Assessing and Mitigating Air Quality Impacts. February 19. Website: https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF. Accessed September 2023.

Toxic Air Contaminants

Construction

Project construction would involve the use of diesel-fueled vehicles and equipment that emit DPM, which is considered a TAC. The SJVAPCD's current threshold of significance for TAC emissions is an increase in cancer risk for the maximally exposed individual of 20 in a million (formerly 10 in a million). The SJVAPCD's 2015 GAMAQI does not currently recommend analysis of TAC emissions from project construction activities, but instead focuses on projects with operational emissions that would expose sensitive receptors over a typical lifetime of 70 years. In addition, the most intense construction activities of the Project's construction would occur during site preparation and grading phases over a short period.

There are no conditions unique to the Project site that would require more intense construction activity compared to typical development. Examples of situations that would warrant closer scrutiny may include sites that would require extensive excavation and hauling due to existing site conditions. Building construction typically requires limited amounts of diesel equipment relative to site clearing activities. Nonetheless, a construction HRA was prepared as part of this analysis. In addition, the analysis includes an evaluation of potential health impacts from construction and operations of the Project considered together, over a 70-year exposure scenario.

The results of the HRA prepared for Project construction for cancer risk and long-term chronic cancer risk are summarized below. Construction emissions were estimated assuming adherence to all applicable rules, regulations, and Project design features. The construction emissions were assumed to be distributed over the Project area with a working schedule of eight hours per day and five days per week. Emissions were adjusted by a factor of 4.2 to convert for use with a 24-hour-per-day, 365 day-per-year averaging period. Health risk calculations were completed using HARP2. Detailed parameters and complete calculations are included in Appendix A. The estimated health and hazard impacts at the Maximally Exposed Receptor (MER) from the Project's construction emissions are provided in **Error! Reference source not found.**.

Table 5
Unmitigated Health Risks from Project Construction to Off-Site Receptors

Exposure Scenario	Maximum Cancer Risk (Risk per Million)	Chronic Non-Cancer Hazard Index	Acute Non-Cancer Hazard Index
Risks and Hazards at the MER			
Risks and Hazards at the MER (Construction Only)	19.47	0.02005	0.00000
Risks and Hazards at the MER (Construction Plus Operations)	29.19	0.02015	0.00000
Significance Threshold	**20**	**1**	**1**
Threshold Exceeded in Any Scenario?	**Yes**	**No**	**No**

MER = Maximally Exposed Receptor
Project MER: Receptor #509 (36°18'52.8"N 119°12'16.4"W)
Source: Construction Health Risk Assessment and Operational Health Risk Screening (Attachment B of Appendix A).

As shown in **Error! Reference source not found.**, estimated health risks from elevated DPM concentrations during construction of the proposed Project would not exceed the applicable health risk significance thresholds when construction is considered alone; however, construction plus operational emissions would exceed the applicable cancer risk threshold. This represents a potentially significant construction TAC exposure impact. Therefore, mitigation is required to reduce the impact during the construction period to below a level of significance.

Mitigation measure AIR-1 requires the Project applicant, project sponsor, or construction contractor to provide documentation to the City of Farmerville that all off-road diesel-powered construction equipment greater than 50 horsepower meet EPA or CARB Tier 4 Interim off-road emissions standards or will utilize Level 3 filters. **Error! Reference source not found.** shows the health risks and non-cancer hazard index for construction with implementation of mitigation measure AIR-1.

Table 6
Summary of the Health Impacts from Mitigated Construction of the Project

Exposure Scenario	Maximum Cancer Risk (Risk per Million)	Chronic Non-Cancer Hazard Index	Acute Non-Cancer Hazard Index
Risks and Hazards at the MER—Tier 4 Equipment Scenario			
Risks and Hazards at the MER (Construction Only)	4.52	0.00466	0.00000
Risks and Hazards at the MER (Construction Plus Operations)	14.24	0.00476	0.00000
Risks and Hazards at the MER—Level 3 Filters Scenario			
Risks and Hazards at the MER (Construction Only)	5.32	0.00547	0.00000
Risks and Hazards at the MER (Construction Plus Operations)	15.04	0.00557	0.00000
Highest Risks and Hazards at the MER after Incorporation of MM AIR-C1			
Risks and Hazards at the MER	15.04	0.00557	0.00000
Significance Threshold	**20**	**1**	**1**
Threshold Exceeded in Any Scenario?	**No**	**No**	**No**

MER = Maximally Exposed Receptor
Project MER: Receptor #509 (36°18'52.8"N 119°12'16.4"W)
Source: Construction Health Risk Assessment and Operational Health Risk Screening (Attachment B of Appendix A).

As noted in **Error! Reference source not found.**, calculated health metrics from the proposed Project's construction DPM emissions would not exceed the cancer risk significance threshold or non-cancer hazard index significance threshold at the MER with incorporation of AIR-1. Therefore, the proposed Project would not result in a significant impact on nearby sensitive receptors from TACs during construction.

Operations

Unlike warehouses or distribution centers, the daily vehicle trips generated by the proposed residential and commercial mixed-use Project would be primarily generated by passenger vehicles. Passenger vehicles typically use gasoline engines rather than the diesel engines that are found in heavy-duty trucks. Gasoline-powered vehicles do emit TACs in the form of toxic organic gases, some of which are carcinogenic. Compared to the combustion of diesel, the combustion of gasoline had relatively low emissions of TACs. Thus, residential and commercial mixed-use development Projects typically produce limited amounts of TAC emissions during operation. Nonetheless, it is anticipated that there would be some heavy-duty trucks visiting the Project site during operations. Consistent with SJVAPCD guidance, an operational prioritization screening analysis was completed for the proposed Project.

Operational DPM emissions from diesel trucks were estimated using EMFAC2021 emission factors and estimated truck travel and idling at the Project site. The emissions were entered into the SJVAPCD Prioritization Screening Tool to determine the risk scores, with complete calculations and assumptions included as part of Attachment B of Appendix A. The results of the screening analysis are provided in **Error! Reference source not found.**.

Table 7
Prioritization Tool Health Risk Screening Results

Impact Source	Cancer Risk Score	Chronic Risk Score	Acute Risk Score
Diesel Trucks	9.72	0.00010	0.00000
Total Risk from Project Operations	**9.72**	**0.00010**	**0.00000**
Screening Risk Score Threshold	**10**	**1**	**1**
Screening Thresholds Exceeded?	**No**	**No**	**No**
Source: Construction Health Risk Assessment and Operational Health Risk Screening (Attachment B of Appendix A)			

As shown in **Error! Reference source not found.**, the Project would not exceed the cancer risk or chronic hazard screening threshold levels during Project operations. The primary source of the emissions responsible for chronic risk are from diesel trucks. DPM does not have an acute risk factor. Since the Project does not exceed the applicable SJVAPCD screening thresholds for cancer risk, acute risk, or chronic risk, this impact would be less than significant.

Valley Fever

Valley fever, or coccidioidomycosis, is an infection caused by inhalation of the spores of the fungus, *Coccidioides immitis* (*C. immitis*). The spores live in soil and can live for an extended time in harsh environmental conditions. Activities or conditions that increase the amount of fugitive dust contribute to greater exposure, and they include dust storms, grading, and recreational off-road activities.

The San Joaquin Valley is considered an endemic area for Valley fever. The San Joaquin Valley is considered an endemic area for Valley fever. During 2000–2018, a total of 65,438 coccidioidomycosis cases were reported in California; median statewide annual incidence was 7.9 per 100,000 population and varied by region from 1.1 in Northern and Eastern California to 90.6 in the Southern San Joaquin Valley, with the largest increase (15-fold) occurring in the Northern San Joaquin Valley. Incidence has been consistently high in six counties in the Southern San Joaquin Valley (Fresno, Kern, Kings, Madera, Tulare,

and Merced counties) and Central Coast (San Luis Obispo County) regions.[2] California experienced 7,517 new probable or confirmed cases of Valley fever in 2022. A total of 319 suspect, probable, and confirmed Valley fever cases were reported in Tulare County in 2022.[3]

The distribution of *C. immitis* within endemic areas is not uniform and growth sites are commonly small (a few tens of meters) and widely scattered. Known sites appear to have some ecological factors in common suggesting that certain physical, chemical, and biological conditions are more favorable for *C. immitis* growth. Avoidance, when possible, of sites favorable for the occurrence of *C. immitis* is a prudent risk management strategy. Listed below are ecologic factors and sites favorable for the occurrence of *C. immitis*:

1) Rodent burrows (often a favorable site for *C. immitis*, perhaps because temperatures are more moderate and humidity higher than on the ground surface)
2) Old (prehistoric) Indian campsites near fire pits
3) Areas with sparse vegetation and alkaline soils
4) Areas with high salinity soils
5) Areas adjacent to arroyos (where residual moisture may be available)
6) Packrat middens
7) Upper 30 centimeters of the soil horizon, especially in virgin undisturbed soils
8) Sandy, well-aerated soil with relatively high water-holding capacities

Sites within endemic areas less favorable for the occurrence of *C. immitis* include:

1) Cultivated field
2) Heavily vegetated areas (e.g., grassy lawns)
3) Higher elevations (above 7,000 feet)
4) Areas where commercial fertilizers (e.g., ammonium sulfate) have been applied
5) Areas that are continually wet

---

[2] Centers for Disease Control and Prevention (CDC). 2020. Regional Analysis of Coccidioidomycosis Incidence—California, 2000–2018. Website: https://www.cdc.gov/mmwr/volumes/69/wr/mm6948a4.htm?s_cid=mm6948a4_e. Accessed June 16, 2023.

Website: https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/CocciinCA ProvisionalMonthlyReport.pdf. Accessed June 16, 2023.

6) Paved (asphalt or concrete) or oiled areas

7) Soils containing abundant microorganisms

8) Heavily urbanized areas where there is little undisturbed virgin soil.[4]

The Project is situated on a site previously disturbed that does not provide a suitable habitat for spores. Specifically, the Project site had been previously disturbed and has some vegetation cover in the form of shrubbery. Therefore, implementation of the proposed Project would have a low probability of the site having *C. immitis* growth sites and exposure to the spores from disturbed soil.

Although conditions are not favorable, construction activities could generate fugitive dust that contains *C. immitis* spores. The Project will minimize the generation of fugitive dust during construction activities by complying with SJVAPCD's Regulation VIII. Therefore, this regulation, combined with the relatively low probability of the presence of *C. immitis* spores would reduce Valley fever impacts to less than significant.

During operations, dust emissions are anticipated to be relatively small because most of the Project area where operational activities would occur would be occupied by the proposed residential buildings, commercial buildings, landscaping, pavement, and internal streets. This condition of the Project being built-up would lessen the possibility of the Project site providing habitat suitable for *C. immitis* spores and for generating fugitive dust that may contribute to Valley fever exposure. Impacts would be less than significant.

Naturally Occurring Asbestos

Review of the map of areas where naturally occurring asbestos in California are likely to occur found no such areas in the immediate Project area. Therefore, development of the Project is not anticipated to expose receptors to naturally occurring asbestos.[5] Impacts would be less than significant.

Operations—The Project's Potential to Locate Sensitive Receptor Near Existing Sources of TACs

As a residential and commercial mixed-use development Project, the Project would locate sensitive receptors (future residents) to a site where future Project residents could be subject to existing sources of

[4] United States Geological Survey (USGS). 2000. Operational Guidelines (Version 1.0) for Geological Fieldwork in Areas Endemic for Coccidioidomycosis (Valley Fever), 2000, Open-File Report 2000-348. Website: https://pubs.usgs.gov/of/2000/0348/pdf/of00-348.pdf. Accessed September, 2023.

Reported Historic Asbestos Mines, Historic Asbestos Prospects, and Other Natural Occurrences of Asbestos in California. Open-File Report 2011-1188 Website: https://pubs.usgs.gov/of/2011/1188/. Accessed May 20, 2023.

TACs at the project site. However, the California Supreme Court concluded in *California Building Industry Association (CBIA) v. Bay Area Air Quality Management District (BAAQMD)* that agencies subject to CEQA are not required to analyze the impact of existing environmental conditions on a project's future users or residents. Therefore, this impact will not be further addressed in this document.

Impact Analysis Summary

In summary, the Project would not exceed SJVAPCD localized emission daily screening levels for any criteria pollutant. The Project is not a significant source of TAC emissions during operations and would not be a significant source of TAC emissions during construction after incorporation of MM AIR-1. The Project is not in an area with suitable habitat for Valley fever spores and is not in an area known to have naturally occurring asbestos. Therefore, the Project would result in ***less than significant*** to sensitive receptors after incorporation of mitigation.

Mitigation Measures:

MM AIR-1:

Before a construction permit is issued for the proposed Project, the Project applicant, Project sponsor, or construction contractor shall submit documentation demonstrating reasonably detailed compliance with one of the following requirements to the City of Farmersville:

Option 1) Where portable diesel engines are used during construction, all off-road equipment with engines greater than 50 horsepower shall have engines that meet or exceed either United States Environmental Protection Agency (EPA) or California Air Resources Board (CARB) Tier 4 Interim off-road emission standards except as otherwise specified herein. If engines that comply with Tier 4 Interim or Tier 4 Final off-road emission standards are not commercially available, then the construction contractor shall use the next cleanest piece of off-road equipment (e.g., Tier 3) that is commercially available. For purposes of this Project design feature, "commercially available" shall mean the equipment at issue is available taking into consideration factors such as (i) critical-path timing of construction; and (ii) geographic proximity to the Project site of equipment. If the relevant equipment is determined by the Project applicant to not be commercially available, the contractor can confirm this conclusion by providing letters from at least two rental companies for each piece of off-road equipment that is at issue.

Option 2) Prior to the issuance of any demolition, grading, or building permits (whichever occurs earliest), the project applicant and/or construction contractor shall prepare a construction operations plan that, during construction activities, requires all off-road

equipment with engines greater than 50 horsepower to meet either the particulate matter emissions standards for Tier 4 Interim engines or be equipped with Level 3 diesel particulate filters. Tier 4 Interim engines shall, at a minimum, meet EPA or CARB particulate matter emissions standards for Tier 4 Interim engines. Alternatively, use of CARB-certified Level 3 diesel particulate filters on off-road equipment with engines greater than 50 horsepower can be used in lieu of Tier 4 Interim engines or in combination with Tier 4 Interim or better engines. The construction contractor shall maintain records documenting its efforts to comply with this requirement, including equipment lists. Off-road equipment descriptions and information shall include, but are not limited to, equipment type, equipment manufacturer, equipment identification number, engine model year, engine certification (Tier rating), horsepower, and engine serial number. The Project applicant and/or construction contractor shall submit the construction operations plan and records of compliance to the City of Farmersville.

d. Result in other emissions (such as those leading to odors adversely affecting a substantial number of people?

Less Than Significant Impact. Two situations create a potential for odor impact. The first occurs when a new odor source is located near an existing sensitive receptor. The second occurs when a new sensitive receptor locates near an existing source of odor. Odor impacts on residential areas and other sensitive receptors, such as hospitals, day-care centers, schools, etc. warrant the closest scrutiny, but consideration should also be given to other land uses where people may congregate, such as recreational facilities, worksites, and commercial areas.

Although the Project is less than one mile from the nearest sensitive receptor, the Project is not expected to be a significant source of odors. The screening levels for these land use types are shown in Table .

Construction

During construction, various diesel-powered vehicles and equipment in use on-site would create localized odors. These odors would be temporary and intermittent, which would decrease the likelihood of the odors concentrating in a single area or lingering for any notable period of time. As such, these odors would likely not be noticeable for extended periods of time beyond the Project's site boundaries. The potential for odor impacts from construction of the proposed Project would, therefore, be less than significant.

Table 8
Screening Levels for Potential Odor Sources

Odor Generator	Screening Distance
Wastewater Treatment Facilities	2 miles
Sanitary Landfill	1 mile
Transfer Station	1 mile
Composting Facility	1 mile
Petroleum Refinery	2 miles
Asphalt Batch Plant	1 mile
Chemical Manufacturing	1 mile
Fiberglass Manufacturing	1 mile
Painting/Coating Operations (e.g., auto body shop)	1 mile
Food Processing Facility	1 mile
Feed Lot/Dairy	1 mile
Rendering Plant	1 mile
Source of Thresholds: San Joaquin Valley Air Pollution Control District (SJVAPCD). 2015. Guidance for Assessing and Mitigating Air Quality Impacts. February 19. Website: https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF. Accessed September 2023.	

Operations

Project as a Potential Odor Generator

The development of the proposed Project would not substantially increase objectionable odors in the area. Land uses that are typically identified as sources of objectionable odors include landfills, transfer stations, sewage treatment plants, wastewater pump stations, composting facilities, asphalt batch plants, rendering plants, and other land uses outlined in Table . The proposed residential and commercial mixed-use Project would not engage in any of these activities. Minor sources of odors that would be associated with typical residential and commercial mixed-use development Projects, such as exhaust from mobile sources (including diesel-fueled vehicles), are known to have temporary and less concentrated odors. Considering the low intensity of potential odor emissions, the proposed Project's operational activities would not expose receptors to objectionable odor emissions. Therefore, the proposed Project would not be considered to be a generator of objectionable odors during operations. As such, impacts would be less than significant.

Project as a Receptor

With the *CBIA v. BAAQMD* ruling, analysis of odor impacts on receivers is not required for CEQA compliance unless the project would exacerbate the impact. As discussed above, the Project is a residential and commercial mixed-use Project and would not be considered a major source of odors during construction or operation. Therefore, the Project would not exacerbate an existing odor impact and no further analysis is required. The impacts will be ***less than significant.***

Mitigation Measures: None are required.

IV. BIOLOGICAL RESOURCES

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☒	☐
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☒	☐
c. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☒	☐
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☒	☐	☐

e.	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☒	☐
f.	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

The proposed Project site is located in a portion of the central San Joaquin Valley that has, for decades, experienced intensive agricultural and urban disturbances. Current agricultural endeavors in the region include orange groves, olive orchards and row crops.

Like most of California, the Central San Joaquin Valley experiences a Mediterranean climate. Warm dry summers are followed by cool moist winters. Summer temperatures usually exceed 90 degrees Fahrenheit, and the relative humidity is generally very low. Winter temperatures rarely raise much above 70 degrees Fahrenheit, with daytime highs often below 60 degrees Fahrenheit. According to the Farmersville General Plan Community Profile, approximately 90 percent of all rainfall in Farmersville occurs between November and April. Average rainfall measured in Visalia is 10.15 inches.[6] Nearly all precipitation falls in the form of rain and stormwater readily infiltrates the soils of the surrounding the sites.

Native plant and animal species once abundant in the region have become locally extirpated or have experienced large reductions in their populations due to conversion of upland, riparian, and aquatic habitats to agricultural and urban uses. Remaining native habitats are particularly valuable to native wildlife species including special status species that still persist in the region.

The proposed Project site is currently vacant with minimal vegetation and located in an area surrounded with urban uses including residential and commercial.

[6] Ch. 2 Physical Environmental, Farmersville General Plan Part II Community Profile, November 2002. pg 2-1. Accessed June 2023.

RESPONSES

a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Less Than Significant Impact. The proposed Project would include the development of a 9.4-acre parcel for two fully affordable multi-family projects for a total of 82 units, three commercial pads, a community building, and community areas. The site construction will also include parking spaces, internal access roads, lighting, site landscaping and additional related improvements.

The site is currently vacant and in an area that is highly disturbed and lacking in substantial vegetation, such as trees, brush or shrubs. This factor suggests that the Project site is extremely unlikely to serve as nesting habitat for bird species or any animal or plant species. No wetlands or waters of the U.S. or water of the State were found within the Project area.

According to the Farmersville General Plan, a total of eight special status animal species could potentially occur in the Farmersville area. Two of the eight species are listed as threatened or endangered by the U.S. Fish and Wildlife Service or the California Department of Fish and Game. The remaining six species are candidates for federal listing or listed species of special concern by the State of California. No special status plant species are likely to occur in the Farmersville planning area. The two species listed as Endangered or Threatened are the San Joaquin Kit Fox and the Valley Elderberry Longhorn Beetle. A biotic survey prepared for the General Plan update indicated that the overwhelming bulk of the planning area has been severely disturbed from its natural state by urbanization and agricultural activities.[7]

Tulare County is considered to be a portion of the larger regional habitat of the San Joaquin Kit Fox, a species whose habitat extends along the Sierra Nevada foothills and down to the Coast. According to the Tulare County Planning Department, kit foxes have been observed foraging in orange groves west of Lindsay City Limits many years previous. However, it is not known if any recent sightings have been documented. The potential for San Joaquin Kit Fox occurrence in the proposed Project area is considered to be quite low given the highly disturbed and barren nature of the site and precludes the ability of the San Joaquin Kit Fox to be on-site. Impacts are ***less than significant***.

Mitigation Measures: None are required.

[7] Ch. 4 Conservation, Open Space, Parks and Recreation Element, Farmersville General Plan Part I General Plan, November 2002. Accessed June 2023.

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

c. Have a substantial adverse effect on federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Less Than Significant Impact. There are no natural waterways, sensitive natural communities, riparian habitat or protected wetlands on the Project site. As such, any impacts would be ***less than significant.***

Mitigation Measures: None are required.

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less than Significant Impacts with Mitigation. The Project could impede the use of nursery sites for native birds protected under the Migratory Bird Treaty Act (MBTA) and California Fish and Game Code (CFGC). Migratory birds are expected to nest on and near the Project site. Construction disturbance during the breeding season could result in the incidental loss of fertile eggs or nestlings or otherwise lead to nest abandonment. Disturbance that causes nest abandonment or loss of reproductive effort can be considered take under the MBTA and CFGC. Loss of fertile eggs or nesting birds, or any activities resulting in nest abandonment, could constitute a significant effect if the species is particularly rare in the region.

Construction activities such as excavating, trenching, and grading that disturb a nesting bird on the Project site or immediately adjacent to the construction zone could constitute a significant impact. Mitigation Measure BIO-1 (below) will reduce the potential effect to a ***less than significant*** level.

Mitigation Measures:

BIO-1: Protect nesting birds.

1. To the extent practicable, construction shall be scheduled to avoid the nesting season, which extends from February through August.

2. If it is not possible to schedule construction between September and January, pre-construction surveys for nesting birds shall be conducted by a qualified biologist to ensure that no active nests will be disturbed during the implementation of the Project. A pre-construction survey shall be conducted no more than 14 days prior to the initiation of construction activities. During this survey, the qualified biologist shall inspect all potential nest substrates in and immediately adjacent to the impact areas. If an active nest is found close enough to the construction area to be disturbed by these activities, the qualified biologist shall determine the extent of a construction-free buffer to be established around the nest. If work cannot proceed without disturbing the nesting birds, work may need to be halted or redirected to other areas until nesting and fledging are completed or the nest has otherwise failed for non-construction related reasons.

e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Less Than Significant Impact. The City of Farmersville's General Plan includes various policies for the protection of biological resources. The proposed Project would not conflict with any of the adopted policies and any impacts would be considered ***less than significant***.

Mitigation Measures: None are required.

f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. There are no adopted habitat conservation plans that apply to the Project site. There is no impact.

Mitigation Measures: None are required.

V. CULTURAL RESOURCES

Would the project:

		Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a.	Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	☐	☒	☐	☐
b.	Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	☐	☒	☐	☐
c.	Disturb any human remains, including those interred outside of formal cemeteries?	☐	☒	☐	☐

RESPONSES

a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?

Less Than Significant Impact with Mitigation. A cultural records search was conducted by the Southern San Joaquin Valley Information Center (SSJVIC) on May 30, 2023 (RS 23-182, Appendix B). The records search conducted at the SSJVIC indicated that there are no recorded cultural resources within the Project area. There are three recorded resources within the one-half mile radius: P-54-003229, 004885, & 005296. These resources consist primarily of a historic era ranch, single family property, industrial building, and a canal. There are no recorded cultural resources within the Project area or radius that are listed in the National Register of Historic Places, the California Register of Historical Resources, the California Points of Historical Interest, California Inventory of Historic Resources, or the California State Historic Landmarks.

There have been no previous cultural resource studies completed within the project area. There have been ten studies completed within the one-half mile radius: TU- 00121, 00134, 01033, 01144, 01171, 01179, 01499, 01718, 01783, & 01944.

While no archaeological or built environment resources were identified within the area, subsurface construction activities associated with the proposed Project could potentially damage or destroy previously undiscovered historic resources. This is considered a potentially significant impact; however,

implementation of Mitigation Measure CUL-1 will ensure that significant impacts remain ***less than significant with mitigation incorporation.***

Mitigation Measures:

CUL-1: The following measures shall be implemented:

- Before initiation of construction or ground-disturbing activities associated with the Project, the City shall require all construction personnel to be alerted to the possibility of buried cultural resources, including historic, archeological and paleontological resources;
- The general contractor and its supervisory staff shall be responsible for monitoring the construction Project for disturbance of cultural resources; and
- If a potentially significant historical, archaeological, or paleontological resource, such as structural features, unusual amounts of bone or shell, artifacts, human remains, or architectural remains or trash deposits are encountered during subsurface construction activities (i.e., trenching, grading), all construction activities within a 100-foot radius of the identified potential resource shall cease until a qualified archaeologist evaluates the item for its significance and records the item on the appropriate State Department of Parks and Recreation (DPR) forms. The archaeologist shall determine whether the item requires further study. If, after the qualified archaeologist conducts appropriate technical analyses, the item is determined to be significant under California Environmental Quality Act, the archaeologist shall recommend feasible mitigation measures, which may include avoidance, preservation in place or other appropriate measure, as outlined in Public Resources Code section 21083.2. The City of Farmersville shall implement said measures.

b. <u>Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?</u>

Less Than Significant Impact with Mitigation. The possibility exists that subsurface construction activities may encounter undiscovered archaeological resources. This would be a potentially significant impact. Implementation of Mitigation Measure CUL-1 would require inadvertently discovery practices to be implemented should previously undiscovered archeological resources be located. As such, impacts to undiscovered archeological resources would be ***less than significant with mitigation incorporation.***

c. Disturb any human remains, including those interred outside of formal cemeteries?

Less Than Significant Impact with Mitigation. There are no unique geological features or known fossil-bearing sediments in the vicinity of the proposed Project site. However, there remains the possibility for previously unknown, buried paleontological resources or unique geological sites to be uncovered during subsurface construction activities. Therefore, this would be a potentially significant impact. Mitigation is proposed requiring standard inadvertent discovery procedures to be implemented to reduce this impact to a level of ***less than significant with mitigation incorporation***.

Mitigation Measures:

CUL-2: The Project applicant shall incorporate into the construction contract(s) a provision that in the event a fossil or fossil formations are discovered during any subsurface construction activities for the proposed Project (i.e., trenching, grading), all excavations within 100 feet of the find shall be temporarily halted until the find is examined by a qualified paleontologist, in accordance with Society of Vertebrate Paleontology standards. The paleontologist shall notify the Project applicant, who shall coordinate with the paleontologist as to any necessary investigation of the find. If the find is determined to be significant under CEQA, the City shall implement those measures, which may include avoidance, preservation in place, or other appropriate measures, as outlined in Public Resources Code section 21083.2.

VI. ENERGY

Would the project:	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☒	☐
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☒	☐

RESPONSES

The following information was provided by an Air Quality, Health Risk Analysis, Greenhouse Gas, and Energy Technical Memorandum that was performed on behalf of the proposed Project by Johnson, Johnson & Miller Air Quality Consulting Services, report date September, 2023. The report can be read in its entirety in Appendix A.

a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less Than Significant Impact. The proposed Project would be served with electricity provided by Eastside Power Authority or Southern California Edison (SCE).

Methodology

The energy requirements for the proposed Project were determined using the construction and operational estimates generated from the Air Quality Analysis (refer to Attachment A of Appendix A for related CalEEMod output files). The calculation worksheets for diesel fuel consumption rates for off-road construction equipment and on-road vehicles are provided in Attachment C (Energy Consumption Calculations) of Appendix A. Short-term construction energy consumption is discussed below.

Short-Term Construction

Off-Road Equipment

Table provides estimates of the Project's construction fuel consumption from off-road construction equipment for the entire Project, categorized by construction activity.

Table 9
Construction Off-Road Fuel Consumption

Project Component	Construction Activity	Fuel Consumption (gallons)
Gardenia Gardens Project (On-site, Off-road Equipment Use)	Site Preparation	912
	Grading	1,015
	Building Construction	9,082
	Paving	507
	Architectural Coating	59
Total Construction Off-Road Fuel Consumption		**11,575**
Source: Energy Consumption Calculations (Attachment C of Appendix A).		

As shown in Table , use of off-road equipment associated with construction of the proposed Project is estimated to consume approximately 11,575 gallons of diesel fuel over the entire construction duration. There are no unusual Project characteristics that would necessitate the use of construction equipment that would be less energy efficient than at comparable construction sites in the City of Farmersville, the larger Tulare County region, or other parts of California. Therefore, it is expected that construction fuel consumption associated with the proposed Project would not be any more inefficient, wasteful, or unnecessary than at other construction sites in the region.

On-Road Vehicles

On-road vehicles for construction workers, vendors, and haulers would require fuel for travel to and from the site during construction. Table 10 provides an estimate of the total on-road vehicle fuel usage during construction. There are no unusual Project characteristics that would necessitate the use of construction equipment that would be less energy efficient than at comparable construction sites in other parts of Farmersville or the Tulare County region. Therefore, it is expected that construction fuel consumption associated with the proposed Project would not be any more inefficient, wasteful, or unnecessary than at other construction sites in the region.

Table 10
Construction On-Road Fuel Consumption

	Project Component	Total Annual Fuel Consumption (gallons)
Gardenia Gardens Project (On-road Fuel Consumption)	Site Preparation	107
	Grading	4,323
	Building Construction	8,510

	Project Component	Total Annual Fuel Consumption (gallons)
	Paving	194
	Architectural Coating	177
Total Construction On-Road Fuel Consumption		**13,311**
Source: Energy Consumption Calculations (Attachment C of Appendix A).		

As summarized in Table and Table 10, the proposed Project would require 11,575 gallons of diesel fuel for construction off-road equipment and 13,311 gallons of gasoline and diesel for on-road vehicles during construction. There are no unusual Project characteristics that would necessitate the use of construction equipment that would be less energy efficient than at comparable construction sites in the region or other parts of the state. In addition, the overall construction schedule and process is already designed to be efficient in order to avoid excess monetary costs. For example, equipment and fuel are not typically used wastefully due to the added expense associated with renting the equipment, maintaining it, and fueling it. Therefore, it is expected that construction fuel consumption associated with the proposed Project would not be any more inefficient, wasteful, or unnecessary than at other construction sites in the region, and as such, impacts would be less than significant.

Other Energy Consumption Anticipated During Project Construction

Other equipment could include construction lighting, field services (office trailers), and electrically driven equipment such as pumps and other tools. The Project site is located in the City of Farmersville. As construction activities would occur primarily during daylight hours, it is anticipated that the use of construction lighting would be minimal. Singlewide mobile office trailers, which are commonly used in construction staging areas, generally range in size from 160 square feet to 720 square feet. A typical 720-square-foot office trailer would consume approximately 14,885 kWh during the approximate 1.07-year construction phase (Attachment C of Appendix A).

Long-Term Energy Demand

Building Energy Demand

As shown in

Table 3 and Table 4, the proposed Project is estimated to demand 902,208 kilowatt-hours (KWhr) of electricity and 2,434,546 1,000-British Thermal Units (kBTU) of natural gas, respectively, on an annual basis.

Table 3
Long-Term Electricity Usage

Land Use	Total Electricity Demand (KWhr/year)
Apartments Low Rise (Multifamily Resisential)	184,398
Health Club (Multifamily Community Center)	18,646
Retirement Community (Senior Living Housing)	193,617
Strip Mall	71,687
Fast Food Restaurant with Drive Thru	260,706
Parking Lot	173,154
Total Project Consumption	**902,208**
Source: Energy Consumption Calculations (Attachment C of Appendix A).	

Table 4
Long-Term Natural Gas Usage

Land Use	Total Natural Gas Demand (kBTU/year)
Apartments Low Rise (Multifamily Resisential)	720,004
Health Club (Multifamily Community Center)	82,265
Retirement Community (Senior Living Housing)	756,004
Strip Mall	42,055
Fast Food Restaurant with Drive Thru	834,218
Parking Lot	0
Total Project Consumption	**2,434,546**
Source: Energy Consumption Calculations (Attachment C of Appendix A).	

Buildings and infrastructure constructed pursuant to the proposed Project would comply with the versions of CCR Titles 20 and 24, including California Green Building Standards (CALGreen), that are applicable at the time that building permits are issued. The proposed Project is estimated to demand 902,208 KWhr of electricity per year and 2,434,546 kBTU of natural gas per year. As the Project site is currently undeveloped, this would represent an increase in demand for electricity and natural gas.

It would be expected that building energy consumption associated with the proposed Project would not be any more inefficient, wasteful, or unnecessary than for any other similar buildings in the City of Farmersville or the larger Tulare County region. Current state regulatory requirements for new building construction contained in the 2022 CALGreen and Title 24 standards apply to both residential and non-residential buildings and would increase energy efficiency and reduce energy demand in comparison to most existing development, and therefore would reduce actual environmental effects associated with energy use from the proposed Project. Additionally, the CALGreen and Title 24 standards have increased efficiency standards through each update. The most recent 2022 standards became effective January 1, 2023 and will be updated in the next cycle that will become effective at the start of 2026. Therefore, while the proposed Project would result in increased electricity and natural gas demand, electricity and natural gas would be consumed more efficiently than most existing development due to compliance with the latest building standards.

Based on the above information, the proposed Project would not result in the inefficient or wasteful consumption of electricity or natural gas, and impacts would be ***less than significant***.

Transportation Energy Demands

Table 5 provides an estimate of the daily and annual fuel consumed by vehicles traveling to and from the proposed Project. These estimates were derived using the same assumptions used in the operational air quality analysis for the proposed Project.

Table 5
Long-Term Operational Vehicle Fuel Consumption

Vehicle Type	Percent of Vehicle Trips	Annual VMT	Average Fuel Economy (miles/ gallon)	Total Daily Fuel Consumption (gallons)	Total Annual Fuel Consumption (gallons)
Passenger Cars (LDA)	46.04	5,421,903	30.14	492.8	179,875
Light Trucks (Pickups) and Medium Vehicles	43.52	5,125,467	22.05	636.8	232,446
Light-Heavy to Medium-Heavy Diesel Trucks	6.04	711,656	11.56	168.7	61,585
Heavy-heavy Trucks	1.57	184,751	5.96	84.9	30,998
Motorcycles	2.17	255,223	41.76	16.7	6,111
Other	0.66	78,207	7.56	28.4	10,348
Total	**100**	**11,777,207**	**—**	**1,428**	**521,363**

Notes:
VMT = vehicle miles traveled
Percent of Vehicle Trips and VMT provided by CalEEMod.

Vehicle Type	Percent of Vehicle Trips	Annual VMT	Average Fuel Economy (miles/ gallon)	Total Daily Fuel Consumption (gallons)	Total Annual Fuel Consumption (gallons)
"Other" consists of buses and motor homes.					
Source: Energy Consumption Calculations (Attachment C of Appendix A).					

The daily vehicular fuel consumption is estimated to be 1,428 gallons of combined gasoline and diesel fuel. Annual consumption is estimated at 521,363 gallons. In addition, the proposed Project would constitute development within an established community and would not be opening a new geographical area for development. As such, the proposed Project would not result in unusually long trip lengths for future residents, visitors, customers, employees, or deliveries to the proposed residential and commercial mixed-use development.

The property is located near residential land uses, including adjacent single-family homes to the east of the Project site and to the west of the north half of the project site. The proposed Project would be well-positioned to accommodate an existing community and provide housing and commercial uses for planned growth. Vehicles accessing the site would be typical of vehicles accessing similar residential and commercial mixed-use development uses in the City of Farmersville, Tulare County, and surrounding areas. For these reasons, vehicular fuel consumption associated with the proposed Project would not be any more inefficient, wasteful, or unnecessary than for any other similar land use activities in the region, and impacts would be ***less than significant***.

Mitigation Measures: None are required.

b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less Than Significant Impact. The Project proposes the construction of new residential and commercial mixed-use development that would be built in accordance with all applicable rules and regulations. Compliance with established and applicable regulations would ensure that the project would not conflict with or obstruct any state or local plan for renewable energy or energy efficiency. Moreover, compliance with Title 24 standards would ensure that the proposed Project would not conflict with any energy conservation policies related to the proposed Project's building envelope, mechanical systems, and indoor and outdoor lighting. Notably, the applicable Title 24 standards require the Project to include on-site renewable energy to serve the future Project occupants and residents.

In addition, the proposed Project would constitute development within an established community. Specifically, the Project site is adjacent to built-up areas of the City of Farmersville. As such, the Project

would not be opening a new geographical area for development such that it would not result in unusually long trip lengths for future project residents or visitors. In addition, the proposed residential and commercial mixed-use development is specifically designed for increased walkability, facilitated by the proposed pedestrian connectivity throughout the Project site. For the above reasons, the proposed Project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency, and impacts would be ***less than significant***.

Mitigation Measures: None are required.

VII. GEOLOGY AND SOILS

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☒
ii. Strong seismic ground shaking?	☐	☐	☒	☐
iii. Seismic-related ground failure, including liquefaction?	☐	☐	☒	☐
iv. Landslides?	☐	☐	☒	☐
b. Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c. Be located on a geologic unit or soil that is unstable, or that would become	☐	☐	☒	☐

	unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				
d.	Be located on expansive soil, as defined in Table 18-1-B of the most recently adopted Uniform Building Code creating substantial risks to life or property?	☐	☐	☒	☐
e.	Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	☐	☐	☐	☒
f.	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☒	☐	☐

RESPONSES

a-i. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

No Impact. The proposed Project site is not located within a currently designated Alquist-Priolo Earthquake Fault Zone.[8] Since no known surface expression of active faults are believed to cross the site, fault rupture through the site is not anticipated. ***No impacts*** would occur.

Mitigation Measures: None are required.

[8] California Earthquake Hazards Zone Application, California Department of Conservation. https://maps.conservation.ca.gov/cgs/EQZApp/app/. Accessed June 2023.

a-ii. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving strong seismic ground shaking?

Less Than Significant Impact. There are no known active earthquake faults in the City of Farmersville. The proposed Project site is not located within an Alquist-Priolo Earthquake Fault Zone and no known faults cut through the local soil at the site. The closest known faults likely to affect the community are the Owens Valley fault, located about 65 miles to the east along the base of the Sierra Nevada in the Owens Valley, and the San Andreas fault located about 70 miles to the southwest in the coastal range. According to the Five County Seismic Safety Element (FCSSE), Farmersville is located in the V-1 zone, defined as an area "of hard rock alluvium on valley floors". The FCSSE further states that, "the distance to either of the faults expected to be a source of shaking is sufficiently great that shaking should be minimal and the requirements of the Uniform Building Code Zone II should be adequate for normal facilities."[9] Therefore, the impact is ***less than significant***.

Mitigation Measures: None are required.

a-iii. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving seismic-related ground failure, including liquefaction?

Less Than Significant Impact. Tulare County has extremely low seismic activity levels, although shaking may be felt from earthquakes whose epicenter lie to the south and west. The proposed Project would comply with existing building code standards or design and construction, which would minimize any impacts resulting from ground shaking or liquefaction. Due to the relatively flat topography of the proposed Project area, impacts associated with landslides are not anticipated. Impacts would be ***less than significant.***

Mitigation Measures: None are required.

a-iv. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving landslides?

[9] City of Farmersville General Plan Part II Community Profile. 2002. Page 2-4.

Less Than Significant Impact. The City of Farmersville sits on the floor of the San Joaquin Valley. The City is nearly flat which precludes the occurrence of landslides. Any potential impact is ***less than significant***.

Mitigation Measures: None are required.

b. Result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact. The City of Farmersville sits on top of the alluvial fans of the Kaweah River and its distributaries. The soil in the proposed Project area is characterized as very deep, well-drained, and with low shrink/swell potential.[10] The proposed Project site has a generally flat topography, is in an established urban area and does not include any Project features that would result in substantial soil erosion or loss of topsoil. Therefore, the impact is ***less than significant***.

Mitigation Measures: None are required.

c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less Than Significant Impact. The City of Farmersville is nearly flat and soils in the area are very deep, well drained with a low shrink/swell potential. See also Response a-ii. Any impacts would be ***less than significant.***

Mitigation Measures: None are required.

d. Be located on expansive soil, as defined in Table 18-1-B of the most recently adopted Uniform Building Code creating substantial risks to life or property?

Less Than Significant Impact. See Responses (c) and (a-ii). The impact is ***less than significant***.

Mitigation Measures: None are required.

---

[10] City of Farmersville General Plan Update Community Profile. November 2002. Page 2-2.

e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No Impact. The Project will tie into the City's existing wastewater system and will not require the installation of a septic tanks or alternate wastewater disposal system. There is ***no impact.***

Mitigation Measures: None are required.

f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less Than Significant Impact With Mitigation Incorporation. As identified in the cultural evaluation performed for the Project site, there are no known paleontological resources on or near the site (See Section V. for more details). Mitigation measures have been added that will protect unknown (buried) resources during construction, including paleontological resources. There are no unique geological features on site or in the area. Mitigation measures CUL-1 and CUL-2 shall be implemented to reduce potential impacts and as such, impacts are considered ***less than significant***.

Mitigation Measures: CUL-1 and CUL-2.

VIII. GREENHOUSE GAS EMISSIONS

Would the project:	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☒	☐
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

The following information was provided by an Air Quality, Health Risk Analysis, Greenhouse Gas, and Energy Technical Memorandum that was performed on behalf of the proposed Project by Johnson, Johnson & Miller Air Quality Consulting Services, report date September, 2023. The report can be read in its entirety in Appendix A.

RESPONSES

a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less Than Significant.

Quantification of Greenhouse Gas Emissions for Informational Purposes

Construction Emissions

GHG emissions generated during all construction activities were combined and are shown in **Error! Reference source not found.**.

Table 14
Summary of Construction-Generated Greenhouse Gas Emissions

Emissions Source	MT CO_{2e} per Year
Project Construction (2025)	280
Project Construction (2026)	48
Project Construction Total	**328**
Amortized over 30 Years	**10.9**
Notes: MTCO2e = metric tons of carbon dioxide equivalent	

Source: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A).

Operations

Operational or long-term emissions occur over the life of the Project. Sources of emissions may include motor vehicles and trucks, energy usage, water usage, waste generation, and area sources, such as landscaping activities. Operational GHG emissions associated with the proposed Project were estimated using CalEEMod 2022.1. Please see the "Assumptions" sections of the Technical Memorandum for details regarding assumptions and methodology used to estimate emissions. Operational GHG emissions for a full buildout scenario in the earliest operation year (2026) are shown in **Error! Reference source not found.**. Complete CalEEMod output files and additional supporting information are also included in Attachment A of Appendix A.

Table 15
Project Operational Greenhouse Gas Emissions (Buildout Year Scenario)

Emission Source	Unmitigated Buildout Year Total Emissions (MT CO_2e per year)
Area	33
Energy	316
Mobile (Automobiles)	446
Refrigerants	2
Water	14
Waste	80
Amortized Construction Emissions	11
Total (MT CO_2e per year)	**902**

Source of Emissions: Modeling Assumptions and CalEEMod Output Files (Attachment A of Appendix A).

The SJVAPCD has not yet adopted BPS for development projects that could be used to streamline the GHG analysis. The 29 percent GHG reduction level is based on the target established by CARB's AB 32 Scoping Plan, approved in 2008. The GHG reduction level for the State to reach 1990 emission levels by 2020 was reduced to 21.7 percent from BAU in 2020 in the 2014 First Update to the Scoping Plan to account for slower than projected growth after the 2008 recession.[11] First occupancy at the project site is expected to occur in 2026, which is after the AB 32 target year. The SJVAPCD has not updated its guidance to address SB 32 2030 targets or AB 1279 2045 targets. Therefore, whether the Project's GHG

[11] California Air Resources Board (CARB). 2014. First Update to the Climate Change Scoping Plan. Website: http://www.arb.ca.gov/cc/scopingplan/document/updatedscopingplan2013.htm. Accessed May 24, 2023.

emissions would result in a significant impact on the environment is determined by assessing consistency with relevant GHG reduction plans.

The City of Farmerville has not adopted a GHG reduction plan. In addition, the City has not completed the GHG inventory, benchmarking, or goal-setting process required to identify a reduction target and take advantage of the streamlining provisions contained in the CEQA Guidelines. The County of Tulare has adopted a Climate Action Plan; however, the County of Tulare's Climate Action Plan is only applicable to unincorporated areas of Tulare County. The SJVAPCD has adopted a Climate Action Plan, but it does not contain measures that are applicable to the project. Therefore, the SJVAPCD Climate Action Plan cannot be applied to the Project. Since no other local or regional Climate Action Plan is in place, the Project is assessed for its consistency with CARB's adopted Scoping Plans.

Consistency with CARB's Adopted Scoping Plans

Consistency with AB 32 and CARB's 2008 Scoping Plan

The State's regulatory program implementing the 2008 Scoping Plan is now fully mature. All regulations envisioned in the Scoping Plan have been adopted, and the effectiveness of those regulations has been estimated by the agencies during the adoption process and then tracked to verify their effectiveness after implementation. The combined effect of this successful effort is that the State now projects that it will meet the 2020 target and achieve continued progress toward meeting post-2020 targets. Former Governor Brown, in the introduction to Executive Order B-30-15, stated "California is on track to meet or exceed the current target of reducing greenhouse gas emissions to 1990 levels by 2020, as established in the California Global Warming Solutions Act of 2006 (AB 32)."

Consistency with SB 32 and CARB's 2017 Scoping Plan

The 2017 Climate Change Scoping Plan Update (2017 Scoping Plan) includes the strategy that the State intends to pursue to achieve the 2030 targets of Executive Order S-3-05 and SB 32. **Error! Reference source not found.** provides an analysis of the Project's consistency with the 2017 Scoping Plan Update measures.

Table 16
Consistency with SB 32 Scoping Plan

Scoping Plan Measure	Project Consistency
SB 350 50% Renewable Mandate. Utilities subject to the legislation will be required to increase their renewable energy mix from 33% in 2020 to 50% in 2030. *(The requirement is now 60% in 2030 per SB 100.)*	**Consistent**: The project will purchase electricity from a utility subject to the SB 350 Renewable Mandate.
SB 350 Double Building Energy Efficiency by 2030. This is equivalent to a 20 percent	**Not Applicable**. This measure applies to existing buildings. New structures are required to comply with Title 24 Energy Efficiency Standards that are

Scoping Plan Measure	Project Consistency
reduction from 2014 building energy usage compared to current projected 2030 levels.	expected to increase in stringency over time. New buildings (both residential and non-residential buildings) constructed as part of the proposed project would comply with the applicable Title 24 Energy Efficiency Standards in effect at the time building permits are received. The current Title 24 regulations are the 2022 Title 24 standards, which become effective January 1, 2023. The next update would become effective January 1, 2026.
Low Carbon Fuel Standard. This measure requires fuel providers to meet an 18 percent reduction in carbon content by 2030.	**Consistent**. This is a Statewide measure that cannot be implemented by a project applicant or lead agency. However, vehicles accessing the project site would be subject to the standards. Vehicles accessing the project site will use fuel containing lower carbon content as the fuel standard is implemented.
Mobile Source Strategy (Cleaner Technology and Fuels Scenario). Vehicle manufacturers will be required to meet existing regulations mandated by the LEV III and Heavy-Duty Vehicle programs. The strategy includes a goal of having 4.2 million ZEVs on the road by 2030 and increasing numbers of ZEV trucks and buses.	**Consistent**. Future project residents, visitors, customers, and employees can be expected to purchase increasing numbers of more fuel efficient and zero emission cars and trucks each year. The CALGreen Code requires electrical service in new development to be EV charger-ready. In addition, home deliveries will be made by increasing numbers of ZEV delivery trucks as the statewide fleet is expected to get cleaner over time.
Sustainable Freight Action Plan. The plan's target is to improve freight system efficiency 25 percent by increasing the value of goods and services produced from the freight sector, relative to the amount of carbon that it produces by 2030. This would be achieved by deploying over 100,000 freight vehicles and equipment capable of zero emission operation and maximize near-zero emission freight vehicles and equipment powered by renewable energy by 2030.	**Not Applicable.** The measure applies to owners and operators of trucks and freight operations. The project is residential and commercial mixed-use development and would not be considered an industrial land use or a large freight operator. However, home and business deliveries are expected to be made by increasing numbers of ZEV delivery trucks as technology continues to improve accessibility to ZEV vehicles and as regulations are phased in over time.
Short-Lived Climate Pollutant (SLCP) Reduction Strategy. The strategy requires the reduction of SLCPs by 40 percent from 2013 levels by 2030 and the reduction of black carbon by 50 percent from 2013 levels by 2030.	**Consistent**. The project is not expected to include fireplaces. However, any hearths that would be installed will only include natural gas hearths that produce very little black carbon compared with wood burning fireplaces and heaters in line with the SJVAPCD's Guidance for Assessing and Mitigating Air Quality Impacts mitigation measures.[1]
SB 375 Sustainable Communities Strategies. Requires Regional Transportation Plans to include a sustainable communities strategy for reduction of per capita vehicle miles traveled.	**Consistent**. The project will provide residential and commercial mixed-use development in the region that is consistent with the Regional Transportation Plan/Sustainable Communities Strategy (SCS) strategy to increase development densities to reduce VMT.
Post-2020 Cap-and-Trade Program. The Post 2020 Cap-and-Trade Program continues the existing program for another 10 years. The Cap-and-Trade Program applies to large	**Consistent.** The post-2020 Cap-and-Trade Program indirectly affects people who use the products and services produced by the regulated industrial sources when increased cost of products or services (such as electricity and fuel) are

Scoping Plan Measure	Project Consistency
industrial sources such as power plants, refineries, and cement manufacturers.	transferred to the consumers. The Cap-and-Trade Program covers the GHG emissions associated with electricity consumed in California, whether generated in-state or imported. Accordingly, GHG emissions associated with CEQA projects' electricity usage are covered by the Cap-and-Trade Program. The Cap-and-Trade Program also covers fuel suppliers (natural gas and propane fuel providers and transportation fuel providers) to address emissions from such fuels and from combustion of other fossil fuels not directly covered at large sources in the program's first compliance period.
Natural and Working Lands Action Plan. CARB is working in coordination with several other agencies at the federal, state, and local levels, stakeholders, and with the public, to develop measures as outlined in the Scoping Plan Update and the governor's Executive Order B-30-15 to reduce GHG emissions and to cultivate net carbon sequestration potential for California's natural and working land.	**Not Applicable**. The project is a residential and commercial mixed-use development and will not be considered natural or working lands.
Source: California Air Resources Board (CARB). 2017. The 2017 Climate Change Scoping Plan Update. January 20. Website: https://www.arb.ca.gov/cc/scopingplan/2030sp_pp_final.pdf. Accessed September 2023. [1] San Joaquin Valley Air Pollution Control District (SJVAPCD). 2015. Guidance for Assessing and Mitigating Air Quality Impacts. Website: https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMA. Accessed September 2023.	

As described in **Error! Reference source not found.**, the proposed Project would be consistent with applicable 2017 Scoping Plan Update measures and would not obstruct the implementation of others that are not applicable. The State's regulatory program is able to target both new and existing development because the two most important strategies, motor vehicle fuel efficiency and emissions from electricity generation, obtain reductions equally from existing sources and new sources. This is because all vehicle operators use cleaner low carbon fuels and buy vehicles subject to the fuel efficiency regulations and all building owners or operators purchase cleaner energy from the grid that is produced by increasing percentages of renewable fuels. This includes regulations on mobile sources such as the Pavley standards that apply to all vehicles purchased in California, the LCFS (Low Carbon Fuel Standard) that applies to all fuel sold in California, and the Renewable Portfolio Standard and Renewable Energy Standard under SB 100 that apply to utilities providing electricity to all California end users.

Moreover, the Scoping Plan strategy will achieve more than average reductions from energy and mobile source sectors that are the primary sources related to development projects and lower than average reductions from other sources such as agriculture. The proposed residential and commercial mixed-use development Project's operational GHG emissions would principally be generated from electricity consumption and vehicle use, which are directly under the purview of the Scoping Plan strategy and have experienced reductions above the State average reduction. Considering the information

summarized above, the proposed Project would be consistent with the State's AB 32 and SB 32 GHG reduction goals.

Consistency Regarding GHG Reduction Goals for 2050 under Executive Order S-3-05 and GHG Reduction Goals for 2045 under CARB's 2022 Scoping Plan

Regarding goals for 2050 under Executive Order S-3-05, at this time it is not possible to quantify the emissions savings from future regulatory measures, as they have not yet been developed; nevertheless, it can be anticipated that operation of the proposed Project would comply with whatever measures are enacted that State lawmakers decide would lead to an 80 percent reduction below 1990 levels by 2050. In its 2008 Scoping Plan, CARB acknowledged that the "measures needed to meet the 2050 are too far in the future to define in detail." In the First Scoping Plan Update; however, CARB generally described the type of activities required to achieve the 2050 target: "energy demand reduction through efficiency and activity changes; large scale electrification of on-road vehicles, buildings, and industrial machinery; decarbonizing electricity and fuel supplies; and rapid market penetration of efficiency and clean energy technologies that requires significant efforts to deploy and scale markets for the cleanest technologies immediately."

CARB recognized that AB 32 established an emissions reduction trajectory that will allow California to achieve the more stringent 2050 target: "These [greenhouse gas emission reduction] measures also put the State on a path to meet the long-term 2050 goal of reducing California's GHG emissions to 80 percent below 1990 levels. This trajectory is consistent with the reductions that are needed globally to stabilize the climate." In addition, CARB's First Update "lays the foundation for establishing a broad framework for continued emission reductions beyond 2020, on the path to 80 percent below 1990 levels by 2050," and many of the emission reduction strategies recommended by CARB would serve to reduce the proposed Project's post-2020 emissions level to the extent applicable by law:

- **Energy Sector:** Continued improvements in California's appliance and building energy efficiency programs and initiatives, such as the State's zero net energy building goals, would serve to reduce the proposed project's emissions level. Additionally, further additions to California's renewable resource portfolio would favorably influence the project's emissions level.

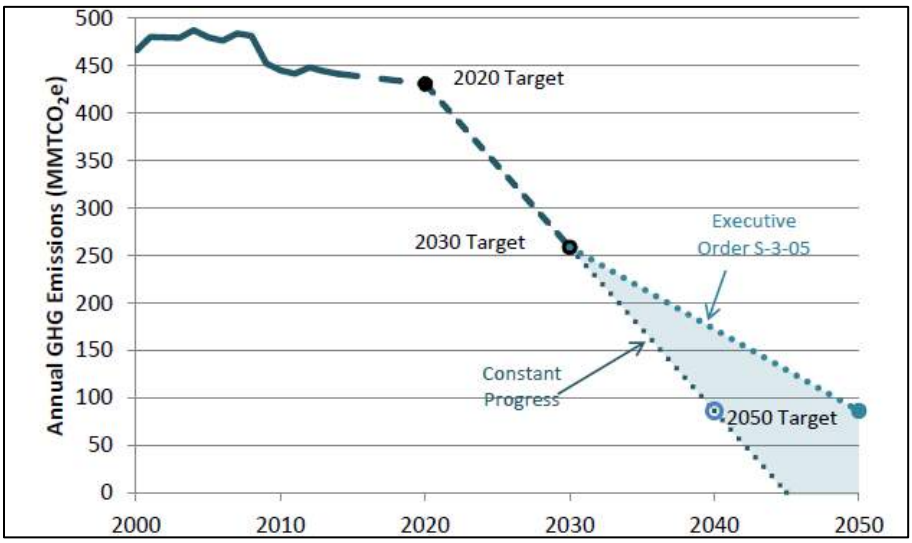
- **Transportation Sector:** Anticipated deployment of improved vehicle efficiency, zero emission technologies, lower carbon fuels, and improvement of existing transportation systems all will serve to reduce the project's emissions level.

- **Water Sector:** The project's emissions level will be reduced as a result of further desired enhancements to water conservation technologies.

- **Waste Management Sector:** Plans to further improve recycling, reuse and reduction of solid waste will beneficially reduce the project's emissions level.

For the reasons described above, the Project's post-2020 emissions trajectory is expected to follow a declining trend, consistent with the 2030 and 2050 targets. The trajectory required to achieve the post-2020 targets is shown in Figure 4.

Figure 4
California's Path to Achieving the 2050 Target



Source: CARB 2017 Scoping Plan Update

In his January 2015 inaugural address, former Governor Brown expressed a commitment to achieve "three ambitious goals" that he would like to see accomplished by 2030 to reduce the State's GHG emissions:

- Increasing the State's Renewable Portfolio Standard from 33 percent in 2020 to 50 percent in 2030;
- Cutting the petroleum use in cars and trucks in half; and
- Doubling the efficiency of existing buildings and making heating fuels cleaner.

These expressions of executive branch policy may be manifested in adopted legislative or regulatory action through the state agencies and departments responsible for achieving the State's environmental policy objectives, particularly those relating to global climate change. Studies show that the State's existing and proposed regulatory framework will allow the State to reduce its GHG emissions level to 40 percent below 1990 levels by 2030, and to 80 percent below 1990 levels by 2050. Even though these studies did not provide an exact regulatory and technological roadmap to achieve the 2030 and 2050 goals, they demonstrated that various combinations of policies could allow the statewide emissions level to remain

very low through 2050, suggesting that the combination of new technologies and other regulations not analyzed in the studies could allow the State to meet the 2050 target.

Given the proportional contribution of mobile source-related GHG emissions to the State's inventory, recent studies also show that relatively new trends—such as the increasing importance of web-based shopping, the emergence of different driving patterns, and the increasing effect of web-based applications on transportation choices—are beginning to substantially influence transportation choices and the energy used by transportation modes. These factors have changed the direction of transportation trends in recent years and will require the creation of new models to effectively analyze future transportation patterns and the corresponding effect on GHG emissions. For the reasons described above, the proposed Project's future emissions trajectory is expected to follow a declining trend, consistent with the 2030, 2045, and 2050 targets.

The 2017 Scoping Plan provides an intermediate target that is intended to achieve reasonable progress toward the 2050 target. In addition, the 2022 Scoping Plan outlines objectives, regulations, planning efforts, and investments in clean technologies and infrastructure that outlines how the State can achieve carbon-neutrality by 2045. Accordingly, taking into account the proposed Project's design features and the progress being made by the State towards reducing emissions in key sectors such as transportation, industry, and electricity, the proposed Project would be consistent with State GHG Plans and would further the State's goals of reducing GHG emissions 40 percent below 1990 levels by 2030, carbon neutral by 2045, and 80 percent below 1990 levels by 2050, and does not obstruct their attainment.

Summary

As described above, the proposed Project would be consistent with State GHG Plans and would not obstruct the State's ability to meet its goals of reducing GHG emissions 40 percent below 1990 levels by 2030, carbon neutral by 2045, and 80 percent below 1990 levels by 2050. Therefore, the Project's generation of GHG emissions would result in a ***less than significant impact*** on the environment.

Mitigation Measures: None are required.

b. <u>Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?</u>

Less Than Significant. As discussed under Impact VIII(a), neither the City of Farmersville nor the County of Tulare have adopted a GHG reduction plan that would be applicable to the proposed Project. In addition, the City of Farmersville has not completed the GHG inventory, benchmarking, or goal-setting process required to identify a reduction target and take advantage of the streamlining provisions

contained in the CEQA Guidelines. The SJVAPCD has adopted a Climate Action Plan, but it does not contain measures that are applicable to the Project. Therefore, the SJVAPCD Climate Action Plan cannot be applied to the Project. The County of Tulare has adopted a Climate Action Plan; however, the County of Tulare's Climate Action Plan is only applicable to unincorporated areas of Tulare County and would not be appliable to the proposed Project. Since no other local or regional Climate Action Plan is in place, the Project is assessed for its consistency with CARB's adopted Scoping Plans. This assessment is included under Impact VIII(a) above. As demonstrated above, the Project would not conflict with any applicable plan, policy, or regulation of an agency adopted to reduce the emissions of greenhouse gases. This impact would be ***less than significant***.

Mitigation Measures: None required.

IX. HAZARDS AND HAZARDOUS MATERIALS

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☒	☐
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒
f. Impair implementation of or physically interfere with an adopted emergency	☐	☐	☐	☒

	response plan or emergency evacuation plan?				
g.	Expose people or structures either directly or indirectly to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

RESPONSES

a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less Than Significant Impact. The proposed Project would include the development of two fully affordable multi-family projects for a total of 82 units and three commercial pads. The development also includes a community building, basketball court, bocce ball court, dog parks, retention basins, and parking spaces. The site construction will also include internal access roads, lighting, site landscaping and additional related improvements.

Proposed Project construction activities may involve the use and transport of hazardous materials. These materials may include fuels, oils, mechanical fluids, and other chemicals used during construction. Transportation, storage, use, and disposal of hazardous materials during construction activities would be required to comply with applicable federal, state, and local statutes and regulations. Compliance would ensure that human health and the environment are not exposed to hazardous materials. In addition, the Project would be required to comply with the National Pollutant Discharge Elimination System (NPDES) permit program through the submission and implementation of a Stormwater Pollution Prevention Plan during construction activities to prevent contaminated runoff from leaving the project site. Therefore, no significant impacts would occur during construction activities.

The operational phase of the proposed Project would occur after construction is completed and employees and residents move in to occupy the structures on a day-to-day basis. The proposed Project includes land uses that are considered compatible with the surrounding uses upon approval of the General Plan Amendment and Zone Change Approval. None of these land uses routinely transport, use, or dispose of hazardous materials, or present a reasonably foreseeable release of hazardous materials, with the exception of common commercial grade hazardous materials such as household and commercial cleaners, paint, etc. The proposed Project would not create a significant hazard through the routine transport, use, or disposal of hazardous materials, nor would a significant hazard to the public or to the environment through the reasonably foreseeable upset and accidental conditions involving the

likely release of hazardous materials into the environment occur. Therefore, the proposed Project will not create a significant hazard to the public or the environment and any impacts would be ***less than significant***.

Mitigation Measures: None are required.

b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant Impact. See Response a. above. Any accumulated hazardous construction or operational wastes will be collected and transported away from the site in compliance with all federal, state and local regulations. Any impacts would be ***less than significant***.

Mitigation Measures: None are required.

c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Less Than Significant Impact. Farmersville High School is approximately 0.3 miles southeast of the proposed Project site. Construction-related activities will be intermittent, temporary, and short-term, and are not anticipated to result in the release of hazardous emissions, involve hazardous materials, or create a hazard to the school. As noted earlier, the proposed Project includes the development of general commercial and multi-family residences, hence it is not reasonably foreseeable that the Project will cause a significant impact by emitting hazardous waste or bringing hazardous materials. General commercial and residential land uses do not generate, store, or dispose of significant quantities of hazardous materials. Such uses also do not normally involve dangerous activities that could expose persons onsite or in the surrounding areas to large quantities of hazardous materials. See also Responses a. and b. regarding hazardous material handling. The impact is ***less than significant.***

Mitigation Measures: None are required.

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. The proposed Project site is not located on a list of hazardous materials sites complied pursuant to Government Code Section 65962.5 (Geotracker[12] and DTSC Envirostor[13] databases – accessed in July 2023). There are no hazardous materials sites that impact the Project. As such, ***no impacts*** would occur that would create a significant hazard to the public or the environment.

Mitigation Measures: None are required.

e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

No Impact. The proposed Project site is approximately 5.7 miles northwest of the Exeter Airport and the airport's safety zones do not extend into the City of Farmersville. There is ***no impact***.

Mitigation Measures: None are required.

f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

No Impact. The Project will not interfere with any adopted emergency response or evacuation plan. Construction activities will take place within right-of-ways of existing roadways. Construction activities will be temporary in nature and will not cause any road closures that could interfere with any adopted emergency response or evacuation plan. The construction contractor will be required to work with the City and County (public works, police/fire, etc.) if and when roadway diversions are required to ensure that adequate access is maintained for residents and emergency vehicles. There is ***less than significant impact.***

Mitigation Measures: None are required.

[12] GeoTracker, State Water Resources Control Board. https://geotracker.waterboards.ca.gov/. Accessed July 2023.

[13] EnviroStor, Department of Toxic Substances Control. https://www.envirostor.dtsc.ca.gov/public/. Accessed July 2023.

g. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

No Impact. The site is surrounded by urban uses and as such, there are no wildlands on or near the Project site. There is ***no impact***.

Mitigation Measures: None are required.

X. HYDROLOGY AND WATER QUALITY

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	☐	☐	☒	☐
i. Result in substantial erosion or siltation on- or off- site;	☐	☐	☒	☐
ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	☐	☐	☒	☐
iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐
iv. impede or redirect flood flows?	☐	☐	☒	☐

X. HYDROLOGY AND WATER QUALITY

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☒	☐
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐

According to the City's Comprehensive Infrastructure Management Plan (CIMP), eight well sites are located in the City's water distribution system. On average, the wells can each produce around 700 gallons per minute (gpm), and are considered fairly shallow, with groundwater depths encountered approximately 60 feet below ground surface. [14]

The Kaweah Basin is the source of all drinking water supply for the City of Farmersville and surrounding communities. The Kaweah Delta Water Conservation District (KDWCD) manages the Basin. KDWCD and other irrigation districts and companies have historically managed groundwater through the conjunctive use of surface water. KDWCD regularly provides programs that benefit local agricultural customers by making available additional surface water supplies for irrigation. These programs effectively reduce the withdrawals of groundwater resulting in in-lieu recharge of the aquifer. Groundwater is normally used by agriculture as an alternate source when surface supplies are not available and is the sole source in areas within KDWCD jurisdiction that do not have access to surface water.

RESPONSES

a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

[14] Comprehensive Infrastructure Management Plan, City of Farmersville. November 2012. Pg 4-2

Less Than Significant Impact.

Construction

Grading, excavation and loading activities associated with construction activities could temporarily increase runoff, erosion, and sedimentation. Construction activities also could result in soil compaction and wind erosion effects that could adversely affect soils and reduce the revegetation potential at construction sites and staging areas.

Three general sources of potential short-term construction-related stormwater pollution associated with the proposed project are: 1) the handling, storage, and disposal of construction materials containing pollutants; 2) the maintenance and operation of construction equipment; and 3) earth moving activities which, when not controlled, may generate soil erosion and transportation, via storm runoff or mechanical equipment. Generally, routine safety precautions for handling and storing construction materials may effectively mitigate the potential pollution of stormwater by these materials. These same types of common sense, "good housekeeping" procedures can be extended to non-hazardous stormwater pollutants such as sawdust and other solid wastes.

Poorly maintained vehicles and heavy equipment leaking fuel, oil, antifreeze, or other fluids on the construction site are also common sources of stormwater pollution and soil contamination. In addition, grading activities can greatly increase erosion processes. Two general strategies are recommended to prevent construction silt from entering local storm drains. First, erosion control procedures should be implemented for those areas that must be exposed. Secondly, the area should be secured to control offsite migration of pollutants. These Best Management Practices (BMPs) would be required in the Stormwater Pollution Prevention Plan (SWPPP) to be prepared prior to commencement of Project construction. When properly designed and implemented, these "good-housekeeping" practices are expected to reduce short-term construction-related impacts to less than significant.

In accordance with the National Pollution Discharge Elimination System (NPDES) Stormwater Program, the Project will be required to comply with existing regulatory requirements to prepare a SWPPP designed to control erosion and the loss of topsoil to the extent practicable using BMPs that the Regional Water Quality Control Board (RWQCB) has deemed effective in controlling erosion, sedimentation, runoff during construction activities. The specific controls are subject to the review and approval by the RWQCB and are an existing regulatory requirement.

Operation

The proposed Project includes the construction and operation of a multifamily housing consisting of 82 units, community areas and three commercial/retail pads including parking spaces, internal access roads,

lighting, site landscaping, and other improvements. The Project will tie into the existing City water and wastewater systems.

The proposed Project will result in wastewater from residential units and commercial structures that will be discharged into the City's existing wastewater treatment system. The wastewater will be typical of other urban/residential developments consisting of bathrooms, kitchen drains and other similar features. The Project will not discharge any unusual or atypical wastewater. Site buildout has been planned for and anticipated in the City's planning documents. Therefore, the proposed Project will not result in additional production of wastewater that was not already accounted for in the City's infrastructure planning documents.

The Project will comply with all City ordinances and standards to assure proper grading and drainage. Compliance with all local, state, and federal regulations will prevent violation of water quality standards or waste discharge requirements. The proposed Project will be required to prepare a grading and drainage plan for review and approval by the City Engineer, prior to issuance of building permits.

Additionally, there will be no discharge to any surface or groundwater source. As such, the proposed Project will not violate any water quality standards and will not impact waste discharge requirements. The impact will be ***less than significant***.

Mitigation Measures: None are required.

b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Than Significant Impact. The City of Farmersville will provide water services upon development. The City of Farmersville's water supply comes from groundwater extraction. The City of Farmersville is located in the Kaweah Subbasin area and falls under the Greater Kaweah Groundwater Sustainability Agency (GKGSA). The Kaweah Subbasin is classified as high-priority, according to California Water Code § 10933 (b) and has been designated a critically overdrafted by the California Department of Water Resources (DWR).[15] GKGSA acknowledges a continuing decline in groundwater levels of the aquifer system below the Farmersville area.

[15] Executive Summary, Greater Kaweah Groundwater Sustainability Agency Groundwater Sustainability Plan. January 2020. https://greaterkaweahgsa.org/resources/.

The City of Farmersville General Plan has designated the site for urban development as an such, site development has been included and planned for in the City's infrastructure planning documentation. To assist in mitigating the groundwater decline, the City of Farmersville has established fees that are charged to new development, which will fund groundwater recharge and other water resource projects within the City. Project implementation would not affect groundwater supplies beyond what has already been accounted for. Impacts would be ***less than significant.***

Mitigation Measures: None are required.

c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

   i. result in substantial erosion or siltation on- or offsite;

   ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;

   iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

   iv. impede or redirect flood flows?

Less Than Significant Impact. The site is currently vacant with minimal vegetation. The proposed Project will change drainage patterns of the site through the installation of impervious surfaces and structures (apartment complex, commercial pads, driveways, parking areas, streets, etc.) and will be required by the City to be graded to facilitate proper stormwater drainage into the stormwater basin included with the Project. Storm water during construction will be managed as part of the Storm Water Pollution Prevention Plan (SWPPP). A copy of the SWPPP will be retained on-site during construction.

The commercial buildings and residential dwellings will be built in accordance with the current California Building Code and the on-site retention basins have been appropriately sized to accommodate potential flood waters. Accordingly, the chance of flooding (and therefore the release of pollutants due to flooding) at the site is remote. Impacts are ***less than significant.***

Mitigation Measures: None are required.

d. In flood hazard, tsunami or seiche zones, risk release of pollutants due to project inundation?

e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant Impact. The proposed Project site is located within Zone X, which experiences minimal flood hazards, as indicated by FEMA flood hazard map 06107C0954E, effective 6/15/2009.[16] The site development includes retention basins and will be designed for adequate storm drainage and will be required to prepare and submit a water quality control plan to be implemented during construction, as required by the National Pollutant Discharge Elimination System. This plan must be reviewed and approved by the City Engineer prior to the start of construction.

There are no inland water bodies that could be potentially susceptible to a seiche in the Project vicinity. This precludes the possibility of a seiche inundating the Project site. The Project site is more than 100 miles from the Pacific Ocean, a condition that precludes the possibility of inundation by tsunami. There are no steep slopes that would be susceptible to a mudflow in the Project vicinity, nor are there any volcanically active features that could produce a mudflow in the City of Farmersville. This precludes the possibility of a mudflow inundating the Project site. Any impacts are ***less than significant***.

Mitigation Measures: None are required.

LAND USE AND PLANNING

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Physically divide an established community?	☐	☐	☐	☒
b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☒

[16] National Flood Hazard Layer (NFHL) Viewer, FEMA. https://www.fema.gov/flood-maps/national-flood-hazard-layer. Accessed August 2023.

RESPONSES

a. Physically divide an established community?

b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the General Plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

No Impact. The proposed Project would include the development of two fully affordable multi-family projects for a total of 82 residential units and up to 13,950 square feet of commercial space. The northern portion of the Project site would consist of four buildings of senior housing developments with a total of 42 units, a commercial pad, community area, fenced dog park, bocce ball court, community garden, retention basins, and 97 parking spaces. The southern portion of the Project site would consist of an apartment complex with five residential buildings consisting of a total of 40 units, a community building, two commercial/retail pads, dog park, basketball court, retention basins, and 92 parking spaces. This apartment complex would include residential units, tot lot, half-basketball court, fenced dog park, on-site laundry facility, and outdoor picnic-barbeque area. The site construction will also include internal access roads, lighting, site landscaping and additional related improvements.

The proposed Project is located in the northeastern portion of the City of Farmersville within city limits, in an area of suburban residential and commercial land uses. The proposed Project site covers approximately 9.4 acres and consists of vacant land with minimal vegetation. The site is zoned General Commercial (C-G) and is also designated General Commercial by the Farmersville General Plan. The proposed Project includes a General Plan Amendment for the land use change of the eastern portion of the site to "Multi-Family Residential", and a Zone Change to "Multi-Family Residential (R-M)". Upon approval the Project will be in compliance with the General Plan and zoning ordinance.

The proposed Project will extend an existing community in the region. The Project has no characteristics that would physically divide the City of Farmersville. Access to the existing surrounding areas will be improved. ***No impacts*** would occur as a result of this Project.

Mitigation Measures: None are required.

XII. MINERAL RESOURCES

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

RESPONSES

a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact. The most economically important minerals that are extracted in Tulare County are sand, gravel, crushed rock, and natural gas. The four streams that have provided the main source of high-quality sand and gravel in Tulare County to make Portland cement concrete and asphaltic concrete are the Kaweah River, Lewis Creek, Deer Creek and the Tule River[17].

[17] Tulare County General Plan 2030 Update Recirculated Draft EIR. February 2010. Page 3.7-9.

The proposed Project area is not included in a State classified mineral resource zone[18], and the Kaweah River is approximately 1.7 miles northwest of the Project site. Therefore, there is ***no impact***.

Mitigation Measures: None are required.

XIII. NOISE

Would the project:	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b. Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

RESPONSES

a. <u>Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?</u>

[18] Ibid. Page 3.7-10.

b. Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact. The City of Farmersville General Plan does not include a noise element, but rather states that the City has adopted Tulare County's Noise Element. The County of Tulare Noise Element of the General Plan (August 2012) establishes noise level criteria in terms of the Day-Night Average Level (Ldn) metric. The Ldn is the time-weighted energy average noise level for a 24-hour day, with a 10 dB penalty added to noise levels occurring during the nighttime hours (10:00 p.m.-7:00 a.m.). The Ldn represents cumulative exposure to noise over an extended period of time and is therefore calculated based upon *annual average* conditions.

Site development may increase ambient noise levels in the Project vicinity beyond those already present on the site from the residential activity. In the short term, noise levels would be raised during construction of the Project phases by the operation of heavy equipment and other associated activities. Because construction noise would generally occur intermittently on Monday through Saturdays during daylight hours, per the Farmersville Noise Ordinance, the impact of noise in surrounding land uses is not expected to be significant.

In the long term, any development would add traffic and other sources of noise that will somewhat increase the ambient noise levels in the vicinity. However, these noise levels should be relatively consistent with those experienced in the area and other existing developed areas of Farmersville.

Typical outdoor sources of perceptible ground borne vibration are construction equipment, steel-wheeled trains, and traffic on rough roads. Construction vibrations can be transient, random, or continuous. Construction associated with the proposed Project includes the construction of multifamily housing consisting of 48 units along with grocery store, oil change/car wash, fueling station, convenience store with drive-thru, and general commercial. The site construction will also include internal access roads, lighting, site landscaping and additional related improvements.

The approximate threshold of vibration perception is 65 VdB, while 85 VdB is the vibration acceptable only if there are an infrequent number of events per day. Table 17 describes the typical construction equipment vibration levels.

Table 17
Typical Construction Vibration Levels

Equipment	VdB at 25 ft
Small Bulldozer	58
Jackhammer	79

Vibration from construction activities will be temporary and not exceed the Federal Transit Administration (FTA) threshold for the nearest residences which are located adjacent to the project site on the eastern boundary. As such, any impacts resulting from an increase in ambient noise levels or excessive groundborne vibration will be ***less than significant.***

c. For a project located within the vicinity of a private airstrip or an airport land use plan, or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. The Project is not located within an airport land use plan. Therefore, there is ***no impact***.

Mitigation Measures: None are required.

XIV. POPULATION AND HOUSING

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐
b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☒	☐

RESPONSES

a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less Than Significant Impact. The proposed Project would include the development of a 9.4-acre parcel for two fully affordable multi-family projects for a total of 82 units, three commercial/retail pads and community areas. The site construction will also include parking spaces, internal access roads, lighting, site landscaping and additional related improvements. The 9.4-acre site is currently designated and zoned for general commercial. The eastern portion of the site is proposed for the General Plan Amendment and Zone Change to Multi-family Residential to accommodate the Project.

According to the current Tulare County Regional Housing Needs Assessment (RHNA), the City of Farmersville needs a total of 654 net new housing units between the 8.5-year projection period (June 30, 2023 – December 31, 2031).[19] As part of the total RHNA Allocation, 218 units will be needed as part of

[19] Final Regional Housing Needs Plan, Cycle 6. August 2022. Tulare County Associated of Governments. https://tularecog.org/sites/tcag/assets/FINAL%20RHNP%20-%20COMBINED.pdf. Accessed June 2023.

Affordable Allocation (Combined Very Low + Low Income groups). Estimates as of 1/1/2023 shows the City has 2,783 housing units with an average of 3.75 people per household.[20]

The proposed Project includes construction of up to 82 fully affordable multi-family residential units. Based on the per-unit average of 3.75 persons for the City, the proposed Project would provide housing for approximately 308 people. The proposed Project would assist the City in reaching its RHNA goal, and as such, the site is planned for development. The City of Farmersville has sufficient labor force in the area to support many other types of industries. As such, any impacts are ***less than significant***.

Mitigation Measures: None are required.

b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

Less Than Significant. There are no residential structures currently on-site. As noted earlier, the Project intends to add multi-family housing to the community. The Project will not displace any housing and therefore there is ***less than significant***.

Mitigation Measures: None are required.

[20] E-5 Population and Housing Estimates for Cities, Counties, and the State, 2020-2023. May 2023. State of California Department of Finance. https://dof.ca.gov/Forecasting/Demographics/Estimates/e-5-population-and-housing-estimates-for-cities-counties-and-the-state-2020-2023/. Accessed June 2023.

XV. PUBLIC SERVICES

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?	☐	☐	☒	☐
Police protection?	☐	☐	☒	☐
Schools?	☐	☐	☒	☐
Parks?	☐	☐	☒	☐
Other public facilities?	☐	☐	☒	☐

RESPONSES

a. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

Fire protection?

Less Than Significant Impact. The Farmersville Fire Department is located at 909 W Visalia Road Farmersville, CA 93223, approximately 1.3 miles southwest of the Project site. The Department maintains a fleet of specialized fire apparatus including a 4-wheel drive Brush Fire Patrol Unit, a Quick Attack

Squad Unit (250 GPM Pumper), an Engine (1,500 GPM Pumper), a 55 Ft. Ladder Truck (1,500 GPM Pumper), and several Command/Utility Vehicles.

The Project site is already serviced by the Fire Department. The proposed Project at full buildout will add to the number of "customers" served, however, the Fire Department has capacity for the additional service need. No additional fire equipment, personnel, or services will be required by Project implementation. In addition, the Project applicant will be required to pay all associated impact fees related to public services. As such, any impacts would be less ***than significant***.

Police Protection?

Less Than Significant Impact. The proposed Project includes the construction of 82 multi-family residential units, which will accommodate approximately 308 persons, and up to 13,950 sq.ft. of commercial/retail space. The proposed Project site will continue to be served by the City of Farmersville Police Department, located at 909 W Visalia Road, Farmersville, CA 93223. Implementation of the proposed Project would result in an increase in demand for police services; however, this increase would be minimal compared to the number of officers currently employed by the Farmersville Police Department and would not trigger the need for new or physically altered police facilities. No additional police personnel or equipment is anticipated. In addition, each residential unit will be assessed a public safety impact fee by the City that is used to make capital improvements for the Police Department. The impact is ***less than significant.***

Schools?

Less Than Significant Impact. The proposed Project site is located within the Farmersville Unified School District. Farmerville High School and Freedom Elementary School are both located approximately 0.3 miles and 0.4 miles southeast of the Project site respectively. Other schools in the District include Deep Creek Academy, Farmersville Jr. High School, Hester Elementary School, Snowden Elementary School, and Farmersville Adult School. Pursuant to California Education Code Section 17620(a)(1), the governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any construction within the boundaries of the district for the purpose of funding the construction or reconstruction of school facilities. The Project applicant would be required to pay such fees to reduce any impacts of new residential development of school services. Payment of the developer fees will offset the addition of school-age children within the district. As such, any impacts would be ***less than significant.***

Parks?

Less Than Significant Impact. The City of Farmersville has six developed park sites, including Armstrong Park (4 acres), Jennings Park (2.1 acres), Liberty Park (6 acres), Riverbank Park (0.5 acres), Roy's Park (4.5 acres), Veterans Memorial Park (4.33 acres), Veterans Memorial Sports Park (11.82 acres).

To ensure sufficient recreational opportunities, the City has established a Park Impact Fee, implemented by Chapter 4, Development Fees, of the Municipal Code. Municipal Code states that parks must be constructed or expanded commensurate with growth of the City. The City Council determined that a park impact fee is required to assist in the financing of these public park improvements and to pay for new development's fair share of the acquisition and development costs of these improvements. The Project applicant would be required to comply with the Municipal Code. As such, any impacts would remain ***less than significant.***

Other public facilities?

Less Than Significant Impact. The proposed Project is within growth projections identified in the City's General Plan and other infrastructure studies. As such, the Project would not result in increased demand on other public facilities such as library services that has not already been planned for. Any impacts would be ***less than significant***.

Mitigation Measures: None are required.

XVI. RECREATION

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☒	☐

RESPONSES

a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less Than Significant Impact. As described in Impact XIV(a), the City has established a Park Impact Fee through the Municipal Code, which states that parks must be constructed or expanded commensurate with growth of the City. The Project applicant will be required to comply with that Municipal Code, as well as any fees that apply, and as such, any impacts will be ***less than significant***.

Mitigation Measures: None are required.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less Than Significant Impact. The proposed Project does includes the construction of community areas with recreation facilities. The Project development consists of a community area, a community building, fenced dog parks, bocce ball court, community garden, tot lot, half-basketball court, and outdoor picnic-barbeque area. As determined by the analysis contained within this document, ***less than significant impacts*** would occur.

Mitigation Measures: None are required.

XVII. TRANSPORTATION/TRAFFIC

Would the project:

		Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a.	Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☒	☐	☐
b.	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	☐	☒	☐	☐
c.	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐
d.	Result in inadequate emergency access?	☐	☐	☒	☐

A Traffic Analysis was performed on behalf of the proposed Project by Ruettgers & Schuler Civil Engineers (Appendix C). The following discussion and impact analysis are directly referencing this technical report.

RESPONSES

a. Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Less Than Significant Impact with Mitigation. The City of Farmersville General Plan Circulation Element contains Goals, Objectives and Action Plans to Ensure that streets in Farmersville are not congested and that the traffic on Farmersville's streets operates in an efficient and safe manner.

The Project site is situated on approximately 9.4 gross acres of undeveloped vacant land. The property is zoned Central Commercial. The proposed development would include 40 multi-family dwelling units, 42 multi-family senior adult housing, and up to 13,950 square feet of commercial development. Access to the site will be along Farmersville Boulevard.

Trip Generation

The Project trip generation volumes shown in Table 18 were estimated using the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition.[21] Trip rates, equations, and directional splits for ITE Land Use Codes 220 (Multifamily Housing-Low Rise), 252, (Senior Adult Housing-Multifamily), 822 (Strip Retail <40k), and 934 (Fast-Food Restaurant with Drive-Through) were used to estimate Project trips for weekday peak hour of adjacent street traffic.

Table 18
Project Trip Generation

General Information			Daily Trips		AM Peak Hour Trips			PM Peak Hour Trips		
ITE Code	Development Type	Variable	ADT RATE	ADT	Rate	In % Split/ Trips	Out % Split/ Trips	Rate	In % Split/ Trips	Out % Split/ Trips

Trip Distribution and Assignment

[21] Traffic Study- Gardenia Courtyard, City of Farmersville. Ruettgers & Schuler Civil Engineers. September 2023. Appendix C.

The distribution of Project peak hour trips is shown in Table 19 and represents the movement of traffic accessing the project site by direction. The Project trip distribution was developed based on site location and travel patterns anticipated for the proposed land uses.

Table 19
Project Trip Distribution

Direction	Percent
North	10
East	35
South	10
West	45

Project peak hour trips were assigned to the study intersections as shown in Figure 4 of Appendix C. Project trip assignment was developed based on trip generation, trip distribution and likely travel routes for traffic accessing the Project site.

Existing and Future Traffic

Existing peak hour turning movement counts were obtained in March and July 2022. Average annual growth rates ranging between 0.5 and 2.53 percent were applied to the 2023 peak hour volumes to estimate peak hour volumes for the year 2043. These growth rates were developed based on a review of historical count data and output from TCAG's regional travel demand model as well as a discussion with the City of Farmersville Planning Consultant. Cumulative volumes were estimated based on information provided by the City of Farmersville regarding build year, land use, size and location for each pending development. See Appendix C for figures.[22]

Intersection Analysis

A capacity analysis of the study intersections was conducted using Synchro software from Trafficware, as detailed in Appendix C. The analysis was performed for each of the following traffic scenarios.

- Existing (2023)
- Existing (2023) + Project
- Future Cumulative (2043)

[22] Ibid, pg 7.

- Future Cumulative (2043) + Project

Level of service (LOS) criteria for unsignalized and signalized intersections, as defined in HCM 2010, are presented in the tables below. The City of Farmersville's Circulation Element designates LOS C as the minimum acceptable intersection peak hour level of service.

Table 20
Level of Service Criteria - Unsignalized Intersection

Level of Service	Average Control Delay (sec/veh)	Expected Delay to Minor Street Traffic
A	≤ 10	Little or no delay
B	> 10 and ≤ 15	Short delays
C	> 15 and ≤ 25	Average delays
D	> 25 and ≤ 35	Long delays
E	> 35 and ≤ 50	Very long delays
F	> 50	Extreme delays

Table 21
Level of Service Criteria - Signalized Intersections

Level of Service	Average Control Delay (sec/veh)	Volume-to-Capacity Ratio
A	≤ 10	< 0.60
B	> 10 and ≤ 20	0.61 - 0.70
C	> 20 and ≤ 35	0.71 - 0.80
D	> 35 and ≤ 55	0.81 - 0.90
E	> 55 and ≤ 80	0.91 - 1.00
F	> 80	> 1.00

Peak hour level of service for the study intersections is presented in Tables 22 and 23.[23] Intersection delay in seconds per vehicle is shown within parentheses for intersections operating below LOS C.

[23] Ibid, page 14.

Table 22
Intersection Level of Service - Weekday PM Peak Hour

#	Intersection	Control Type	2023	2023+ Project	2043	2043+ Project	2043+ Project w/Mitigation[1]

Note:
[1] *See Table 28 for mitigation measures.*

Traffic Signal Warrant Analysis

Peak hour signal warrants were evaluated for the unsignalized intersections within the study based on the 2014 California Manual on Uniform Traffic Control Devices (2014 CA MUTCD). Peak hour signal

warrants assess delay to traffic on minor street approaches when entering or crossing a major street. Signal warrant analysis results are shown in Tables 24 and 25.[24]

Table 24
Traffic Signal Warrants - Weekday PM Peak Hour

It is important to note that a signal warrant defines the minimum condition under which signalization of an intersection might be warranted. Meeting this threshold does not suggest traffic signals are required, but rather, that other traffic factors and conditions be considered in order to determine whether signals are truly justified. It is also noted that signal warrants do not necessarily correlate with level of service. An intersection may satisfy a signal warrant condition and operate at or above an acceptable level of service or operate below an acceptable level of service and not meet signal warrant criteria.

Roadway Analysis

A capacity analysis of the study roadways was conducted using Table 4 in the State of Florida Department of Transportation *Quality/Level of Service Handbook* dated June 2020 (see Appendix). The City of Farmersville Circulation Element states that the peak hour level of service for roadways shall be no

[24] Ibid, page 15.

lower than LOS "C" for urban areas. The analysis was performed for the following AM and PM traffic scenarios:

- Existing (2023)
- Existing (2023) + Project
- Future Cumulative (2043)
- Future Cumulative (2043) + Project

Table 26

Intersection Improvements

Intersection improvements needed by the year 2043 to maintain or improve the operational level of service of the street system in the vicinity of the Project are presented in Table 28.[25]

Table 28
Future Intersection Improvements

#	Intersection	Total Improvements Required by 2043	Project Share
6	Farmersville Rd & Front St	Signal	1.1%

Project percent share is calculated using the following formula:

$$\% \text{ Share} = \frac{\text{Project Traffic}}{\text{(Future+Project Traffic) - Existing Traffic}} \times 100\%$$

In summary, all six study intersections currently operate at or above LOS C during peak hours prior to and with the addition of Project traffic. In 2043, it is anticipated that Farmersville Boulevard & Front Street will operate below an acceptable level of service prior to the addition of Project traffic. All roadway segments within the scope of the study currently operate above LOS C during peak hours prior to, and with the addition of Project traffic in both 2023 and 2043. With the addition of the mitigation measure identified in Table 28, all intersections will operate at acceptable levels.

As such, potential impacts will be ***less than significant with mitigation incorporation.***

Mitigation Measures:

TRA-1

> The Applicant shall pay the City of Farmersville for their Fair Share Portion of the intersection improvements described in Table 28, in order to maintain or improve the operational level of service of the street system in the Project vicinity.

b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Less Than Significant Impact with Mitigation. An evaluation of vehicle miles traveled (VMT) for project traffic was conducted in accordance with California Environmental Quality Act (CEQA) requirements.

[25] Ibid, pg 17.

The City of Farmersville has adopted the "County of Tulare SB 743 Guidelines", dated June 8, 2020, which contain recommendations regarding VMT assessment, significance thresholds and mitigation measures.

Baseline VMT was determined utilizing data from the California Statewide Travel Demand Model (CSTDM). The proposed residential Project is located in Traffic Analysis Zone (TAZ) 2757, which has an average VMT/capita of 11.27 miles. The proposed residential Project is considered a typical Project within the TAZ and therefore the Project would be expected to have the same VMT per capita. There are no special considerations with the Project to assume the Project would produce a VMT/capita lower than the average for the TAZ. The threshold of significance for residential Project VMT/capita is if the Project VMT is below the average in the TAZ where the Project is located. Since VMT/capita is assumed to be equal to the average for the aforementioned zone, it is anticipated that the proposed Project will have a significant transportation impact prior to mitigation. The proposed Project includes locally-serving retail as well as residential dwelling units. Locally-serving retail is defined by a retail development that is less than 50,000 square feet. The locally-serving retail "screens out" of VMT analysis and therefore, only the vehicle trips generated by the residential dwelling units is used in the VMT mitigation.

The Tulare County guidelines include detailed instructions for mitigation if a project has significant impacts. The guidelines state "The preferred method of VMT mitigation in Tulare County is for project applicants to provide transportation improvements that facilitate travel by walking, bicycling, or transit." In accordance with these guidelines, a survey was conducted within a half mile of the Project to determine any pedestrian, bicycle or transit facilities deficiencies exist. After review, three ADA compliant wheelchair ramps are proposed to be constructed at the following location: Farmersville Boulevard & Walnut Avenue. The proposed mitigation measures are shown in Figure 5.

The guidelines include a minimum cost for mitigation of $20 per daily trip generated by the Project or 0.5% of the total construction cost of the Project (not including land acquisition). As shown in Table 1, the Project excluding the locally-serving retail is anticipated to generate 478 daily trips, which equates to a target value of improvements of $9,560. The total mitigation cost is estimated at approximately $10,800 with a 20% contingency.

Pursuant to the guidelines, if a project provides mitigation which meets the minimum threshold listed above, the project can presume a 1% reduction in VMT. The assumed VMT/capita reduction is 1% of 11.27 or 0.11. The resulting VMT/capita after mitigation is 11.16 which is below the average VMT/capita in the TAZ which the Project is located.

Project VMT analysis showed a VMT which was equal to the existing local VMT in the area, which indicates a transportation impact under CEQA. With implementation of the mitigation measure TRA-2

identified above for reduction of VMT, the Project will have a ***less than significant transportation impact***.

Mitigation Measures:

TRA-2

The applicant shall install ADA compliant wheelchair ramps at the following locations:

- Farmersville Road & Walnut Avenue (3 ramps)

c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Less Than Significant Impact. The proposed Project has been designed for ease of access, adequate circulation/movement, and is typical of residential developments in the City of Farmersville. On-site circulation patterns do not involve high speeds, sharp curves or dangerous intersections. Although there will be an increase in the volume of vehicles accessing the site and surrounding areas, the proposed Project will not present a substantial increase in hazards. Any impacts are considered ***less than significant.***

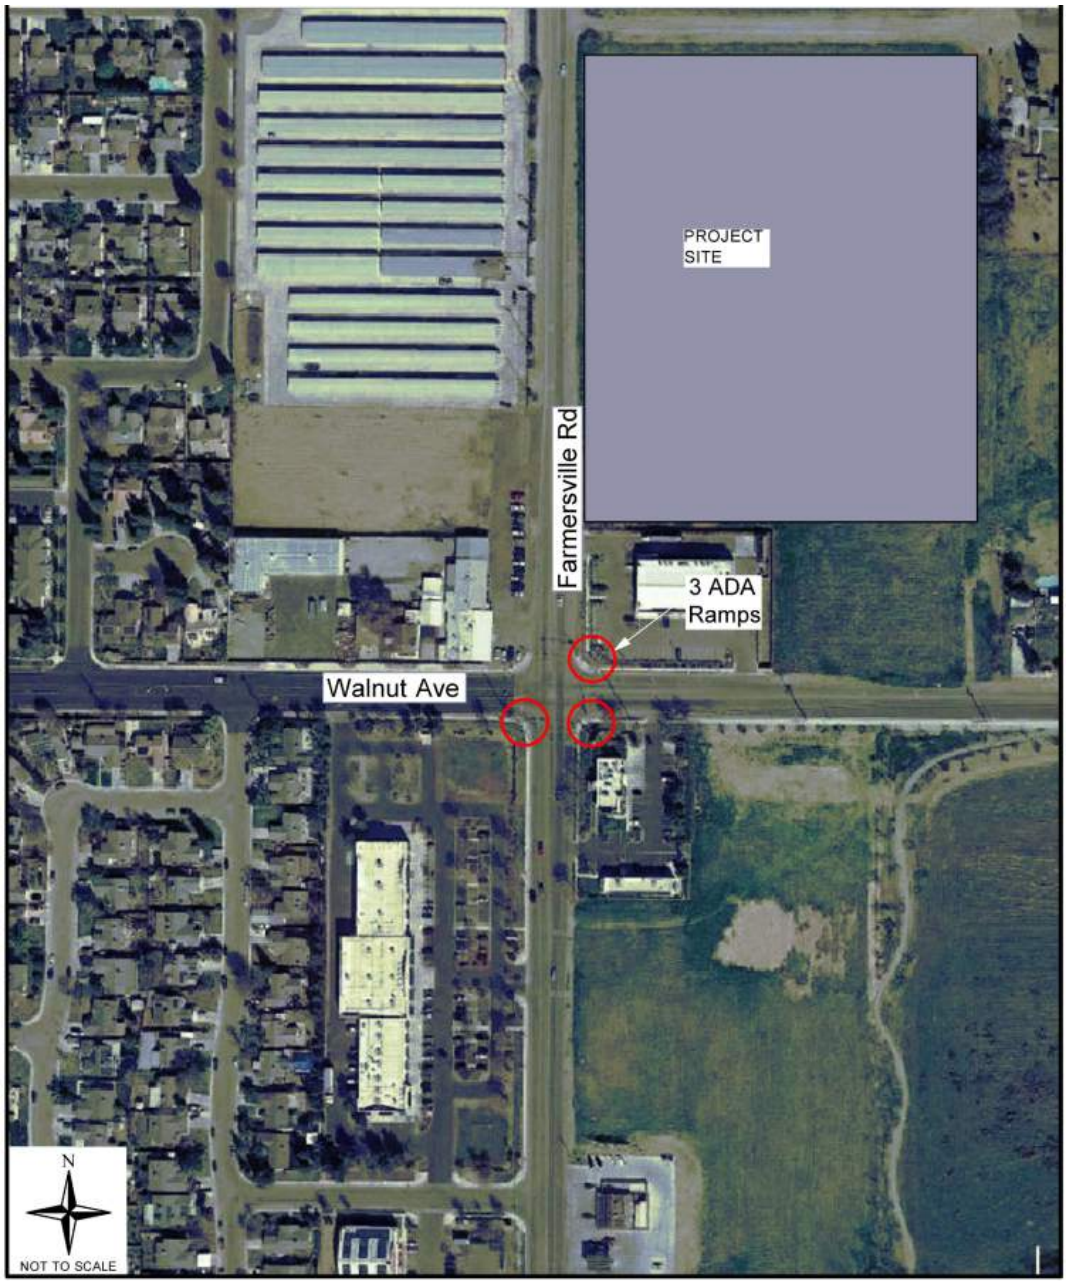
Mitigation Measures: None are required.

d. Result in inadequate emergency access?

Less Than Significant Impact. The proposed Project does not involve a change to any emergency response plan. Access to the site is proposed via Farmersville Boulevard. The site will remain accessible to emergency vehicles of all sizes. As such, potential impacts are ***less than significant.***

Mitigation Measures: None are required.

Figure 5
VMT Mitigation



XVIII. TRIBAL CULTURAL RESOURCES

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	☐	☐	☒	☐
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of the Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☐	☒	☐

RESPONSES

a-i, a-ii. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k) or a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of the Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?

Less Than Significant Impact. A Tribal Cultural Resource (TCR) is defined under Public Resources Code section 21074 as a site, feature, place, cultural landscape that is geographically defined in terms of size and scope, sacred place, and object with cultural value to a California Native American tribe that are either included and that is listed or eligible for inclusion in the California Register of Historic Resources or in a local register of historical resources, or if the City of Farmersville, acting as the Lead Agency, supported by substantial evidence, chooses at its discretion to treat the resource as a TCR. As discussed above, under Section V, Cultural Resources, no subsurface construction is anticipated to occur as a result of Project implementation as the site is currently built out.

The California Native American Tribes were contacted pursuant to AB 52 (Public Resources Code Section 21080.3.1, et seq.) and SB 18 on behalf of the City of Farmersville on May 30, 2023.

- Big Sandy Rancheria of Western Mono Indians
- Santa Rosa Indian Community of the Santa Rosa Rancheria
- Tule River Indian Tribe
- Wuksache Indian Tribe/Eshom Valley band
- Tubatulabals of Kern Valley
- North Fork Mono Tribe
- Big Sandy Rancheria of Western Mono Indians
- Kern Valley Indian Community

Tribes were provided 90 days, to request consultation pursuant to those statutes. The Santa Rosa Rancheria – Tachi Yokuts responded on July 3, 2023 and requested to be retained for consultation and monitoring, and to conduct a cultural presentation for construction staff. They also requested copies of the archaeological survey and record search as well as the Sacred Lands File search, which were provided via email. No other comments were received. Potential impacts to tribal cultural resources will be ***less than significant.***

Mitigation Measures: None are required.

XIX. UTILITIES AND SERVICE SYSTEMS

Would the project:

		Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a.	Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐
b.	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐
c.	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
d.	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
e.	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐
g.	Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☒	☐

RESPONSES

a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Less Than Significant Impact. The proposed Project would include the development of two fully affordable multi-family projects for a total of 82 units and three commercial pads. The development also includes a community area, fenced dog park, bocce ball court, community garden, on-site laundry facility, and outdoor picnic-barbeque area. The site construction will also include internal access roads, parking spaces, lighting, site landscaping and additional related improvements.

Wastewater service, water, electric power, natural gas and telecommunications facilities would all provide service to the proposed Project from their respective existing facilities and as such, would not be required to construct new or expanded facilities.

As discussed in Section X, Hydrology and Water Quality, with an increase in the area of impervious surfaces on the Project site, an increase in the amount of storm water runoff is anticipated. The site will be designed so that storm water is collected and deposited in the City's existing storm drain system. The storm water collection system design will be subject to review and approval by the City Public Works Department. Storm water during construction will be managed as part of the Storm Water Pollution Prevention Plan (SWPPP). A copy of the SWPPP is retained on-site during construction. Thus, the proposed Project would have a ***less than significant impact.***

The Project will have a ***less than significant impact*** to this analysis area.

Mitigation Measures: None are required.

b. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less Than Significant Impact. As discussed in Impact X(b), the proposed Project will increase demands on the Farmersville water production and distribution area. The City's water system consists of a series of wells, pump stations, treatment facilities and distribution lines. The system draws from the groundwater system underlying Farmersville and the Central Valley. While groundwater supplies can accommodate multiple dry years, the City of Farmersville, Tulare County, and nearby cities are engaging in groundwater management activities to monitor and enhance recharge capabilities to accommodate future demands. The Project site has been designated for urban development and as such, has been

accounted for in the City's infrastructure planning documents and projections. The City will have sufficient supply to serve the proposed Project. As such, the proposed Project will have a ***less than significant impact*** to this impact area.

Mitigation Measures: None are required.

c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Less Than Significant Impact. The Project will result in wastewater from residential units and commercial buildings that will be discharged into the City's existing wastewater treatment system. The wastewater will be typical of other urban/residential and general commercial/retail developments consisting of bathrooms, kitchen drains and other similar features. The Project will not discharge any unusual or atypical wastewater that would violate the City's waste discharge requirements. The City of Farmersville Public Works Department has reviewed the Project and determined that it can accommodate the wastewater generated from the project. Additionally, the proposed Project applicant would be required to comply with any applicable City and WWTF regulations and would be subject to applicable development impact fees and wastewater connection charges. With compliance to applicable standards and payment of required fees and connection charges, the Project would not result in a significant impact related to construction or expansions of existing wastewater treatment facilities. Therefore, the impact of the Project on wastewater treatment is ***less than significant***.

Mitigation Measures: None are required.

d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less Than Significant Impact. Disposal services in the City are provided by a private contractor, Mid Valley Disposal. Solid waste is usually hauled to the Visalia Landfill, north of Visalia on Road 80. The State of California requires that all cities and counties reduce the amount of waste going to landfills and the City is meeting its recycling requirements. Mid Valley Disposal has a program of recycling pick-ups in Farmersville; materials separated for recycling include paper, glass, metals and plastics to provide a diversion of portions of the waste stream resulting in a reduction of the solid waste stream going to landfills and similar disposal locations. The site has been designated for urban uses by the General Plan

and as such, the demand for City infrastructure, such as disposal services, has been accounted for in City planning documents. Impacts to this resource area are ***less than significant.***

Mitigation Measures: None are required.

e. Comply with federal, state, and local statutes and regulations related to solid waste?

Less Than Significant Impact. See Response d, above. The proposed Project would be required to comply with all federal, State, and local regulations related to solid waste. Furthermore, the proposed Project would be required to comply with all standards related to solid waste diversion, reduction, and recycling during project construction and operation. As such, any impacts would be ***less than significant.***

Mitigation Measures: None are required.

XX. WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☒	☐
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☒	☐
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☒	☐

RESPONSES

a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Less Than Significant Impact. The proposed Project is located in an area developed with residential and commercial uses, which precludes the risk of wildfire. The area is flat in nature which would limit the risk of downslope flooding and landslides, and limit any wildfire spread.

To receive building permits, the proposed Project would be required to be in compliance with the adopted emergency response plan. As such, any wildfire risk to the project structures or people would be ***less than significant.***

Mitigation Measures: None are required.

XXI. MANDATORY FINDINGS OF SIGNIFICANCE

Would the project:

	Potentially Significant Impact	Less than Significant With Mitigation Incorporation	Less than Significant Impact	No Impact
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	☐	☐	☒	☐
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☒	☐	☐

RESPONSES

a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict

the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant Impact With Mitigation. The analyses of environmental issues contained in this Initial Study indicate that the proposed Project is not expected to have substantial impact on the environment or on any resources identified in the Initial Study. Mitigation measures have been incorporated in the project design to reduce all potentially significant impacts to ***less than significant***.

b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

Less Than Significant Impact. CEQA Guidelines Section 15064(i) states that a Lead Agency shall consider whether the cumulative impact of a project is significant and whether the effects of the Project are cumulatively considerable. The assessment of the significance of the cumulative effects of a project must, therefore, be conducted in connection with the effects of past projects, other current projects, and probable future projects. Due to the nature of the Project and consistency with environmental policies, incremental contributions to impacts are considered less than cumulatively considerable. The proposed Project would not contribute substantially to adverse cumulative conditions, or create any substantial indirect impacts (i.e., increase in population could lead to an increase need for housing, increase in traffic, air pollutants, etc.). The impact is ***less than significant***.

c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Less Than Significant Impact With Mitigation. The analyses of environmental issues contained in this Initial Study indicate that the project is not expected to have substantial impact on human beings, either directly or indirectly. Mitigation measures have been incorporated in the Project design to reduce all potentially significant impacts to ***less than significant.***

List and describe any other permits or public agency (Federal, State or local) approvals required for this project (such as building permit, County Health Department permit, etc.):
Building permit.

PROJECT DESCRIPTION

Describe your project/request:
The proposed project will be two separate apartment communities (one senior, one family) built in two phases. Both communities will be 40 units and will be restricted to residents earning 60% or less of the AMI for Tulare County. Each community will be operated separately and will have its own live-in resident manager. There will also be three commercial pads on the subject property, one 4,187 SF, another 6,960 SF, and another 2,800 SF.

Site area in acres: 9.4
Square footage of buildings: 31,803 SF (Senior) + 36,190 SF (Family) + 13,947 (Commercial)
Square footage of parking areas: 33,210 SF

Number of on-site parking spaces: 84 family + 51 senior + 70 commercial

Describe any proposed phasing of the project:

Project will be phased. The phase to commence construction first will be whichever housing type (senior or family) is funded first, as this project will pursue public funding through a variety of sources including but not limited to CTCAC, CDLAC, HOME, etc. The commercial retail pads will likely all be built in one phase, and will constitute the last structures to be built.

If the project is residential, include the number of units, unit sizes, anticipated sales price or rents and anticipated household size:
Project will be 40 units of family housing and 40 units of senior housing. Family housing will be 2 and 3 bedroom units between 765 to 1,000 SF each, Senior housing will be 1 and 2 bedroom units between 705 and 906 SF each. Rents will be restricted to residents earning 60% or less of the Area Median Income for Tulare County, based on household size.

If the project is commercial, indicate the type (neighborhood, regional, etc.), and square footage of sales areas
There will be 3 commercial sales areas, one will be 4,187 SF, another will be 6,800 SF, and another will be 2,800 SF. The former 2 pads will be positioned for retail use, the latter pad will be positioned as a drive-through eatery.

If the project is industrial, indicate type, estimated employment per shift, and products/byproducts produced:

N/A.

If the project is institutional, indicate major functions, estimated employment per shift, estimated occupancy, and community benefits to be derived from the project:

N/A.

ENVIRONMENTAL SETTING (Please answer the following questions - you may attach additional sheets if necessary)

1. Describe the project site as it exists before the project, including information on topography, soil stability, availability of utilities, and any cultural, historical or

scenic aspects. Describe any existing structures on the site, and the use of the structures.

Site is flat, vacant land.

2. Describe the surrounding properties, including the type of land use (residential, commercial, etc. intensity of development, and scale of development.

North: Single Family Homes
West: Car dealership and Mini Storage
South: Vacant, unimproved land
East: Single Family Homes

3. Explain how your project fits into the surrounding neighborhood in terms of architectural design, building materials, colors, scale of buildings, height of buildings, landscaping, etc..

The project will blend into the surrounding community by virtue of its open courtyard and garden style. The project is minimally dense by intentional design, in order to be as unassuming as possible while still being multi-family apartments. The setbacks provided are more than required per code in order to make the project seem smaller and less imposing. There will also be ample open space and amenities to enhance the community oriented appeal of the project.

ENVIRONMENTAL EFFECTS

Are the following potential effects of your project? Provide a written response explaining each item:

GRADING. What (if any) type of grading will be done? Include estimates of material to be moved on or off the site. Where will any excess material be disposed of?
Grading will be minimal, as the site is already relatively flat. Grading will consist of cuts and fills of any uneven spaces.

AIR QUALITY. Will the project generate substantial air emissions or cause deterioration of air quality?. Will there be any types of equipment (i.e. generators, paint spray booths, etc.)that will generate air emissions.? How much vehicle traffic will be generated by the project?

Project will not generate any air emissions and will not deteriorate air quality. Project will generate up to 135 new vehicles. This figure is gathered by combining the total number of residential parking spaces. Applicant however anticipates the project contributing much less vehicles than this, for a significant amount of anticipated residents are forecasted to already be living in Farmersville, albeit in overcrowded conditions. The residency of such tenants would have no impact at all on local traffic.

WATER & DRAINAGE. Will the project result in changes in soil absorption rates, drainage patterns or the rate and amount of surface runoff? How will runoff be handled?

The parts of the project that will be covered in either asphalt or concrete will change soil absorption rates, though the parts of the project that will become landscape areas will not. The project will divert drainage patterns to nearby gutters, where runoff will be safely mitigated, thereby leading to less risk of flooding and gathering of mosquitoes and other vectors of disease.

WATER SUPPLY. Will the project result in a substantial reduction in the amount of water otherwise available for public water supplies? Include an estimate of daily water use.

It will not. Estimates place water use between 9,000 - 9,500 gallons per day for both residential projects. The commercial uses are more difficult to estimate without us knowing the type of business that will inhabit the commercial buildings, but reasonable estimates place water use between 500 - 1,500 gallons per day.

WATER, SEWER &STORM DRAINAGE. Can the proposed project be adequately served by the existing water, sewer and storm drainage facilities. Do water, sewer and storm drain lines exist along the project frontage?

Yes. Water, sewer, and storm drain lines run along Farmersville Road.

FLOODING. Is the project being proposed within a flood zone? What measures will be taken to floodproof the project?

The project site is within an area of potential flooding. The project will be equipped with a code-compliant drainage system.

AGRICULTURE & VEGETATION. Will the proposed project require the removal of any agricultural land or crops? How many acres? Will the project reduce the numbers of any unique, rare or endangered species of plants?

No.

ANIMALS. Will the proposed project reduce the numbers of any unique, rare or endangered species of animals?

No.

NOISE. Will the proposed project result in significant increases in noise levels or expose people to severe noise levels? If so, what measures will be taken to reduce noise levels?

No.

LAND USE PLANS. Will the proposal result in a substantial alteration of the present or planned land use of the project area? Does the project require a rezoning or General Plan Amendment?

It will require a rezoning from General Commercial to Multifamily Residential, specifically, RM 2-5.

HAZARDOUS MATERIALS. Does any part of the project create a risk of explosion or the release of hazardous substances. Include information on the use of hazardous substances in the operation of the proposed project.

No.

HOUSING. Will the proposed project result in a significant increased demand for additional housing within Farmersville?

No, to the contrary. The project will help alleviate some of the demand for housing within Farmersville.

TRAFFIC & CIRCULATION. Will the project generate significant volumes of additional traffic? Will the project require alterations to streets or highways or require the construction of new streets?

No. As Farmersville Road is a major artery, it is not believed that the Project will create traffic that cannot be handled. The project site is already zoned General Commercial, meaning that the EIR prepared in relation to that original land use designation already considered the effects of traffic by a general commercial compliant use on the subject property. Applicant believes that the current design layout of commercial uses in front and relatively low density uses in the back of the subject property to be overall less intensive than a full commercial use throughout the entirety of the parcel.

PUBLIC SERVICES. Will the project impact the city's police and fire services and other government services such as the school district?
Yes. All impact fees in relation to these services will be paid to offset the project's impact thereon.

SOLID WASTE. Will the project generate significant volumes of solid waste? How will solid waste be disposed of at the site?
Project will generate amounts of solid waste comparable to that of other local multi-family and low-intensity commercial projects. It will be disposed via the municipal sewer system.

AESTHETICS. Will the proposed project result in the obstruction of any scenic vista or view open to the public, or will the project result in the creation of an aesthetically offensive site open to public view? How will unsightly views be screened?
No.

HISTORIC & ARCHAEOLOGICAL RESOURCES. Will the project result in the destruction of any prehistoric or historic archaeological sites? Will the project result in physical changes to historic buildings or other structures or sites? Will the project cause physical changes that would affect unique ethnic cultural values or restrict religious or sacred uses within the project site?
No.

Findings:

Please answer the following questions as completely as possible. You may attach additional sheets if necessary.

1. Does public necessity require the proposed change? Is there a real need in the community for more of the types of uses permitted by the Zone requested than can be accommodated in the areas already zoned for such uses? (Fully explain your answer, considering the surrounding property as well as the property proposed to be reclassified.)

   Subject property (APN 111-290-015) is currently zoned G-C (General Commercial). According to the 2015-2023 Farmersville Housing Element, the City was assigned the responsibility to construct 466 units, of which, 139 (29%) should be restricted to low, very low, or extremely low income per the RHNA. Per the 2009 Housing Element, Farmersville was responsible for the construction of 518 units. In consideration of the fact that new housing, especially affordable housing, is a top priority for Farmersville, this GPA/Zone Change should be approved. According to table 6-3 in the Housing Element, one can see that there is only one other site zoned RM 2-5 large enough to accomodate the proposed 80 unit project (40 units in two phases). All other sites are either too small and/or non-contiguous, therefore making the same construction impossible. It should also be noted that this specific design, of commercial + residential is not possible on any of the RM-2.5 zoned properties in table 6-3.

2. Is the property involved in the proposed reclassification more suitable for the purposes permitted in the proposed classification than for the purposes permitted in the present classification? (Answer completely; specify reasons for your answer.)

   Yes, the landscape is relatively flat and will be able to sustain residential units in addition to commercial pads. Additionally, the parcels to the north and east of the subject property are already purposed for residential use.

3. Would the uses permitted by the proposed zone be detrimental in any way to surrounding property? (Explain reasons supporting your answer.)

   No. The propoed 20 - 21.5 du/ac is not dense in consideration of the fact that Farmersville's RM-2.5, the lowest density multi-family zone available, specifies a minimum density of 20 du/ac, meaning AMG's proposed development is theoretically as low density of an apartment project as possible.

4. What were the original deed restrictions, if any, concerning the type and class of uses permitted on the property involved? Give the expiration date of these restrictions. (You may attach a copy of these restrictions.)

   None.

CITY OF FARMERSVILLE
General Plan Amendment/Zone Change Questionnaire

COMMUNITY DEVELOPMENT DEPARTMENT 909 W. VISALIA ROAD FARMERSVILLE, CA 93223 (559) 747-0458

Please type or print clearly in ink. Incomplete applications will be returned.

Project Address or legal description

PARCEL 1 OF PARCEL MAP NO. 3826, IN THE COUNTY OF TULARE, STATE OF CALIFORNIA, ACCORDING TO THE MAP THEREOF RECORDED IN BOOK 39, PAGE 29 OF PARCEL MAPS, TULARE COUNTY RECORDS.

Assessor Parcel Number:

111-290-015-000

Existing use of project site:

Vacant land.

What is the proposed use(s) of the site

Two individual apartment communities and three commercial pads.

What is the existing General Plan and zoning designations for the site:

General Commercial.

What is the proposed General Plan designation and/or zoning?

Medium Density Residential.

How many acres are involved:

9.4

CITY OF FARMERSVILLE
Site Plan Review Questionnaire

COMMUNITY DEVELOPMENT DEPARTMENT 909 W. VISALIA ROAD FARMERSVILLE, CA 93223 (559) 747-0458

Please type or print clearly in ink. Incomplete applications will be returned.

Project Address or legal description:
PARCEL 1 OF PARCEL MAP NO. 3826, IN THE COUNTY OF TULARE, STATE OF CALIFORNIA, ACCORDING TO THE MAP THEREOF RECORDED IN BOOK 39, PAGE 29 OF PARCEL MAPS, TULARE COUNTY RECORDS.
Assessor Parcel Number:

APN 111-290-015

Existing use of project site:

Vacant, unimproved land.

Describe the proposed project, including hours of operation, number of employees, type of business and other relevant information.
The proposed project will be two separate apartment communities (one senior, one family) built in two phases. Both communities will be 40 units and will be restricted to residents earning 60% or less of the AMI for Tulare County. Each community will be operated separately and will have its own live-in resident manager. There will also be three commercial pads on the subject property, one 4,187 SF, another 6,960 SF, and another 2,800 SF.

What are the zoning and General Plan Land Use Map designations of the site:
General Commercial for both.

How many acres are involved:

Approximately 9.4

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

USER QUESTIONNAIRE, TITLE REPORT
AND CLIENT PROVIDED DOCUMENTATION

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.

Site Address, APN, etc.: 111-290-015-000, Farmersville, CA 93292

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

1. **Environmental cleanup liens that are filed or recorded against the site**
   Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?
   ☒ **No** ☐ **Yes, please explain** _____

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry**
   Are you aware of any Activity and Use Limitations (AULs), such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   ☒ **No** ☐ **Yes, please explain** _____

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP**
   As the *user* of this *ESA,* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ☒ **No** ☐ **Yes, please explain** _____

4. **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated**
   Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?
   ☒ **Yes** ☐ **No, there is a difference between the purchase price and the fair market value**
   If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?
   please explain _____

5. **Commonly known or *reasonably ascertainable* information about the *property***
   Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

   (a.) Do you know the past uses of the *property*?
   ☒ **No** ☐ **Yes, please explain** _____

   (b.) Do you know of specific chemicals that are present or once were present at the *property*?
   ☒ **No** ☐ **Yes, please explain** _____

   (c.) Do you know of spills or other chemical releases that have taken place at the *property*?
   ☒ **No** ☐ **Yes, please explain** _____

   (d.) Do you know of any environmental cleanups that have taken place at the *property*?
   ☐ **No** ☐ **Yes, please explain** _____

6. **The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation**
   As the *user* of this *ESA*, based on your knowledge and experience related to the *property,* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?
   ☒ **No** ☐ **Yes, please explain** _____

Note: Landowner Liability Protections, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("*Common Elements*" Guide) issued on March 6, 2003.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of November 20, 2025 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Housing Authority of the County of Tulare

The estate or interest in the land hereinafter described or referred to covered by this Report is:

FEE

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

A. General and special taxes and assessments for the fiscal year 2025-2026, a lien not yet due or payable.

1. All taxes - secured, supplemental, defaulted, escaped and including bonds and assessments are not available at this time. Please verify any/all tax amounts and assessment information with the County Tax Collector prior to the close of the contemplated transaction.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. AN EASEMENT FOR THE PURPOSE SHOWN BELOW RIGHTS INCIDENTAL THERETO, AS SHOWN BELOW MAP OF: TULARE COUNTY ASSESSOR'S MAP IN THE OFFICE OF THE COUNTY SURVEYOR OF SAID COUNTY PURPOSE : ROAD 164
AFFECTS : WEST LINE OF SAID LAND

4. An easement shown or dedicated on the Map as referred to in the legal description

   For: PUBLIC UTILITIES, ACCESS EASEMENT, PUBLIC USE THE ROAD RIGHT OF WAY AND IRREVOCABLE OFFER OF DEDICATION TO COUNTY OF TULARE and incidental purposes.

5. The effect of a map purporting to show the land and other property, filed IN BOOK 30, PAGE 72 of Record of Surveys.

6. An easement for CONSTRUCTION AND RELATED PURPOSES and incidental purposes, recorded MAY 12, 2020 as INSTRUMENT NO. 2020-26557 OF OFFICIAL RECORDS.

   In Favor of: THE CITY OF FARMERSVILLE, A MUNICIPAL CORPORATION
   Affects: as described therein

7. Rights of the public in and to that portion of the Land lying within any Road, Street, Alley or Highway.

8. Water rights, claims or title to water, whether or not shown by the Public Records.

9. The new lender, **if any**, for this transaction may be a Non-Institutional Lender. If so, the Company will require the Deed of Trust to be signed before a **First American approved notary**.

10. Rights of parties in possession.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty four months prior to the date of this report, except as follows:

   A document recorded MARCH 22, 2024 as INSTRUMENT NO. 2024-13214 of Official Records.

   From: MARLENE E. GARDINER, AS TRUSTEE OF THE MARLENE E. GARDINER SURVIVOR'S TRUST, DATED JANUARY 5, 1988 AND DMA INVESTMENTS LIMITED PARTNERSHIP, A CALIFORNIA LIMITED PARTNERSHIP
   To: HOUSING AUTHORITY OF THE COUNTY OF TULARE

3. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE [(07-01-2021) v. 01.00]

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.
   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or
   e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.
4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.
   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a. or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown on Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown on Schedule A or $2,500 (whichever is less)	$5,000

ALTA OWNER'S POLICY [(07-01-2021) V. 01.00]
CLTA STANDARD COVERAGE OWNER'S POLICY [(02-04-22) V. 01.00]
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.

2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7. The 2021 CLTA Standard Coverage Owner's Policy will include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas,

uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

I. SUMMARY AND CONCLUSIONS

KCE Matrix, Inc. (KCE Matrix) has been retained by Pacific West Communities, Inc. (referred to as "the client" and/or "the user" in this report) to conduct a Phase I Environmental Site Assessment (ESA) in accordance with the American Society of Testing and Materials (ASTM) standard practice E1527-13 for the property consisting of vacant land that has the Assessor's Parcel Number (APN) of 111-290-015-000, Farmersville, California (referred to as "the subject property" in this report).

The following summarizes the findings of this Phase I ESA:

- The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Street, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through vacant land located along the southern property line.

- Based on the historic information obtained during this investigation (including research of Sanborn Maps, Aerial Photographs, regulatory records and city directories), the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. On December 1, 2022, a representative of KCE Matrix conducted site inspection of the subject property and confirmed that the property currently consists vacant land with no structures and has a dirt surface.

- The environmental disclosure report obtained by KCE Matrix from EDR presents information with regard to other sites in the immediate and general site vicinity of the subject property. Based on review of the report as provided by EDR, only three other sites were identified as being located in the general vicinity of the subject property. Two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular product. The one other site identified as being located in the general vicinity of the subject property was listed on the RCRA NONGEN / NLR database. This facility has been identified as a non-generator with no reported violations. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface

environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property.

- Based on the Vapor Encroachment Screen (VES) conducted during this investigation, a Vapor Encroachment Condition (VEC) originating from the subject property could not be ruled out. Furthermore, based on the research conducted during this investigation, a VEC originating from other nearby sites in the vicinity for the subject property could not be ruled out.

- KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west.

The ASTM standard practice E1527-13 defines the following terms:

Recognized Environmental Condition (REC) as "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment".

Historical Recognized Environmental Condition (HREC) as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria as established by the regulatory authority, without subjecting the property to any required controls".

Controlled Recognized Environmental Condition (CREC) as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls".

KCE Matrix has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13 of the property consisting of vacant land with the APN of 111-290-015-000, Farmersville, California, the subject property. Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no

evidence of a REC, an HREC or a CREC in connection with the subject property, except as follows:

- REC – Historic agricultural land use. The subject property appears to have been used as agricultural land from at least approximately 1952 through 1984. As such, KCE Matrix recommends that subsurface environmental assessment work be performed for the subject property to determine whether or not the property has been impacted by the potential former usage of pesticides over an extended period of time, and to assess any potential impact from metals (such as Arsenic). The proposed subsurface assessment work should also be conducted in a manner so as to address potential vapor encroachment conditions.

II. INTRODUCTION

A. Purpose

This report presents the results of a Phase I ESA conducted by KCE Matrix for the subject property. The purpose of this investigation is to research and report existing environmental conditions for the subject property based on the American Society of Testing and Materials (ASTM) standard practice E1527-13. Performing a Phase I ESA according to the ASTM Standard E1527-13 is intended to permit a user to satisfy one of the requirements in qualifying for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (the "*landowner liability protections*," or "*LLPs*"). This practice constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice".

B. Detailed Scope-of-Services

The scope of services performed during this Phase I ESA project includes:

1. Collecting available information concerning the property as it pertains to:
   a. Past land use
   b. Past owners
   c. Location of buried storage tanks, hazardous waste storage, wastewater treatment facilities and/or on-site landfills, etc.
   d. Types of chemicals used on site, past and present
   e. Geologic and hydrogeologic features
   f. Past geotechnical investigations (if available)
   g. Other data pertinent to the specific site
2. Conducting a site visit to:
   a. Identify vegetative features
   b. Locate surface waters
   c. Assess physical features

   d. Observe adjacent land use
   e. Gather evidence of indiscriminate and/or illegal waste disposal
3. Conducting a review of records maintained by regulatory agencies as follows:
   a. Reviewing regulatory files regarding the property in question
   b. Contacting appropriate regulatory personnel
4. Conducting a Vapor Encroachment Screen.
5. Preparing the Phase I Environmental Site Assessment Report, summarizing our findings and inclusive of supporting documentation.

C. Significant Assumptions

No significant assumptions were made during the course of this investigation.

D. Limitations and Exceptions

This type of ESA does not include air, soil or water sampling; or sampling of building materials. Site-specific conditions such as soil deposits and rock formations may vary in thickness, lithology, saturation strength, and other properties across any site beyond what available documentation indicates. Therefore, it is possible that undocumented or concealed improvements or alterations to the property could exist beyond the inquiry of the activities conducted during this site assessment. In addition, environmental changes, either naturally occurring or artificially induced, may cause changes or alterations (which can be significant) to the property as compared to the conditions found at the time that this assessment was conducted.

Based on the best available investigative technologies, no amount of assessment can guarantee that the subject property does not contain contaminants or hazardous substances. The activities conducted during this limited investigation cannot identify all potential concerns for the subject property, and do not eliminate the possibility that the subject property is completely free of environmental concerns.

KCE Matrix has analyzed and evaluated the information collected during this investigation using what we believe to be the currently applicable assessment and engineering techniques and principles. KCE Matrix assumes no liability from other parties involved in losses sustained as a result of decisions made based on interpretations of this report. KCE Matrix makes no warranty, either expressed or implied, regarding the work conducted, except that our services were performed in accordance with the generally accepted professional principles and practices existing for such work.

There are no significant data gaps to report during this investigation.

E. Special Terms and Conditions

This report and all information obtained during this site assessment are considered confidential and will not be released without written permission by the owner of the subject property, the owner

authorized entity conducting this assessment, or as required by law. The owner of the subject property is typically responsible for mitigation of contamination, corrective or remedial action, and disclosure of any information related to environmental issues that may or may not be discovered during this site assessment.

F. User Reliance

This report was prepared for the exclusive use of the client and/or user. No other person or entity is entitled to rely upon this report without the specific written authorization of KCE Matrix. Any such reliance by any third party is at the sole risk of said third party, and such reliance is subject to the same limitations, terms and conditions as the original contract with the client. KCE Matrix specifically disclaims any responsibility for any unauthorized use of this report.

III. SITE DESCRIPTION

A. Location and Description

The subject property is located on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Street, in Farmersville, California. A Location Map, Site Plan, and Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively.

B. Site and Vicinity General Characteristics

The subject property is located in a commercial/retail and residential area. The subject property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through vacant land located along the southern property line.

C. Current Use of the Property

The subject property currently consists of vacant unoccupied land with no structures and has a dirt surface.

D. Description of Structures and Other Improvements

The subject property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate

elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through the vacant land located along the southern property line.

E. Current Uses of the Adjoining Properties

The adjoining properties are comprised of the following:

- North: Residential properties, an auto repair workshop/facility, Dillon Avenue and residential property.
- East: Residential properties and vacant properties.
- South: Vacant land, commercial/retail property (Rite Aid Store), residential property and East Walnut Street.
- West: Farmersville Road, commercial property, an auto repair facility, a public storage facility and residential properties along with residential streets.

IV. USER PROVIDED INFORMATION

A user questionnaire was completed by the client and was provided to KCE Matrix during this investigation. A copy of the completed user questionnaire is presented in Appendix E of this report.

A. Title Records

The client provided KCE Matrix with a copy of a Preliminary Title Report for the subject property as prepared by First American Title Company, dated October 18, 2022. Based on review of the title report for the subject property, no environmental liens and/or Activity and Use Limitations (AUL's), which indicate a past or present release of a hazardous substance or petroleum products, were presented or recorded. A copy of the title report as prepared by First American Title Company dated October 18, 2022 is presented in Appendix E.

B. Environmental Liens or Activity and Use Limitations

The user reported that he is not aware of any environmental cleanup liens that are filed or recorded against the property under federal, tribal, state or local law. The user also reported that he is not aware of any Activity and Use Limitations (AUL's) that are filed or recorded against the property.

C. Specialized Knowledge

The user did not report any specialized knowledge related to the property or to nearby properties.

D. Commonly Known or Reasonably Ascertainable Information

The user did not report any commonly known or reasonably ascertainable information related to the property.

E. Valuation Reduction for Environmental Issues

The user reported that the purchase price of this property reasonably reflects the fair market value of the property. The user did not report any other information with regard to the value of the subject property based on environmental issues.

F. Owner, Property Manager, and Occupant Information

The user identified Mr. Don Slattery as a site contact for the subject property. The user also listed "Pacific West Communities" as a party who will rely on the Phase I report. The user did not provide any other information regarding the ownership, management or occupancy of the subject property.

G. Reason for Performing Phase I

This Phase I ESA is being performed for the client as part of a due diligence investigation of the subject site.

H. Vapor Encroachment

The user reported that the site consists of unimproved vacant land and will be developed with the construction of apartments that will have slab-on-grade floors. The user reported that the future structure(s) will use hot air circulation, hot water circulation and gas furnace as the heating system type and natural gas and electricity as the type of fuel energy. The user also reported that neither a gas station nor a dry cleaner operates or will operate on site.

I. Other

The user did not report any other knowledge or experience for the subject property with regard to environmental condition.

V. RECORDS REVIEW

A. Standard Environmental Record Sources

KCE Matrix retained Environmental Data Resources, Inc. (EDR) to conduct a search of government and regulatory databases in an attempt to locate and obtain information about the subject site and other sites in the vicinity of the subject property that may affect the environmental quality of the property. The environmental disclosure report prepared by EDR provides a summary

of the various databases searched and is presented in Appendix B of this report. The database research presents summaries for the subject site and selected adjoining properties as follows:

A1. Subject Site

The target property was not listed in any of the databases searched by EDR.

A2. Site Vicinity

With regard to the summary report prepared by EDR, KCE Matrix has prepared the following table listing other sites located in the general vicinity of the subject property up to a reported radius of approximately 500 feet. This summary table includes the site names, the reported distances from the subject property, as well as a brief summary of the information reported by the databases searched:

Facility Name	Address	Dist. (ft)	Database	Regulatory History and/or Reported Impact and Current Status
Ral Copping	28880 Rd 164	23 WNW	HIST UST	Reported one UST with a capacity of 260 gallons used for regular product.
Ralph Copping	28880 Road 164	23 WNW	HIST UST	Reported one UST with a capacity of 260 gallons used for regular product.
Claudes Buggies Inc	28813 Farmersville Blvd	75 SW	HIST UST	Reported one UST with a capacity of 1,500 gallons installed in 1977 and used for regular product.
Claudes Buggies Inc	28813 Farmersville Blvd	75 SW	SWEEPS UST	Reported one UST with a capacity of 1,500 gallons used for MV fuel. Reported the status as "Active" as of April 20, 1988.
T Young Diesel Electric	29022 Road 164	129 NNW	RCRA NonGen / NLR	Classified the facility as not being a generator of Federal RCRA waste. No violations were reported.

In addition, the EDR databases searched identified one unmapped site as follows:

Name	Address
City of Farmersville Sewerage Tr	Farmersville & Outside Creek Roads

The disclosure report prepared by EDR identified the one unmapped site as an Orphan site. Based on site vicinity reconnaissance up to an approximate radius of 0.25-mile from the subject site and based on the addresses and information provided in the Orphan Site Summary as prepared by EDR, the one unmapped site was not observed to be located in the immediate vicinity of the subject property and appears to be located in excess of 0.25-mile from the subject site.

B. Additional Environmental Record Sources

Regional Water Quality Control Board

On November 14, 2022, KCE Matrix submitted a written request to the Regional Water Quality Control Board (RWQCB), Central Valley Region – File Review Department; for information

regarding Underground Storage Tanks (USTs) and hazardous materials for the subject property. Based on an email response issued by the RWQCB dated November 23, 2022, this agency does not maintain any records for the subject property. A copy of the written request made by KCE Matrix dated November 14, 2022 copy of the RWQCB email response dated November 23, 2022 are presented in Appendix C-1.

KCE Matrix also researched the records maintained by the State Water Resources Control Board (SWRCB) – Geotracker Database online for information regarding Underground Storage Tanks (USTs) and hazardous materials for the subject property. This database typically contains records that are also maintained by the various local RWQCB's. The results of this online research indicated that the SWRCB-RWQCB does not maintain such records for the subject property.

Department of Toxic Substances Control

On November 14, 2022, KCE Matrix submitted a written request to the California State Department of Toxic Substances Control (DTSC) – Sacramento Regional Office; for information regarding hazardous materials and USTs for the subject property. Based on a letter response issued by the DTSC to KCE Matrix dated November 15, 2022, this agency was unable to provide information about the subject site based on APNs or similar geographic site data without a site address. The DTSC advised that KCE Matrix search for the requested records and information using the DTSC Envirostor Database available online. A copy of the written request made by KCE Matrix dated November 14, 2022 and a copy of the DTSC letter response dated November 15, 2022 are presented in Appendix C-2.

KCE Matrix also researched the records maintained by the DTSC Envirostor Database online for information regarding environmental assessment and remediation matters for the subject property. The results of this online research indicated that the DTSC Envirostor Database does not maintain such records for the subject property.

In addition, KCE Matrix researched the records maintained by the DTSC Hazardous Waste Tracking System database online for information regarding hazardous wastes generated and/or stored at the subject property. The results of this online research indicated that the DTSC Hazardous Waste Tracking System online database does not maintain such records for the subject property.

Tulare County – Health and Human Services Agency

On November 14, 2022, KCE Matrix submitted a written request to the Tulare County – Health and Human Services Agency (TC-HHSA); for information regarding Underground Storage Tanks (USTs) and hazardous materials for the subject property. Based on an email response issued by the TC-HHSA dated November 21, 2022, this agency does not maintain such requested records for the subject property. A copy of the written request made by KCE Matrix dated November 14, 2022 and a copy of the TC-HHSA email response dated November 21, 2022 are presented in Appendix C-3.

City of Farmersville – Clerk's Office – Fire Department

On November 14, 2022, KCE Matrix contacted the City of Farmersville Clerk's Office; regarding any records that may be maintained by the City Departments, including the Fire Department, particularly as may be related to USTs and hazardous materials. Based on an email response issued by the Clerk's Office dated November 14, 2022, the City Clerk's Office does not maintain any records regarding the subject property, and advised KCE Matrix to contact Tulare County for such records. Copies of the written request made by KCE Matrix and the City Clerk's Office email response both dated November 14, 2022 are presented in Appendix C-4.

California Geologic Energy Management Division

KCE Matrix researched the records maintained by the California Geologic Energy Management (CalGEM) Division (formerly known as the Division of Oil, Gas, and Geothermal Resources (DOGGR)) Database online for information regarding oil and natural gas wells for the subject property and the general vicinity. The results of this online research did not indicate references to any oil and/or natural gas wells as being located on the subject property.

California Environmental Protection Agency

KCE Matrix researched the records maintained by the California Environmental Protection Agency (CalEPA) Database online for information regarding environmentally regulated sites and facilities. The results of this online research indicated that the CalEPA Database does not maintain such records for the subject property.

C. Physical Setting Source(s)

C1. Topography

The site has an approximate elevation of 365 feet above mean sea level. A Location Map that shows the physical setting of the subject property and vicinity is presented in Appendix A, as Figure 1.

C2. Geology/Hydrogeology

KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be

towards the west. The groundwater information obtained from the SWRCB Geotracker Database for the general site vicinity is presented in Appendix C-5.

The surface of the subject property is essentially flat and has an approximate elevation of 365 feet above mean sea level. With regard to the surrounding area, the general topographic gradient is reported to have a gradual slope down to the west based on information obtained from EDR. General subsurface soil and topographic gradient information for the site and vicinity is presented in the Physical Setting Source Summary Report prepared by EDR in Appendix B (pages A-1 through A-6).

The National Wetlands Inventory (NWI) was established by the United States (U.S.) Fish and Wildlife Service (Service) in 1974 to conduct a nationwide inventory of U.S. wetlands to provide its biologists and others with information on the distribution of wetlands to aid in wetland conservation efforts. Based on review of information obtained from the NWI as maintained by the Service online, the subject property does not appear to be a designated wetland area. The NWI map identifies the following wetland(s) as the closest designated wetland area(s) in the vicinity of the subject property:

Wetland	Distance	
Cameron Creek	0.28-mile	To the northwest of the subject site
Creek	0.34-mile	To the southeast of the subject site
Deep Creek	0.50-mile	To the southeast of the subject site
Creek	0.55-mile	To the northwest of the subject site
Davis Ditch	0.88-mile	To the east of the subject site

The NWI wetland map for the vicinity of the subject property is presented in Appendix C-6. In addition, references to the nearest wetland areas are presented in the maps presented in the Executive Summary of the EDR report presented in Appendix B.

The Federal Emergency Management Agency (FEMA) has defined geographic areas as Flood Zones according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area. Based on review of information obtained from the FEMA's National Flood Hazard Layer (NFHL) Viewer online, the subject property is located in Zone X, an area of minimal flood hazard. The NFHL map for the general vicinity of the subject property is presented in Appendix C-7.

D. Historical Use Information - Subject Property

D1. Building Records

On November 14, 2022, KCE Matrix submitted written requests to the City of Farmersville – City Clerk's Office regarding any records that may be maintained by the City Departments, including the Building Department. Based on email correspondence as issued by the City of Farmersville - City Clerk's office dated November 14, 2022; this agency does not maintain any records for the

subject property. Copies of the written request made by KCE Matrix and the City Clerk's Office email response both dated November 14, 2022 are presented in Appendix D-1.

On November 14, 2022, KCE Matrix submitted a written request to the Tulare County – Resource Management Agency (TC-RMA) for site history information including building permits, certificates of occupancy and notices of violations. In an email response issued by the TC-RMA on November 14, 2022, KCE Matrix was advised to contact Mr. Karl Schoettler, the planner contracted by the City of Farmersville for such information. As such, KCE Matrix contacted Mr. Karl Schoettler for site history information regarding the subject property. On November 16, 2022, Mr. Schoettler provided KCE Matrix with site information via email stating that the subject site consists of vacant land and that the City has no records of any permits for construction. In addition, Mr. Schoettler stated that the subject property is located inside of the city limits and is zoned C-G (General Commercial); and this zoning allows for a wide variety of commercial uses, including retail stores, restaurants and offices, among others. Mr. Schoettler also provided KCE Matrix with a brochure that summarizes permitted uses and zoning standards in Tulare County. Copies of the email requests made by KCE Matrix and the correspondence with the representatives of Tulare County dated between November 14 and November 16, 2022 are presented in Appendix D-1.

D2. Historic Maps

KCE Matrix contacted EDR in an effort to obtain historic Sanborn® Maps of the subject site and vicinity. Based on a search of the EDR historic map collection, no such historic maps were maintained by EDR for the subject property and immediate vicinity. A copy of the Sanborn® Map Report dated November 11, 2022 indicating that there is no coverage for the subject property and vicinity is presented in Appendix D-2.

D3. Aerial Photographs

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Aerial Photographs of the subject site and vicinity. Based on the Aerial Photographs for the subject property dated from 1937 through 2016 as obtained by KCE Matrix from EDR, the subject property consisted of vacant land with no structures between 1937 and 2016. The site appears to have been used as agricultural land between approximately 1952 and 1984. Copies of aerial photographs dated 1937, 1952, 1969, 1977, 1984, 1994, 2006, 2009, 2012 and 2016 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-3.

D4. Historical Topographic Maps

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Topographic Maps of the subject site and vicinity. Based on the historic and/or recent Topographic Maps dated 1926 through 2018 as obtained by KCE Matrix from EDR, the property appears to have been vacant land with no structures between 1926 and 1969. Detailed information regarding the subject property was not provided on the Topographic Maps dated 2012 through 2018. Copies of the Historical Topographic Maps dated 1926, 1950, 1952, 1969, 2012, 2015 and 2018 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-4.

D5. City Directory Abstract

The target property was not listed in any of the databases searched as reported by EDR. A copy of the City Directory Abstract obtained from EDR and as reviewed by KCE Matrix is presented in Appendix D-5.

D6. Recorded Land Title Records

The client provided KCE Matrix with a copy of a Preliminary Title Report for the subject property as prepared by First American Title Company, dated October 18, 2022. Based on review of the title report for the subject property, no environmental liens and/or Activity and Use Limitations (AUL's), which indicate a past or present release of a hazardous substance or petroleum products, were presented or recorded. A copy of the title report as prepared by First American Title Company dated October 18, 2022 is presented in Appendix E.

E. Historical Use Information - Adjoining Properties

E1. Historic Maps

KCE Matrix contacted EDR in an effort to obtain historic Sanborn® Maps of the subject site and vicinity. Based on a search of the EDR historic map collection, no such historic maps were maintained by EDR for the subject property and immediate vicinity. A copy of the Sanborn® Map Report dated November 11, 2022 indicating that there is no coverage for the subject property and vicinity is presented in Appendix D-2.

E2. Aerial Photographs

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Aerial Photographs of the subject site and vicinity. Based on the Aerial Photographs for the subject property and vicinity dated from 1937 through 2016 as obtained by KCE Matrix from EDR, the general vicinity of the subject property appears to have been comprised of essentially vacant and/or agricultural land with dispersed residential properties between 1937 and 1994. As of 1952 and through 2016, gradual development of essentially residential properties is evident in the general vicinity to the north of the subject property. As of 1994 and through 2016, gradual development of essentially residential properties is evident in the general vicinity, particularly in areas to the west and southwest of the subject property. Copies of aerial photographs dated 1937, 1952, 1969, 1977, 1984, 1994, 2006, 2009, 2012 and 2016 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-3.

E3. Historical Topographic Maps

KCE Matrix contacted EDR in an effort to obtain historic and/or recent Topographic Maps of the subject site and vicinity. Based on the historic and/or recent Topographic Maps for the subject property and the general vicinity dated from 1926 through 2018 as obtained by KCE Matrix from EDR, the general vicinity of the subject property appears to have been essentially vacant land in

1926, and vacant and/or agricultural land with dispersed residential properties, particularly in the areas to the north of the site between 1952 and 1969. In 2012, gradual development of properties is evident in the general vicinity, particularly in areas to the west and southwest of the subject property, and the vicinity elsewhere remains essentially vacant land. Copies of the Historical Topographic Maps dated 1926, 1950, 1952, 1969, 2012, 2015 and 2018 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-4.

E4. City Directory Abstract

Based on review of the City Directory Abstract report obtained by KCE Matrix from EDR; additional information with regard to addresses in the site vicinity is presented. Information with regard to listings that are or were located in the immediate vicinity of the subject property is presented on pages A1 through A15 of the referenced EDR City Directory Abstract report. A copy of the City Directory Abstract report obtained from EDR and reviewed by KCE Matrix is presented in Appendix D-5.

VI. SITE RECONNAISSANCE

A. Non-ASTM Scope Considerations

Site reconnaissance is limited to the areas accessible and inspected during this investigation. There were no buildings or structures observed on site during this investigation. As such, KCE Matrix did not observe any suspect Asbestos Containing Material (ACM) or Lead-Based Paint (LBP) in association with the subject property. No sampling or analysis of any building materials for asbestos content or paint for lead content was conducted during this assessment.

Exposure to asbestos is a health concern when building materials are friable. In working near, repairing or replacing materials such as these, a licensed asbestos abatement contractor, or personnel specially trained in working with or near asbestos should be employed. With regard to LBP, exposure to lead from LBP is a health concern when lead dust is created and can be inhaled or LBP chips are accessible for ingestion. In working near, assessing, repairing or replacing materials that contain LBP, certified lead professionals specially trained in working with or near LBP should be employed.

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The United States Environmental Protection Agency (EPA) and the California EPA have prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. It is important to note that the EPA has found homes with elevated levels of radon in all three designated zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. The map divides the country into three Radon Zones as follows:

- Zone 1: Highest Potential - Counties that have a predicted average indoor radon screening level greater than 4 picocuries per liter (pCi/L), the US EPA Action Limit.

- Zone 2: Moderate Potential - Counties that have a predicted average indoor radon screening level between 2 and 4 pCi/L.

- Zone 3: Low Potential - Counties that have a predicted average indoor radon screening level less than 2 pCi/L.

Radon sampling was not conducted as part of this assessment. Review of the California EPA Map of Radon Zones places the subject property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

B. General Site Setting

The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Street, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through vacant land located along the southern property line.

A Location Map, a Site Plan and a Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively. During site reconnaissance, KCE Matrix also obtained photographs of the subject property and vicinity. Selected photographs are presented in Appendix F.

C. Observations

On December 1, 2022, a representative of KCE Matrix inspected the subject property and recorded the following observations:

	Description	Comments
1	Industrial Use	None observed
2	Gas Station	None observed
3	Motor Repair Facility	None observed
4	Commercial Printing Facility	None observed
5	Dry Cleaning	None observed
6	Photo Development Laboratory	None observed
7	Junkyard	None observed
8	Landfill	None observed

	Description	Comments
9	Waste Treatment	None observed
10	Storage Facility	None observed
11	Disposal Facility	None observed
12	Processing Facility	None observed
13	Recycling Facility	None observed
14	Batteries	None observed
15	Pesticides or agricultural activity	None observed
16	Paints	None observed
17	HazMat storage or use	None observed
18	Potential HazMat storage or use	None observed
19	Dumping or Improper Disposal of HazMat	None observed
20	Drums and Other Containers	None observed
21	PCB's, Transformers, Capacitors or Hydraulic equipment, other equipment	None observed
22	Chemical Products	None observed
23	Asbestos, Age of Building, Blueprints	The site consists of vacant land with no structures and has a dirt surface
24	Paint Condition, LBP	The site consists of vacant land with no structures and has a dirt surface
25	Building Demolition or Renovation	None observed
26	Fill Dirt From Other Locations	None observed
27	Stained Soil or Spills	None observed
28	Oil or Gas Wells	None observed
29	Underground Storage Tanks (USTs)	None observed
30	Above-ground Storage Tanks (AST's)	None observed
31	Hydraulic Hoists	None observed
32	Clarifier/Wastewater Interceptor	None observed
33	Subsurface or Underground Pipes	The site consists of vacant land with no structures and has a dirt surface
34	Above Ground Pipes	None observed
35	Flooring, Drains or Walls Emitting Foul Odors	None observed
36	Pits, Pounds, Lagoons or Cesspools	None observed
37	Distressed Vegetation	Some distressed vegetation observed, most likely due to lack of care
38	Pools of Liquid, Drains, Sumps, Stains, Septic Tanks	None observed
39	Environmental Liens	None observed
40	Government Notifications Regarding Environmental Violation	None observed
41	HazMat Inventory	None
42	Disclosure of Hazardous Substances or Petroleum Products	None observed
43	Previously Conducted Environmental Site Assessments	None observed
44	Wastewater Generation or Disposal	None observed
45	Water Supply System, Water Usage	None observed
46	Regulated Air Emissions	None observed
47	Heating/Cooling	The site consists of vacant land with no structures and has a dirt surface
48	Potable, Irrigation, or Monitoring Wells	None observed
49	Storm water drainage	Dirt surface
50	Odors	Not perceived

	Description	Comments
51	Solid Waste	None observed

D. Site Vicinity Reconnaissance

KCE Matrix conducted a brief inspection of the immediate vicinity of the subject property. The adjoining properties are comprised of the following:

- North: Residential properties, an auto repair workshop/facility, Dillon Avenue and residential property.
- East: Residential properties and vacant properties.
- South: Vacant land, commercial/retail property (Rite Aid Store), residential property and East Walnut Street.
- West: Farmersville Road, commercial property, an auto repair facility, a public storage facility and residential properties along with residential streets.

VII. INTERVIEWS

A. Interview with Owner

KCE Matrix did not conduct an interview with the current owner of the subject property during this investigation.

B. Interview with Site Manager

KCE Matrix did not conduct an interview with the current occupant of the property during this investigation. The subject property currently consists of vacant unoccupied land with a dirt surface and no structures.

C. Interviews with Occupants

KCE Matrix did not conduct an interview with the current occupant of the property during this investigation. The subject property currently consists of vacant unoccupied land with a dirt surface and no structures.

D. Interviews with Local Government Officials

KCE Matrix did not interview any local government officials regarding the subject property during this investigation.

E. Interviews with Others

KCE Matrix did not conduct any other interviews regarding the subject property during this investigation.

VIII. VAPOR ENCROACHMENT SCREEN

During this investigation, KCE Matrix conducted a Vapor Encroachment Screen (VES) for the subject property based on the ASTM E2600-10 guideline. The goal of conducting a VES as established by the ASTM, is to identify a potential Vapor Encroachment Condition (VEC) for the subject property, which is defined as the presence or likely presence of Chemicals of Concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject site. Detailed information with regard to the VES evaluation conducted, the methodology used, and the information for other sites located in the immediate vicinity of the subject property as provided to KCE Matrix by EDR is presented in a VES summary report presented in Appendix G of this report.

A. Subject Property - VES

Based on the research conducted during this investigation, the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site.

On December 1, 2022, a representative of KCE Matrix conducted site inspection of the subject property and confirmed that the property currently consists vacant land with no structures and has a dirt surface. Based on the site history of the subject property which has included agricultural use over an extended period of time, a VEC originating from the subject site could not be ruled out.

B. Site Vicinity - VES

Based on the research conducted during this investigation for other sites located in the general vicinity of the subject property, three other sites were evaluated during this VES. The evaluation of this other site located closest to the subject property includes the following:

Facility Name	Facility Address	Database
Ral Copping	28880 Rd 164	HIST UST
Ralph Copping	28880 Road 164	HIST UST
Claudes Buggies Inc	28813 Farmersville Blvd	SWEEPS UST, HIST UST
T Young Diesel Electric	29022 Road 164	RCRA NONGEN / NLR

Based on the review of the nearby sites as listed by EDR report, two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular product. The one

other site identified as being located in the general vicinity of the subject property was listed on the RCRA NONGEN / NLR database. This facility has been identified as a non-generator with no reported violations.

More specifically with regard to the site identified as Ralph Copping, it is reported that this other site is located in the immediate site vicinity. The site is reported as having had a 260-gallon UST used to store regular motor vehicle fuel for private use on a property with the address of 28880 Road 164, Visalia, California in June of 1988. A copy of the SWRCB Hazardous Substance Storage Container Information report for Tulare County dated June 1, 1988 is presented in Appendix G. Given the fact that this UST is reported as having been located in the immediate site vicinity, a VEC originating from this other nearby site for the subject property cannot be ruled out. Furthermore, the immediate site vicinity, particularly to the areas west across Farmersville Road, south and east of the subject property, were used for agricultural purposes for an extended period of time, at least from 1937 through 1984.

Based on the information provided above, a VEC originating from other nearby sites for the subject property could not be ruled out. Detailed information with regard to the VES evaluation conducted is presented in a VES summary report presented in Appendix G of this report.

IX. FINDINGS

The following presents our findings based on the work performed during this Phase I ESA:

- The subject property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Street, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property currently consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through vacant land located along the southern property line.

- Based on the historic information obtained during this investigation (including research of Sanborn Maps, Aerial Photographs, regulatory records and city directories), the subject property consisted of vacant unoccupied land with no structures from 1937 through the present. The site appears to have been used as agricultural land between approximately 1952 and 1984. As of 1994 and through the present, a private road has been and continues to be located in the central portion of the property that connects Farmersville Road along the western perimeter of the site to the properties located adjacent to and east of the subject site. On December 1, 2022, a representative of KCE

Matrix conducted site inspection of the subject property and confirmed that the property currently consists vacant land with no structures and has a dirt surface.

- The environmental disclosure report obtained by KCE Matrix from EDR presents information with regard to other sites in the immediate and general site vicinity of the subject property. Based on review of the report as provided by EDR, only three other sites were identified as being located in the general vicinity of the subject property. Two of these other sites have and/or have had at least one Underground Storage Tank (UST) used for regular product. The one other site identified as being located in the general vicinity of the subject property was listed on the RCRA NONGEN / NLR database. This facility has been identified as a non-generator with no reported violations. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property.

- Based on the VES conducted during this investigation, a VEC originating from the subject property could not be ruled out. Furthermore, based on the research conducted during this investigation, a VEC originating from other nearby sites in the vicinity for the subject property could not be ruled out.

- KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west.

X. SIGNATURE

KCE Matrix appreciates the opportunity to have provided services for this project. Should you have any questions regarding this report and the assessment work performed, please do not hesitate to contact our office at 818-559-5500.

Sincerely,

KCE Matrix, Inc.

XI. QUALIFICATIONS

KCE Matrix declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Detailed information with regard to the qualifications of the personnel who have worked on this project is presented in Appendix H of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022
Date Data Arrived at EDR: 08/02/2022
Date Made Active in Reports: 08/22/2022
Number of Days to Update: 20

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022
Date Data Arrived at EDR: 08/02/2022
Date Made Active in Reports: 08/22/2022

Next Scheduled EDR Contact: 01/09/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/26/2022
Date Data Arrived at EDR: 08/02/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021
Date Data Arrived at EDR: 06/24/2021
Date Made Active in Reports: 09/20/2021
Number of Days to Update: 88

Next Scheduled EDR Contact: 01/10/2023
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/26/2022

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/26/2022

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

UTM Y (Meters):	4020942.0
Elevation:	365 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12012165 EXETER, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

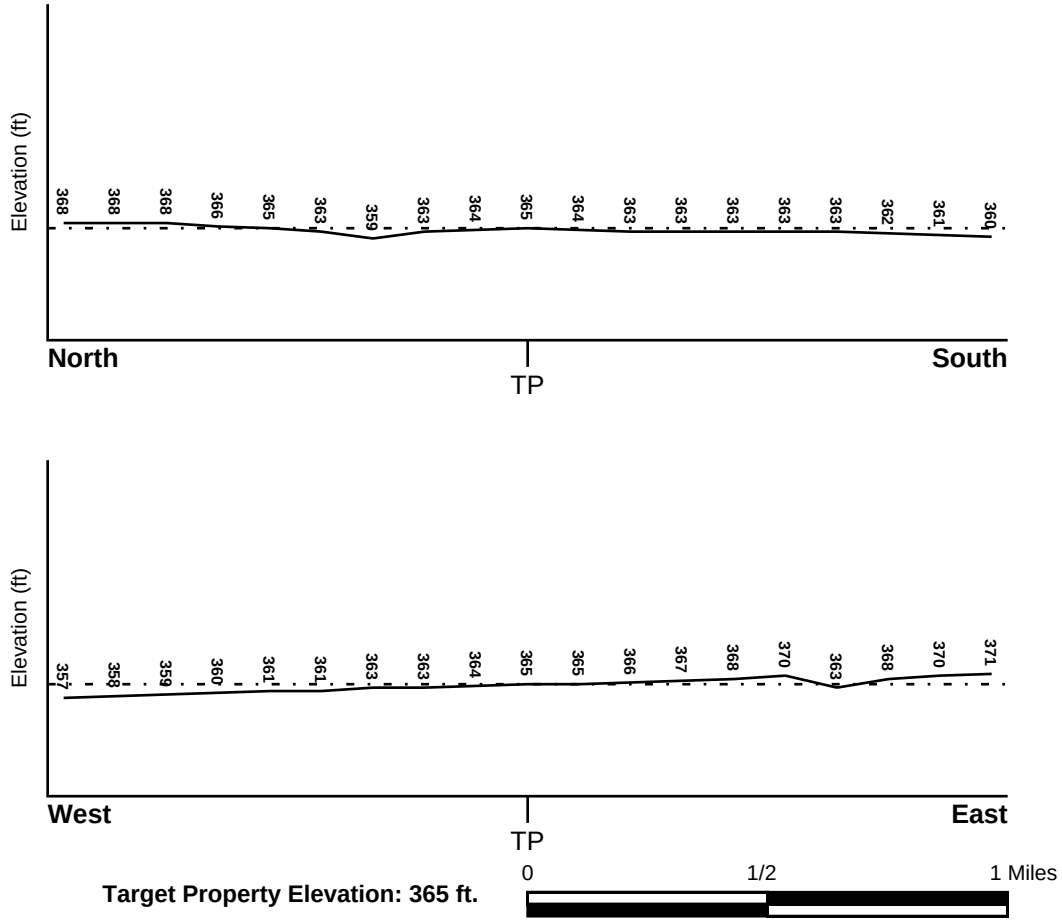
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06107C0954E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06107C0955E	FEMA FIRM Flood data

06107C0962E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EXETER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Nord

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
2	11 inches	38 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6
3	38 inches	50 inches	stratified loamy coarse sand to coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	50 inches	72 inches	stratified sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.11 Min: 4.23	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Grangeville

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 8.4 Min: 6.6
2	16 inches	27 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Subject: Public Records Request Response-Central Valley Water Board

Hello,

In response to your Public Records Request of **14 November 2022**, no records were found on the following property(s):

APN: 111-290-015-000
Farmersville, CA 93292

The search was conducted with the GeoTracker database, available for public access at https://geotracker.waterboards.ca.gov/.

In addition to GeoTracker, the California Integrated Water Quality Systems (CIWQS) database was also used in the search, and is available for public access at http://www.waterboards.ca.gov/centralvalley/resources/data_databases/.

The California Storm Water Multiple Applications and Report Tracking System (Smarts) was also used in the search, and is available for public access at http://smarts.waterboards.ca.gov.

If you have reason to believe that the Central Valley Water Board may have responsive records (contrary to this response), please let me know.

Thank you,

Nicholas Handcock, Staff Services Analyst

Public Records Request Number: 1-111422-05
Location(s): APN: 111-290-015-000, Farmersville, CA 93292

Dear Requestor:

On November 14, 2022 the Department of Toxic Substances Control (DTSC) received your email of November 14, 2022 requesting records under the Public Records Act. We were unable to locate an address in the county database using the APNs provided and we are unable to search our records using APNs as our databases do not include this information. If you have a specific address or cross streets, please let us know.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-4159 or via email at PubReqAct@dtsc.ca.gov.

Sincerely,
Gao Moua

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 11/15/2022 at 7:17 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Subject: Re: Public Record Request: (APN: 111-290-015-000), Farmersville, CA 93292
Attachments: CG Brochure 12-12-14.pdf

Hello Hagop:

That site (APN 111-290-015-000) is vacant and the City has no records of any permits for construction. The parcel is inside city limits and is zoned CG (General Commercial). This zone allows for a wide variety of commercial uses, including retail stores, restaurants and offices, among others. I have attached a brochure that summarizes permitted uses and zoning standards.

I hope this information is helpful.

Sincerely,

Karl Schoettler, City Planning Consultant

What is the Purpose of the C-G Zone?

The C-G (General Commercial) zone is intended to provide attractive areas for the establishment of a variety of retail commercial uses, offices and support services in Farmersville. Typical uses permitted in this zone include retail stores, restaurants, offices and similar uses. Some uses are permitted by Conditional Use Permit (see lists below).

Development and land use in Farmersville is regulated by the Farmersville Zoning Ordinance (Title 17 of the Farmersville Municipal Code). The C-G zone is specifically found in Section 17.44 of the Zoning Ordinance.

Permitted Uses

The following uses are permitted by right in the C-G zone. New buildings (or site improvements) for these uses require Site Plan Review (see Site Plan Review brochure).

Accessory buildings and uses customarily appurtenant to a permitted use*
Appliance sales, service and supply
Auto leasing, truck and trailer rentals
Auto parts sales (no servicing)
Auto sales, service and repair, new and used, including boat, motorcycle, RV, trailer and trucks, and repair garages
Auto and truck service stations
Bakeries
Barber and beauty shops
Boarding and rooming houses (C.U.P. required for more more than six guests)
Cafes, coffee shops and restaurants, except drive-in, fast food, self-service and take out restaurants (these require a C.U.P.)
Cargo containers*
Drug stores and pharmacies
Electrical sales, service and supply
Film processing pick-up stations
Financial institutions
Florists
Food and grocery stores
Funeral homes and mortuaries
Gift shops
Glass sales, service and supply
Hardware stores
Laundry, self service
Locksmiths
Medical and dental clinics
Medical laboratories
Offices (professional or commercial)
Opticians
Parking facilities, as part of a permitted use
Parking facilities – off site
Plant nurseries and greenhouses
Plumbing sales, service and supply
Pool service and supply
Prescription pharmacies
Public and private schools
Public and quasi-public buildings and uses appropriate to the area
Retail stores and shops
Shopping centers less than 20 acres
Social halls, lodges, fraternal ogranizations and clubs
Swimming, tennis and racquetball clubs, health clubs
Taxicab service
Technical, trade and craft schools and studios
Temporary construction storage yards
Temporary outdoor uses (subject to Section 17.56.040 of the Farmersville Municipal Code)
Tire recapping
Upholstery shops
Variety stores
Video game centers
Video games when incidental to a permitted use
Video movie rental shops
Thrift shops, used merchandise stores

* New structures proposed for uses marked with an asterisk are subject to Administrative Site Plan Review (staff review)

Uses Permitted Subject to Conditional Use Permit (C.U.P.)

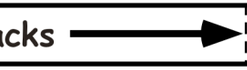
The following uses (whether in existing or new (to-be-constructed) buildings/sites) are permitted by Conditional Use Permit:

Ambulance Service
Bars, cocktail lounges and taverns
Bowling alleys
Card rooms
Car washes
Catering trucks and mobile food vendors (see Section 17.68.100 of the Zoning Ordinance)
Churches
Clothes cleaning and laundry pick up
Communication and public utility service facilities
Drive-in, drive-thru or drive-up businesses, including, but not limited to fast food, beverage, financial institutions, pharmacies and similar businesses.
Dance halls
Heating and air conditioning sales, service and supply
Hospitals
Hotels and motels
Liquor sales, on and off sale
Massage businesses
Miniature golf
Multi-use developments
Palm readers, fortune tellers, hypnotists
Passenger terminals
Pool halls
Produce stands
Shopping centers 20 acres or greater
Skating rinks
Smoke shops/tobacco shops
Tattoo and piercing shops
Theaters
Veterinary offices and clinics

What Development Standards Apply to Property in the C-G zone?

All new development in the C-G zone is subject to the following development standards.

Setbacks

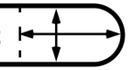


Front Yard: Four feet, minimum. However, parking lots must be separated from street rights-of-way by a landscape buffer at least 10 feet wide. For lots shallower than 100 feet, the parking setback shall be 10% of the depth of the lot, down to 5 feet wide, whichever is greater.

Interior Side Yard: No setbacks are required except where a C-G parcel abuts a residentially zoned parcel, in which case the interior side yard setback shall be the same as required for the residential parcel.

Rear Yard: None required.

Lot Size/Dimensions



Newly-created parcels must meet the following minimum area/dimensions:

Lot Area: 6,000 square feet, minimum
Corner lot width: 70 feet, minimum
Interior lot width: 60 feet, minimum

Building Height

40 feet, maximum. Some exceptions are permitted under Section 17.88 of the Farmersville Zoning Ordinance.

Parking

On-site parking must be provided for all new uses. The number of spaces shall be as required in Section 17.80 of the Farmersville Zoning Ordinance (see also the Parking brochure). Parking requirements for several common uses in the C-G zone are as follows:

Restaurants: one parking space per four seats, but not less than five spaces, plus one space per employee.
Fast food restaurants, drive-ins and take-out restaurants: one space per 250 square feet of floor area, but not less than five spaces, plus one space per employee.
Retail stores, banks and shopping centers: one space per 300 square feet of gross floor area (except for storage and loading areas) but not less than five spaces, plus one space per employee.
Auto Repair, service stations, personal service businesses and other non-retail commercial: one space per 300 square feet of gross floor area, but not less than five spaces, plus one space per employee.
Offices (except medical/dental offices): One space per 300 square feet of floor area, but not less than five spaces.
Medical and Dental offices: Five spaces per doctor/practioner , plus one space per 300 square feet of lab, x-ray and similar specialty areas, plus one space for each employee.

Parking Design

All on-site parking lots shall be designed consistent with requirements of the Zoning Ordinance (see also the "Parking Design" brochure. Minimum dimensions for most parking lots are as follows:

Parking spaces (90 degrees): 9' wide x 19' long
Aisles: 25 feet wide, minimum.

Landscaping

Landscaping and automatic irrigation shall be provided for all non-paved areas. Parking lots shall include landscaping and shade trees consistent with requirements of the Zoning Ordinance.

Design Guidelines

All uses must comply with the Farmersville Design Guidelines. Contact City Hall for copies of the Guidelines.

Signs

All new signs shall comply with requirements of the Farmersville Sign Ordinance (see the "Sign Ordinance" brochure for more information).

Other Requirements

- Utilities (water, sewer, storm drain, etc.) shall be installed for new development, consistent with the requirements of the City Engineer and City standards.
- Street improvements shall be installed consistent with the Standard Specifications Manual.
- Development in the Highway 198 Specific Plan area shall be consistent with requirements of the Specific Plan (contact City Hall for copies of the Specific Plan);
- Development along waterways identified in the Farmersville Waterway/Trails Master Plan must comply with the policies of the Plan. Copies of the Master Plan are available at Farmersville City Hall;
- Solid fencing and landscaping adequate to screen development from adjacent residential zones along rear and side property lines is required;
- Outdoor storage shall be screened from view from the public right of way;
- Outdoor light fixtures shall be hooded and adjusted to prevent unnecessary illumination of adjoining properties and streets.
- All uses/activities are to be conducted wholly within completely enclosed buildings Any outdoor storage of materials shall be enclosed with a minimum six foot high solid masonry or wood fence.
- Maximum noise levels at property lines shall not exceed 65 decibels

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by KCE Matrix were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by KCE Matrix were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# KCE-2022-454E

Project: Vacant Land

Coordinates:

Latitude:	36.31498 36° 18' 54" North

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX E

USER QUESTIONNAIRE
AND TITLE REPORT

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.

Site Address, APN, etc.: (APN: 111-290-015-000), Farmersville, CA 93292

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

1. **Environmental cleanup liens that are filed or recorded against the site**
   Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?
   ☑ **No** ☐ **Yes, please explain** _____

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry**
   Are you aware of any Activity and Use Limitations (AULs), such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   ☑ **No** ☐ **Yes, please explain** _____

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP**
   As the *user* of this *ESA,* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ☑ **No** ☐ **Yes, please explain** _____

4. **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated**
   Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?
   ☑ **Yes** ☐ **No, there is a difference between the purchase price and the fair market value**
   If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?
   please explain _____

5. **Commonly known or *reasonably ascertainable* information about the *property***
   Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

   (a.) Do you know the past uses of the *property*?
   ☑ **No** ☐ **Yes, please explain** _____

   (b.) Do you know of specific chemicals that are present or once were present at the *property*?
   ☑ **No** ☐ **Yes, please explain** _____

   (c.) Do you know of spills or other chemical releases that have taken place at the *property*?
   ☑ **No** ☐ **Yes, please explain** _____

   (d.) Do you know of any environmental cleanups that have taken place at the *property*?
   ☑ **No** ☐ **Yes, please explain** _____

6. **The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation**
   As the *user* of this *ESA*, based on your knowledge and experience related to the *property,* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?
   ☑ **No** ☐ **Yes, please explain** _____

Note: Landowner Liability Protections, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("*Common Elements*" Guide) issued on March 6, 2003.

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.

In addition, certain information should be collected, if available, and provided to *KCE Matrix, Inc.* to conduct the Phase I Environmental Site Assessment. This information is intended to assist *KCE Matrix, Inc.* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) The reason why the Phase I Environmental Site Assessment is required,

Due diligence

(b) The type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

unimproved, vacant land

(c) The complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful) APN = 111-290-015

Along Farmersville Rd (East side) between Dillon Ave & E Walnut St

(d) The scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

Standard scope

(e) Identification of all parties who will rely on the Phase I *report*,

Pacific West Communities

(f) Identification of the site contact and how the contact can be reached,

Don Slattery, dons@tpchousing.com, (208)908-4873

(g) Any special terms and conditions which must be agreed upon by the *environmental professional*

None

(h) Any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

None

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of October 18, 2022 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA/CLTA Homeowner's (EAGLE) Policy of Title Insurance (2013) and ALTA Ext Loan Policy 1056.06 (06-17-06) if the land described is an improved residential lot or condominium unit on which there is located a one-to-four family residence; or ALTA Standard Owner's Policy 2006 (WRE 06-17-06) and the ALTA Loan Policy 2006 (06-17-06) if the land described is an unimproved residential lot or condominium unit

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Marlene E. Gardiner, as Trustee of the Marlene E. Gardiner Survivor's Trust, dated January 5, 1988 as to an undivided 40% interest and DMA Investments Limited Partnership, a Nevada limited partnership as to an undivided 60% interest as tenants in common, Subject to Exception No. 15

The estate or interest in the land hereinafter described or referred to covered by this Report is:

FEE

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2022-2023.

First Installment:	$2,279.55, OPEN
Penalty:	$0.00
Second Installment:	$2,279.55, OPEN
Penalty:	$0.00
Tax Rate Area:	008-020
A. P. No.:	111-290-015-000

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. AN EASEMENT FOR THE PURPOSE SHOWN BELOW RIGHTS INCIDENTAL THERETO, AS SHOWN BELOW MAP OF: TULARE COUNTY ASSESSOR'S MAP IN THE OFFICE OF THE COUNTY SURVEYOR OF SAID COUNTY PURPOSE : ROAD 164
AFFECTS : WEST LINE OF SAID LAND

4. Any and all offers of dedications, conditions, restrictions, easements, notes and/or provisions shown or disclosed by the filed or recorded map referred to in the legal description including but not limited to: PUBLIC UTILITIES, ACCESS EASEMENT, PUBLIC USE THE ROAD RIGHT OF WAY and incidental purposes affecting said land.

5. The effect of a map purporting to show the land and other property, filed IN BOOK 30, PAGE 72 of Record of Surveys.

6. The effect of a document entitled "GRANT DEED", recorded JULY 14, 2005 as INSTRUMENT NO. 05-74678 of Official Records.

   The requirement the document is re-recorded to include a complete and correct legal description.

7. The effect of a document entitled "GRANT DEED", recorded DECEMBER 7, 2010 as INSTRUMENT NO. 10-78135 of Official Records.

   The requirement the document is re-recorded to include a complete and correct legal description.

8. An easement for CONSTRUCTION AND RELATED PURPOSES and incidental purposes, recorded MAY 12, 2020 as INSTRUMENT NO. 20-26557 OF OFFICIAL RECORDS.

In Favor of:	THE CITY OF FARMERSVILLE, A MUNICIPAL CORPORATION
Affects:	as described therein

9. Rights of the public in and to that portion of the Land lying within any Road, Street, Alley or Highway.

10. Water rights, claims or title to water, whether or not shown by the Public Records.

Prior to the issuance of any policy of title insurance, the Company will require:

11. With respect to the trust referred to in the vesting:
    a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
    b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
    c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

12. With respect to DMA Investments Limited Partnership, a California limited partnership:

    a. That a certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) be recorded in the public records;
    b. A full copy of the partnership agreement and any amendments;
    c. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
    d. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

13. With respect to DMA Investments Limited Partnership, a NEVADA limited partnership:

a. That a certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) be recorded in the public records;
b. A full copy of the partnership agreement and any amendments;
c. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
d. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

14. With respect to DMA Investments Limited Partnership, a Nevada limited partnership, a certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.

15. With respect to THE GARDINER FAMILY TRUST U/T/A/ DATED JANUARY 5, 1988 :
a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

16. A copy of the Trust Agreement and all amendments should be submitted prior to closing. The Company may make additional requirements following a review of such documents including, but not limited to, a certification of trust confirming the powers of the trustees and the continuing existence of the trust.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

   NOTE to proposed insured lender only: No Private transfer fee covenant, as defined in Federal Housing Finance Agency Final Rule 12 CFR Part 1228, that was created and first appears in the Public Records on or after February 8, 2011, encumbers the Title except as follows: None

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;

b. zoning;
c. land use;
d. improvements on the Land;
e. land division; and
f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11,

16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

APPENDIX H

QUALIFICATIONS
OF
ENVIRONMENTAL PROFESSIONALS

ARAM B. KALOUSTIAN, P.E.
Principal

Mr. Aram Kaloustian has diversified experience in environmental, mechanical and civil engineering including indoor air quality surveys for mold and ventilation systems, asbestos and lead-based paint assessments, Phase I environmental surveys, subsurface environmental site assessments, remedial design, remediation system installation and operation, negotiations with regulatory agencies, computer modeling, research of new environmental investigative and remedial technologies, safety engineering and project management.

Mr. Kaloustian has conducted numerous assessments involving indoor air quality, asbestos and lead-based paint surveys and associated remediation projects by establishing investigative protocol, implementing efficient assessment strategies, and applying the site specific and appropriate remedial recommendations to all assessed projects. Mr. Kaloustian has also designed a variety of protocols for remedial and post-remedial monitoring services for a wide variety of project sites.

Mr. Kaloustian has conducted numerous historical and background Phase I investigations involving review of files located at various county health departments, water quality control boards, state departments of health, air quality management districts, city building departments, city departments of public works and city fire departments. These investigations also involved searches of state and federal databases for hazardous waste sites, generators, transporters and treatment/storage/disposal facilities, title searches, aerial photo reviews and visual site inspections.

Mr. Kaloustian has extensive subsurface site assessment experience involving underground storage tanks, exploratory borings and monitoring wells, implementation of monitoring and sampling programs, evaluation of monitoring and sampling data, review of historical site and site vicinity information, agency negotiations, and assessment and remediation recommendations.

Mr. Kaloustian's remedial design experience includes various vapor extraction and groundwater remediation systems for remediation of soil and groundwater impacted by hydrocarbon contamination. Mr. Kaloustian has designed and implemented vapor extraction treatment systems that have included internal combustion engines, catalytic thermal oxidizers and carbon adsorption. Groundwater treatment systems have included spray aeration tanks, carbon adsorption and air strippers.

Regulatory compliance experience includes obtaining permits for removal of underground storage tanks, drilling exploratory borings, installation of monitoring wells, and installation of vapor extraction treatment systems and groundwater treatment systems. This has required working with local county health departments, city departments of public works, city fire departments, air quality management districts, a number of publicly owned treatment works and the California Regional Water Quality Control Board.

Mr. Kaloustian has also constructed and evaluated various computer models for site assessment and remediation including models used to evaluate the vacuum influence of vapor extraction systems, the radius of influence of groundwater extraction, fate and transport analysis of contaminant's, and aquifer test data.

Mr. Kaloustian has also participated and has been the lead engineer in the research and development of new investigative and remedial techniques involving indoor air quality, horizontal drilling; and treatment of contaminated soil and sludge materials using remedial surfactants, bioremediation, soil washing, encapsulation and modified oxidation. Additional research experience includes participation in the South Coast Air Quality Survey in 1987 for research involving atmospheric chemistry.

Throughout the years, Mr. Kaloustian has also maintained certification and continuing education for Hazardous Waste Operations and Emergency Response (29CFR1910.120) and supervisory training; and has developed site specific health and safety plans for site assessment and remediation. Mr. Kaloustian has also been responsible for the development and implementation of a safety procedures manual for environmental assessment and remediation firms.

Registrations:
Registered Professional Civil Engineer, State of California
Registered Professional Civil Engineer, State of Arizona

I. INTRODUCTION

This report presents the results of subsurface environmental site assessment work conducted by KCE Matrix, Inc. (KCE Matrix) for the subject property. The purpose of this investigation was to assess subsurface soil for potential contamination from former agricultural land use at the property; and to assess subsurface soil-gas along the northwestern and southwestern most perimeter of the property for potential vapor intrusion and/or encroachment. The scope of work performed by KCE Matrix consisted of the following:

- Geologic logging during drilling of 40 exploratory soil borings.
- Soil sampling during drilling of 40 exploratory soil borings.
- Drilling and installation of 10 single-stage subsurface vapor probes.
- Soil-gas sampling of the 10 single-stage subsurface vapor probes.
- Project coordination and management.
- Sample delivery to a state certified environmental testing laboratory with corresponding chain of custody documentation.
- Laboratory analysis.
- Data analysis, interpretation, and preparation of this report summarizing the subsurface environmental assessment work conducted.

II. SITE DESCRIPTION

The property is located in a commercial/retail and residential area on the eastern side of Farmersville Road and approximately 700 feet to the north of the intersection of Farmersville Road and East Walnut Street, in Farmersville, California. The property consists of one parcel of land with Assessor's Parcel Number (APN): 111-290-015-000; measures approximately 409,500 square feet (approximately 9.4 acres) of land area in a rectangular-shaped configuration, appears to be relatively flat and has an approximate elevation of 365 feet above mean sea level. The property consists of vacant unoccupied land with no structures and has a dirt surface. A private road runs through the central portion of the site and connects Farmersville Road along the western property line to the residential properties located adjacent to and east of the subject site. The property can be accessed through the entire western property line along Farmersville Road and through vacant land located along the southern property line. A Location Map is shown in Appendix A, Figure 1, and a site plan of the property is presented in Appendix A, as Figure 2.

III. BACKGROUND

From November through December of 2022, a Phase I Environmental Site Assessment (ESA) was performed by KCE Matrix for the subject property. The results of the Phase I ESA were summarized in a report designated as (KCE-2022-454E-R1) dated December 6, 2022. Based on the Phase I ESA work performed, the following Recognized Environmental Condition (REC) was identified by KCE Matrix:

- REC – Historic agricultural land use. The subject property appears to have been used as agricultural land from at least approximately 1952 through 1984.

In addition, based on the Vapor Encroachment Screen (VES) conducted during the Phase I investigation, a Vapor Encroachment Condition (VEC) originating from the subject property could not be ruled out. Furthermore, a VEC originating from other nearby sites in the vicinity for the subject property could not be ruled out.

Based on the Phase I ESA performed, KCE Matrix recommended that subsurface environmental assessment work be performed for the subject property to determine whether or not the property had been impacted by the potential usage of pesticides over an extended period of time, and to assess any potential impact from metals (such as Arsenic and Lead). KCE Matrix also recommended that the proposed subsurface assessment work be conducted in a manner so as to address potential vapor encroachment conditions.

IV. FIELD ACTIVITIES

A. Historic Agricultural Land Use

Between January 11 and January 13, 2023, forty (40) subsurface exploratory soil borings (designated as EB-1 through EB-40) were drilled and sampled at the subject property, using hand-auger field drilling and sampling equipment at the locations shown in Appendix A, Figure 2. All 40 exploratory borings were drilled and sampled to a total depth of four feet below the ground surface (bgs).

Groundwater was not encountered in the 40 exploratory borings during the drilling and sampling work performed. Subsurface drilling and soil sampling activities were conducted by or under the supervision of KCE Matrix's California State Certified Professional Civil Engineer or Certified Engineering Geologist. The subsurface materials penetrated are described in the attached Field Borehole Logs as presented in Appendix D of this report.

A total of 80 soil samples were collected from the 40 exploratory borings at depths of two feet and four feet bgs for lithologic logging purposes. In addition, forty (40) of the 80 soil samples were selected for laboratory analysis from the 40 exploratory borings as follows:

- For borings EB-1 through EB-40 – soil samples collected at a depth of two feet bgs (40 samples)

The undisturbed soil samples were collected using hand-auger field drilling/sampling equipment. The sample containers were sealed, labeled, and stored in a cooler, on ice, until delivery to a state certified laboratory. All soil samples were vapor tested using a Photo Ionization Detector (PID). The PID used during this investigation has serial number 592-906766 and was calibrated with Isobutylene (i-C_4H_8) at a concentration of 100 parts per million by Volume (ppmV). The PID results for the soil vapors are reported on the attached Field Borehole Logs, which are included in Appendix D of this report.

B. Vapor Encroachment Condition

On January 19, 2023, ten single-stage soil vapor probes (designated as VP-1 through VP-10) were drilled and installed at the on-site locations shown in Appendix A, Figure 2.

The 10 single-stage vapor probes (designated as VP-1 through VP-10) were installed to a total depth of five feet bgs as measured from the ground surface. Each single-stage soil vapor probe was constructed by inserting a 1/4-inch Nylaflow sampling tube (which includes a vapor probe implant at the bottom of the tube) into the borehole, sealing off the annular space with the installation of a one-foot sand pack, installation of a one-foot dry granular bentonite above the sand pack, and installation of hydrated bentonite above the dry granular bentonite to the ground surface. A plastic stopcock was attached to the top of the vapor sampling tube for subsequent monitoring and sampling. A typical single-stage soil vapor probe construction diagram of the vapor probes constructed during this investigation is presented in Appendix E, Diagram 1.

On January 20, 2023, KCE Matrix collected soil-gas samples from the 10 single-stage vapor probes (designated as VP-1 through VP-10). The soil-gas samples were collected as follows:

- Ten (10) soil-gas samples collected from the 10 single-stage vapor probes VP-1 through VP-10, at a depth of five feet bgs (samples designated as VP-1(5) through VP-10(5)); and one field duplicate soil-gas sample collected from vapor probe VP-4 (sample designated as VP-4 (5)DUP)

The soil-gas sampling techniques used were based on the "Advisory – Active Soil Gas Investigations" established jointly by the California Environmental Protection Agency Department of Toxic Substances Control (DTSC) and California Regional Water Quality Control Board (RWQCB) – Los Angeles Region and San Francisco Bay Region dated July of 2015. Soil-gas sampling activities were conducted by and/or under the supervision of KCE Matrix's California State Certified Professional Civil Engineer or Certified Engineering Geologist.

The soil-gas samples were collected using SUMMA canisters from the 10 single-stage vapor probes (designated as VP-1 through VP-10). The sampling rate for each soil-gas sample collected was approximately 200 cubic centimeters per minute (cc/min) using a SUMMA canister. Prior to purging or sampling, a shut-in test was conducted to check for leaks in the above-ground sampling

system. In addition, prior to collecting the soil-gas samples, a default of three purge-volumes was used as recommended by the DTSC/RWQCB guideline dated July 2015. Also, in order to verify proper collection of the soil-gas sample from the intended depth, a leak-test was performed for each soil-gas sample collected by placing a tracer gas mixture (n-pentane/n-hexane/n-heptane) above the bentonite seal for the probe.

V. GEOLOGY AND SUBSURFACE CONDITIONS

Based on the subsurface logging conducted by KCE Matrix during drilling of the 40 exploratory borings (designated as EB-1 through EB-40) during this investigation, the subsurface of the subject property appears to be underlain by sand to the maximum depth explored, approximately four feet bgs. Groundwater was not encountered during drilling activities.

KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.78-mile north of the subject site, the depth to groundwater was reported to range between 32.52 feet and 34.44 feet below the surface as monitored in May of 2012. Based on information as reported in the "Site Closure Summary" report dated April 1, 2003, for a property located approximately 0.75-mile south of the subject site, the highest depth to groundwater was reported as 13 feet below the top of well casings, and the lowest depth to groundwater was reported as 32 feet below the top of well casings, and the groundwater flow direction was reported to be towards the west.

VI. ANALYTICAL RESULTS

The soil and soil-gas samples collected during this investigation were analyzed by Jones Environmental, Inc. (JEI) in Santa Fe Springs, California. The samples were accompanied by properly executed chain of custody documentation. JEI is an environmental testing laboratory certified by the California State Department of Health Services (ELAP Certificate Number 2882).

A. Historic Agricultural Land Use

The 40 selected soil samples collected at a depth of two feet bgs from the 40 exploratory borings (designated as samples EB-1(2) through EB-40(2)) were analyzed for Organochlorine Pesticides (OCPs) by EPA method 8081A and for Arsenic and Lead by EPA method 6010B.

The analytical laboratory results of the 40 selected soil samples collected between January 11 and January 13, 2023 are presented in Appendix B, Tables 1 through 3. Copies of the laboratory reports and corresponding chain of custody documentation are presented in Appendix C of this report.

B. Vapor Encroachment Condition

The 11 soil-gas samples (designated as samples VP-1(5) through VP-10(5) and VP-4(5)DUP) collected on January 20, 2023, were analyzed for Volatile Organic Compounds (VOCs) and Total Petroleum Hydrocarbons (TPH) – Gasoline Range Organics (GRO) by EPA method 8260B.

The analytical laboratory results of the 11 soil-gas samples collected on January 20, 2023 are presented in Appendix B, Table 4. Copies of the laboratory report and corresponding chain of custody documentation are presented in Appendix C of this report.

VII. SUMMARY AND SAMPLE RESULTS

The following summarizes the subsurface environmental site assessment work performed for the subject property during this investigation:

A. Historic Agricultural Land Use

- Between January 11 and January 13, 2023, forty (40) exploratory soil borings (designated as EB-1 through EB-40) were drilled and sampled on site to a depth of four feet bgs. Groundwater was not encountered in any of the 40 borings during drilling activities.
- Between January 11 and January 13, 2023, a total of 80 soil samples were collected from the 40 exploratory borings on site (designated as EB-1 through EB-40). Forty (40) of the 80 soil samples were collected at a depth of two feet bgs; and the 40 other soil samples were collected at a depth of four feet bgs.
- As presented in Section VI of this report, forty (40) of 80 soil samples collected at a depth of two feet bgs were selected and analyzed for OCPs by EPA method 8081A and for Arsenic and Lead by EPA method 6010B.

Organochlorine Pesticides (OCPs)

- The analytical results of the 40 soil samples collected at a depth of two feet bgs and analyzed for OCPs (designated as samples EB-1(2) through EB-40(2)) indicated no detectable concentrations of 19 of the 21 OCP constituents (OCPs identified as Aldrin, α-BHC, β-BHC, γ-BHC (Lindane), δ-BHC, γ-Chlordane, α-Chlordane, 4,4'-DDD, Dieldrin, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin aldehyde, Endrin ketone, Heptachlor, Heptachlor epoxide, Methoxychlor and Toxaphene)
- The analytical results of the 40 soil samples collected at a depth of two feet bgs and analyzed for OCPs indicated concentrations of two of the 21 OCP constituents as follows:
    - 4,4'-DDE ranging from 1.1 micrograms per Kilogram (µg/Kg) to 17.4 µg/Kg in 12 of the 40 soil samples (designated as samples EB-1(2), EB-3(2), EB-4(2),

EB-13(2) through EB-15(2), EB-18(2), EB-22(2) EB-26(2), and EB-31(2) through EB-33(2)). 4,4'-DDE was not detected in the 28 other soil samples.

- 4,4'-DDT at 2.4 µg/Kg and 2.2 µg/Kg in two of the 40 soil samples (designated as samples EB-13(2) and EB-31(2), respectively). 4,4'-DDT was not detected in the 38 other soil samples.

- The analytical results of the soil samples collected and analyzed for OCPs from the 40 soil borings are presented in Appendix B, Table 1.

Arsenic

- The analytical results of the 40 soil samples collected at a depth of two feet bgs and analyzed for Arsenic (designated as samples EB-1(2) through EB-40(2)) indicated concentrations of Arsenic at 5.2 milligrams per Kilogram (mg/Kg) and 5.3 mg/Kg in two of the 40 soil samples collected (designated as samples EB-3(2) and EB-24(2), respectively). Arsenic was not detected in the 38 other soil samples collected and analyzed.

- The analytical results of the soil samples collected and analyzed for Arsenic from the 40 soil borings are presented in Appendix B, Table 2.

Lead

- The analytical results of the 40 soil samples collected at a depth of two feet bgs and analyzed for Lead (designated as samples EB-1(2) through EB-40(2)) indicated concentrations of Lead ranging from 2.6 mg/Kg to 5.6 mg/Kg.

- The analytical results of the selected soil samples collected and analyzed for Lead from the 40 soil borings are presented in Appendix B, Table 3.

B. Vapor Encroachment Condition

- On January 19, 2023, ten single-stage soil-vapor probes (designated as VP-1 through VP-10) were drilled and installed at the subject site. The 10 single-stage vapor probes (designated as VP-1 through VP-10) were installed at a depth of five feet bgs as measured from the ground surface.

- On January 20, 2023, ten soil-gas samples were collected from the 10 single-stage vapor probes (designated as VP-1 through VP-10); and one duplicate soil-gas sample was collected from vapor probe VP-4. The 11 soil-gas samples collected were analyzed for VOCs and TPH-GRO by EPA method 8260B.

TPH-GRO, BTEX and MTBE

- The analytical results of the 11 soil-gas samples collected from the 10 single-stage vapor probes (designated as VP-1 through VP-10) indicated concentrations of TPH-GRO, BTEX and MTBE as follows:

Sample ID	TPH-GRO	Benzene	Toluene	Ethylbenzene	Total Xylenes	MTBE
VP-1(5)	ND	ND	12	ND	ND	ND
VP-2(5)	ND	ND	21	ND	ND	ND
VP-3(5)	ND	ND	40	14	28	ND
VP-4(5)	ND	ND	46	22	56	ND
VP-4(5)DUP	ND	ND	44	19	46	ND
VP-5(5)	ND	ND	25	ND	17	ND
VP-6(5)	ND	ND	39	8	38	ND
VP-7(5)	ND	ND	88	18	69	ND
VP-8(5)	ND	ND	62	14	56	ND
VP-9(5)	ND	ND	56	11	59	ND
VP-10(5)	ND	ND	74	17	72	ND

*Results are presented in micrograms per cubic meter ($\mu g/m^3$)

OTHER VOCs

- The analytical results of the 11 soil-gas samples collected from the 10 single-stage vapor probes (designated as VP-1 through VP-10) indicated no detectable concentrations of other VOCs except as follows:
    - Concentrations of 1,2,4-Trimethylbenzene ranging from 9 $\mu g/m^3$ to 18 $\mu g/m^3$ in eight of the 11 soil-gas samples (designated as VP-4(5), VP-4(5)DUP, VP-5(5) through VP-10(5)). Concentrations of 1,2,4-Trimethylbenzene were not detected in the three other soil-gas samples (designated as VP-1(5) through VP-3(5)).
    - A concentration of Chloroform at 21 $\mu g/m^3$ in one of the 11 soil-gas samples (designated as VP-4(5)). Concentrations of Chloroform were not detected in the ten other soil-gas samples (designated as VP-1(5) through VP-3(5), VP-4(5)DUP and VP-5(5) through VP-10(5)).

VIII. EVALUATION

The RWQCB – San Francisco Bay Region has developed a method of performing risk assessment for subsurface environmental investigations. The extensive work performed to create the methodology and a detailed description of this method are presented in the document entitled "Screening for Environmental Concerns at Sites with Contaminated Soil and Groundwater, Interim Final – November 2007." Most recently, the derivation and application of ESLs is presented in a user's guide prepared by the RWQCB - San Francisco Bay Region (Interim Final January 2019 – Rev.2) and the ESLs are listed in the associated tables. This method establishes and presents Environmental Screening Levels (ESLs) for over 100 commonly released and detected contaminants that have been found in subsurface soil, groundwater, sub-slab/soil-gas and indoor air at sites where such releases of hazardous materials may have occurred.

The ESLs were developed to address environmental protection goals. For unauthorized releases into subsurface soil, use of the ESLs were intended to provide protection of human health to direct

exposure from the chemicals of concern, to protect against vapor intrusion into buildings, to protect against leaching of the chemicals of concern to groundwater, protection of terrestrial biota and protection against adverse nuisance conditions. The ESLs are considered conservative. Within certain limits, the risk to human health and the environment can be considered to be insignificant at sites where concentrations of the chemicals of concern do not exceed the established ESLs. Furthermore, the detection of the chemicals of concern at concentrations in excess of an established ESL does not necessarily mean that significant risk exists at the given site. However, such conditions do generally indicate that additional site-specific investigation and evaluation of potential risk and environmental concern is warranted. For the purposes of this investigation, the RWQCB ESLs for residential (Tier 1) and commercial (Tier 2) land use have been used to evaluate the data obtained during this assessment.

A. Historic Agricultural Land Use

Organochlorine Pesticides (OCPs)

When comparing the analytical results of the soil samples collected and analyzed for the 21 OCP constituents during this assessment to the RWQCB (Tier 1) and (Tier 2) ESLs, the results indicate the following:

- The analytical results of the 40 soil samples collected at a depth of two feet bgs and analyzed for OCPs (designated as samples EB-1(2) through EB-40(2)) indicate no detectable concentrations of 19 of the 21 OCP constituents (OCPs identified as Aldrin, α-BHC, β-BHC, γ-BHC (Lindane), δ-BHC, γ-Chlordane, α-Chlordane, 4,4'-DDD, Dieldrin, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin aldehyde, Endrin ketone, Heptachlor, Heptachlor epoxide, Methoxychlor and Toxaphene).

    - With regard to 18 of these 19 OCP constituents, the laboratory reporting limits are less than the RWQCB Tier 1 ESLs; and as such, the analytical results of these 18 OCP constituents are all less than the RWQCB Tier 1 ESLs.

    - With regard to one of these 19 OCP constituents (Heptachlor epoxide), this OCP constituent has RWQCB Tier 1 ESL of 0.18 µg/Kg; a Tier 2 ESL of 6.0 µg/Kg; and a residential Direct Exposure Human Health (Cancer Risk) ESL of 62 µg/Kg. The analytical laboratory reporting limit of Heptachlor epoxide is 0.4 µg/Kg; which is greater than the Tier 1 ESL and significantly less than the Tier 2 ESL and the residential Direct Exposure Human Health ESL.

- With regard to two of the 21 OCP (4,4'-DDE and4,4'-DDT) detected in the 40 soil samples collected from a depth of two feet bgs, the results indicate the following:

    - 4,4'-DDE: twelve (12) of the 40 soil samples (designated as samples EB-1(2), EB-3(2), EB-4(2), EB-13(2) through EB-15(2), EB-18(2), EB-22(2) EB-26(2), and EB-31(2) through EB-33(2)) indicate concentrations of 4,4'-DDE ranging from 1.1 µg/Kg to 17.4 µg/Kg, which are less than the Tier 1 ESL of 330 µg/Kg

and the Tier 2 ESL of 650 µg/Kg. 4,4'-DDE was not detected in the 28 other soil samples.

- 4,4'-DDT: two (2) of the 40 soil samples (designated as samples EB-13(2) and EB-31(2)) indicate concentrations of 4,4'-DDT at 2.4 µg/Kg and 2.2 µg/Kg respectively, which are greater than the Tier 1 ESL of 1.1 µg/Kg but significantly less than the Tier 2 ESL of 5,600 µg/Kg. In addition, when comparing the concentrations of 4,4'-DDT detected in the soil samples to residential (cancer risk) Direct Exposure Human Health Risk ESL for 4,4'-DDT (1.9 mg/Kg or 1,900 µg/Kg), the concentrations of 4,4'-DDT detected in the soil samples are significantly less than this ESL. 4,4'-DDT was not detected in the 38 other soil samples.

Arsenic

Arsenic has RWQCB (Tier 1) and (Tier 2) ESLs (0.067 mg/Kg and 0.31 mg/Kg, respectively) that are less than the analytical laboratory reporting limit of 5.0 mg/Kg. Therefore, the analytical laboratory results of Arsenic cannot be compared to the RWQCB ESLs.

The California Department of Toxic Substances Control (DTSC) has published Human Health Risk Assessment (HHRA) Note 11 regarding ambient levels for Arsenic in soils in five Southern California counties: Los Angeles, Orange, Riverside, San Bernardino, and San Diego. Specifically, DTSC established a regional ambient screening level of 12 milligrams per kilogram (mg/kg) for Arsenic, which is approximately 100 times the risk-based screening level for residential soil of 0.11 mg/kg developed by DTSC. This regional ambient level was previously established by DTSC as the upper bound of Arsenic in soil from multiple Los Angeles Unified School District sites, and DTSC formally established this ambient level for Southern California with the publication of HHRA Note 11.

The analytical laboratory results of the soil samples collected during this investigation indicate the following:

- Two of the 40 soil samples collected at a depth of two feet bgs (designated as EB-3(2), and EB-24(2)) indicate concentrations of Arsenic at 5.1 mg/Kg and 5.3 mg/Kg, respectively. The 38 other samples collected at a depth of two feet bgs indicate no detectable concentrations of Arsenic (laboratory reporting limit of 5.0 mg/Kg). Therefore, the analytical results of all 40 soil samples collected and analyzed are less than the DTSC ambient screening level of 12 mg/Kg.

Lead

With regard to Lead, the RWQCB ESLs for soil are as follows:

- Lead – RWQCB ESL, Tier 1 (residential) – 32 mg/kg
- Lead – RWQCB ESL, Tier 2 (commercial) – 32 mg/kg

- Lead – RWQCB ESL, Direct Exposure Human Health Risk – 82 mg/Kg

As presented in this report, the analytical results of all 40 soil samples collected from exploratory borings EB-1 through EB-40 at a depth of two feet bgs, indicate concentrations of Lead ranging from 2.6 mg/Kg to 5.6 mg/Kg and are therefore less than the RWQCB Tier 1 and Tier 2 ESLs for residential and commercial land use.

B. Vapor Encroachment Condition

For the purposes of this investigation, the RWQCB ESLs for both residential (Tier 1) and commercial (Tier 2) land use have been used to evaluate the soil-gas data obtained during this assessment.

As presented in this report, 10 soil-gas samples were collected from the 10 single-stage vapor probes (designated as VP-1 through VP-10) and one duplicate soil-gas sample was collected from vapor probe VP-4 in January of 2023 by KCE Matrix. The concentrations of the contaminants of concern detected in the soil-gas samples collected in January of 2023 are summarized in the table below:

Sample ID	TPH-GRO	Benzene	Toluene	Ethylbenzene	Total Xylenes	MTBE
VP-1(5)	ND	ND	12	ND	ND	ND
VP-2(5)	ND	ND	21	ND	ND	ND
VP-3(5)	ND	ND	40	14	28	ND
VP-4(5)	ND	ND	46	22	56	ND
VP-4(5)DUP	ND	ND	44	19	46	ND
VP-5(5)	ND	ND	25	ND	17	ND
VP-6(5)	ND	ND	39	8	38	ND
VP-7(5)	ND	ND	88	18	69	ND
VP-8(5)	ND	ND	62	14	56	ND
VP-9(5)	ND	ND	56	11	59	ND
VP-10(5)	ND	ND	74	17	72	ND
Tier 1 ESLs (Residential)	3,300	3.2	10,000	37	3,500	360
Tier 2 ESLs (Commercial/Industrial)	3,300	14	44,000	160	15,000	1,600

*Results are presented in micrograms per cubic meter ($\mu g/m^3$)

When comparing the analytical results of the subsurface soil-gas samples collected and analyzed during this assessment to the RWQCB ESLs as listed above, the results indicate the following:

- For TPH-GRO, Benzene and MTBE – All 11 soil-gas samples (designated as VP-1(5) through VP-10(5) and VP-4(5)DUP) collected and analyzed at a depth of five feet bgs

indicate no detectable concentrations of these contaminants of concern; and are therefore all less than the RWQCB Tier 1 ESL.

- For Toluene, Ethylbenzene and Total Xylenes – The 11 soil-gas samples (designated as VP-1(5) through VP-10(5) and VP-4(5)DUP) collected and analyzed at a depth of five feet bgs indicate various concentrations of these contaminants of concern; and the concentrations detected are all less than the RWQCB Tier 1 ESLs.

- For VOCs (other than BTEX and MTBE) – The 11 soil-gas samples collected from the 10 single-stage vapor probes indicate no detectable concentrations of VOCs for a majority of the samples and constituents analyzed. Of the few concentrations of these other VOCs that were detected, none were greater than the Tier 1 ESLs, except for Chloroform which was detected in only one of the 11 soil-gas samples collected (sample designated as VP-4(5) at a concentration of 21 µg/m^3. This concentration of Chloroform detected is similar to and only slightly greater than the Tier 1 and Tier 2 ESLs of 18 µg/m^3 for Chloroform. In addition, the duplicate sample collected from this same vapor probe (sample designated as VP-4(5)DUP) indicates no detectable concentration of Chloroform.

IX. CONCLUSIONS

A. Historic Agricultural Land Use

Organochlorine Pesticides (OCPs)

With regard to OCPs: Based on the subsurface environmental site assessment work performed and the evaluation of the data as presented in this report, two of the 21 OCP constituents were detected at various concentrations in subsurface soil at depths of two feet bgs. The concentrations of one of these two OCP constituents (4,4'-DDE) were below the RWQCB Tier 1 and Tier 2 ESLs. The concentrations of the one other OCP constituent (4,4'-DDE) were greater than the RWQCB Tier 1 ESL, but less than the Tier 2 and the RWQCB Direct Exposure Human Health Risk ESLs. Based on these results, KCE Matrix recommends no further subsurface soil assessment and/or remediation work in relation to OCPs for the subject site.

Arsenic

With regard to Arsenic: Based on the subsurface environmental site assessment work performed and the evaluation of the data as presented in this report, Arsenic was detected in only two of the 40 soil samples collected and analyzed. The concentrations of Arsenic detected are below the DTSC ambient screening level of 12 mg/Kg. Based on these results, KCE Matrix recommends no further subsurface soil assessment and/or remediation work in relation to Arsenic for the subject site.

Lead

With regard to Lead: Based on the subsurface environmental site assessment work performed and the evaluation of the data as presented in this report, Lead was detected at various concentrations in the 40 soil samples collected and analyzed. The concentrations of Lead in all 40 soil samples are less than the RWQCB Tier 1 and Tier 2 ESLs. Based on these results, KCE Matrix recommends no further subsurface soil assessment and/or remediation work in relation to Lead for the subject site.

B. Vapor Encroachment Condition

Based on the subsurface environmental site assessment work performed and the evaluation of the data as presented in this report, the results of soil-gas samples collected and analyzed indicate concentrations of the contaminants of concern that are less than the RWQCB Tier 1 and Tier 2 ESLs. In addition, the analytical results of the soil samples collected during this investigation indicate concentrations that are less than the RWQCB Tier 1 and Tier 2 ESLs. Based on these results, the Vapor Encroachment Conditions for the subject property has been adequately assessed and KCE Matrix recommends no further subsurface soil and/or soil-gas assessment and/or remediation for the subject site.

C. Conclusions

Based on the results of the subsurface ESA performed as presented in this report with regard to pesticides, Arsenic and Lead; the REC identified in the Phase I ESA report designated as (KCE-2022-454E-R1) dated December 6, 2022 as prepared by KCE Matrix, has been adequately assessed and KCE Matrix no longer considers the historical agricultural land use at the subject property as a REC.

Based on the results of the subsurface ESA performed as presented in this report, the Vapor Encroachment Condition identified in the Phase I ESA report designated as (KCE-2022-454E-R1) dated December 6, 2022 as prepared by KCE Matrix, has been adequately assessed and KCE Matrix concludes that a Vapor Encroachment Condition does not exist at the subject property.

X. LIMITATIONS

Site-specific subsurface conditions such as soil deposits and rock formations may vary in thickness, lithology, saturation strength and other properties across any site beyond what available documentation indicates. Therefore, it is possible that undocumented or concealed improvements or alterations to the property could exist beyond the inquiry of the activities conducted during this site assessment and associated remedial activities. In addition, environmental changes, either naturally occurring or artificially induced, may cause changes or alterations (which can be significant) to the property as compared to the conditions found at the time that this assessment was conducted.

Based on the best available investigative technologies, no amount of assessment can guarantee that the subject property does not contain contaminants or hazardous substances. The activities conducted during this limited investigation cannot identify all potential concerns for the subject property, and do not eliminate the possibility that the subject property is completely free of environmental concerns.

KCE Matrix has analyzed and evaluated the information collected during this investigation and associated remedial action using what we believe to be the currently applicable engineering techniques and principles. KCE Matrix assumes no liability from other parties involved in losses sustained as a result of decisions made based on interpretations of this report. KCE Matrix makes no warranty, either expressed or implied, regarding the work conducted, except that our services were performed in accordance with the generally accepted professional principles and practices existing for such work.

This report and all information obtained during this site assessment and associated remedial activities are considered confidential and will not be released without written permission by the owner of the subject property, the owner authorized entity conducting this assessment, or as required by law. The owner of the subject property is typically responsible for mitigation of contamination, corrective or remedial action, and disclosure of any information obtained during this site assessment and associated remedial activities or information contained in this report.

XI. SIGNATURE AND CERTIFICATION

KCE Matrix appreciates the opportunity to have provided services for this project. Should you have any questions regarding this report and the work performed, please do not hesitate to contact our office at 818-559-5500.

Sincerely,

KCE Matrix, Inc.
